Better Planning, Bigger Results

Save Time and Resources

- Boost Alignment
- Institutional Success

Institutional Success

Institutions that implement Oracle Enterprise Performance Management Cloud experience several key benefits—many in less than six months:

- Fewer administrative FTEs required for planning in Oracle EPM Cloud.
- Improved communication and collaboration by driving more accountability into lines of business.
- Reduction in the use of spreadsheets for budgeting.
- More people contributing to plans and forecasts.
- Reduced the time needed to plan and forecast per cycle.
- Improved ability to scale alongside growth.
- Increased value-added analysis (on average).
- Automation updates to take advantage of the latest features.
- Improvement in forecast accuracy (on average).
- Increased visibility into, and flexibility of, planning and forecasting processes.

Top 5 Reasons to Move Planning to the Cloud

To change the institution
To solve multiple systems
To automate business-opinion
To simplify administration of all processes
To adopt a structure that works

Better Planning, Bigger Results

The Future of Planning is Connected

Those that connect their processes and data across their institution and align fiscal and academic stakeholders will see increased fiscal sustainability.

We surveyed more than 500 decision makers and planning users, and found:

- Cannot effectively incorporate financial planning and analysis into line-of-business planning due to disparate systems.
- Struggle to align HR and finance processes due to siloed processes and limited automation.
- Want closer integration between planning and ERP systems.

Today's Institution Moves Fast.

68% of institutions reported that Oracle EPM Cloud improved the frequency of planning.

64% of institutions reported that Oracle EPM Cloud improved accuracy of planning.

59% of institutions reported that Oracle EPM Cloud improved the time needed to plan.
