

## Get Ready for the Cloud with Oracle Soar: The Automated Upgrade Tool.

### Upgrade or Migrate to Cloud? Doing Nothing Is Not an Option.

If you stand still, the gap is widening. If you are happy with the value you are getting from your on-premises solution, you can continue but it has expensive and lengthy upgrade cycles that you can avoid by moving to the cloud.

With a **simple upgrade** to cloud, using **our accelerators**, you will get immediate **additional value** and that value will appreciate through the ongoing update.

### Oracle Upgrade: Our Commitment to You

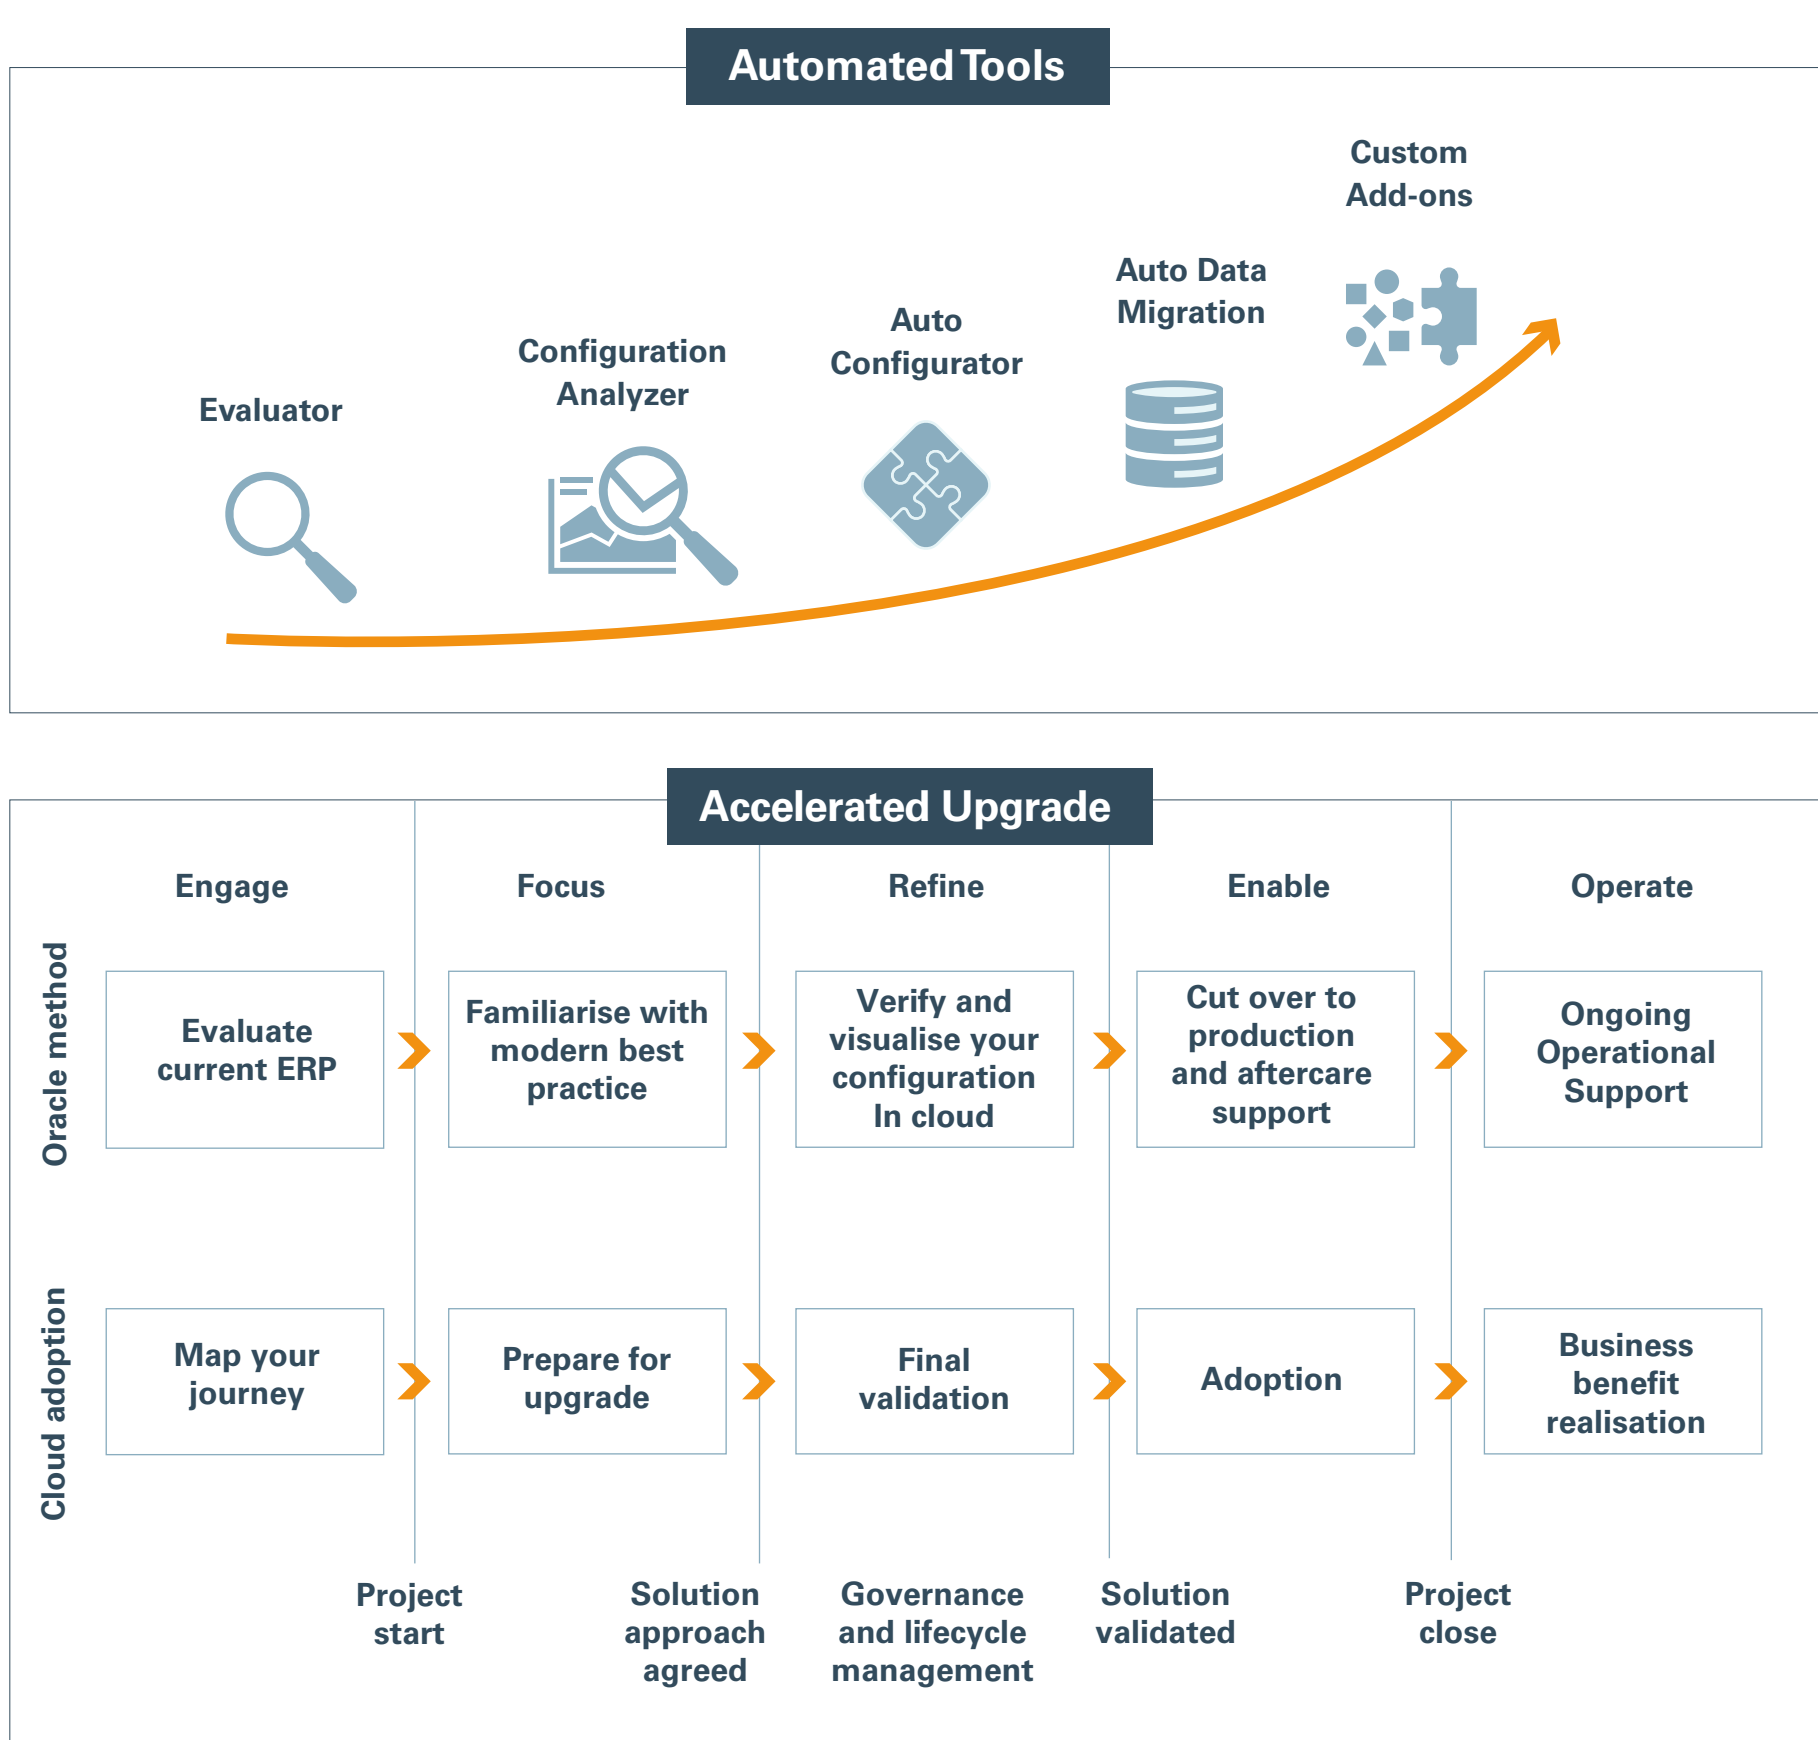

We have invested in **unique accelerators and tools** to transition our customers like you in a **quick and simple way**. We are committed to your success and want you to benefit from the investment you have made with Oracle by moving you to the cloud platform, where you are no longer on the road to long-term obsolescence.

Low Cost 	High Speed 	Guaranteed Results 
<p>Optimized cost based on a unique know-how of the initial solution and the target solution.</p> <p>A conversion toolkit to reduce human workload and automates what can be.</p>	<p>Unique accelerators and upgrade processes to simplify and ensure a smooth and efficient transition.</p>	<p>Shifts responsibility of success to Oracle through fixed-scope engagements.</p> <p>Payment plan aligned to go live.</p>
Go live in as few as 13 weeks		

### Our Automated Upgrade Proposition

We will reduce the time and cost of cloud migration by up to 30% by using rapid upgrade tools and an accelerated upgrade approach.

The entire process is automated and regulated by Oracle True Cloud Method, Oracle's proprietary approach to support customers throughout their journey to the cloud. The move is also guided by dedicated Oracle concierge services via Oracle Consulting, to ensure rapid, smooth and predictable outcomes aligned with modern industry best practices.

Accelerate your journey to cloud today with Oracle Soar.

- ➔ Optimize Business Operations – Drive process automation at scale
- ➔ Outperform with Business Intelligence – Make better faster decisions
- ➔ Exceed employee expectations – Deliver better business outcomes
