

# Oracle Global Position on EU REACH

---

May 2026, Version 1.0  
Copyright © 2026, Oracle and/or its affiliates

REACH (Regulation (EC) No. 1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union (EU) regulation that became effective in June 2007 with phased implementation into 2018. Oracle supports the objective of REACH to protect human health and the environment from exposure to hazardous chemicals. Oracle is committed to meeting all applicable REACH obligations and providing our customers with information on chemicals present in our products as required by REACH.

One of the main elements of REACH is the registration of certain chemical substances. "Manufacturers" or "Importers" of applicable substances that are produced or imported in the EU in quantities over one ton per year are required to register the substances with the European Chemicals Agency (ECHA). Oracle neither manufactures nor imports chemical substances in quantities of one ton or more per year in the EU. Oracle is not classified under REACH as a Manufacturer or Importer of chemical substances, and therefore is not subject to this registration requirement.

Producers or importers of articles are required to register substances contained in the articles if the substance is present in quantities totaling over one ton per year and is intended to be released under normal or reasonably foreseeable conditions of use. Oracle does not anticipate that the substances contained in its products will be released from the products as defined under REACH Article 7.

Under REACH Article 33 "Duty to communicate information on substances in articles", Oracle is required to inform its customers and/or resellers whether its products supplied in the EU contain more than 0.1% by weight per article of any substance(s) on the Annex XIV Candidate List; i.e., the so-called Substances of Very High Concern (SVHC) list <https://echa.europa.eu/candidate-list-table>. Per that requirement, Oracle provides the following information about these substances:

- a. Substances that may be present at a concentration level above 0.1% by weight of an article in Oracle's products can be found in Appendix I.
- b. Oracle continues to work with our suppliers to refine and improve the information we have about the presence of any SVHC's in our products. Oracle's supplier specifications address the use of hazardous substances by Oracle's suppliers and manufacturers in an effort to minimize the environmental impacts of our products and promote REACH compliance. Oracle is aware of the new additions to the Candidate List of substances, and as these lists are finalized and released, will provide any new or additional information regarding those substances and Oracle's products.
- c. Under the amended EU Waste Framework Directive (Directive (EU) 2018/851), effective January 5 2021, EU manufacturers, importers and distributors are required to report to the European Chemical Agency's SCIP database on SVHC's contained in products placed on the EU market. Oracle is committed to meeting the SCIP reporting requirement. The SVHC information on Oracle products has been reported to the SCIP database which can be accessed on this link <https://echa.europa.eu/scip-database> and will be updated when applicable as new SVHC's are added to the list and/or more information becomes available.

Oracle products are not using any of the Annex XVII restricted substances beyond the level of restriction listed in Annex XVII.

If you have any specific questions or concerns about Oracle's REACH status, please communicate them to your Oracle account executive.

*Effective May 2026*

## Notice

Oracle is committed to minimizing the use of potentially harmful substances in developing, manufacturing and packaging of Oracle products. Oracle endeavors to comply with all applicable laws and regulations restricting the use of potentially harmful substances in the development, manufacturing and packaging of Oracle products, and governing the use, sourcing, recycling and reporting requirements for raw materials. Oracle requires the removal of potentially harmful substances from its products, and maintains records regarding the raw material content of Oracle products, to the extent required by applicable laws or regulations.

The information provided in this document is for planning purposes only, and may be derived from one or more of the following: product information developed at Oracle; general industry information; and information furnished by third parties, including but not limited to manufacturers and component suppliers in Oracle's supply chain. In addition, Oracle may modify product plans at any time, and the laws, rules and regulations governing electronic equipment may vary by jurisdiction. As a result, the information provided in this document is not intended to be, and does not constitute, a representation or warranty of any kind, nor is it intended to modify in any way, nor does it constitute a modification of, the terms and conditions of any agreement between Oracle and your company, or the rights of either party arising therefrom.

## Appendix I

| Substance Name                                                                                                                                  | CAS Number              |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 1,2-Benzenedicarboxylic acid, di-C6-8-branched alkyl esters, C7-rich (DIHP)                                                                     | 71888-89-6              |
| 1,2-Benzenedicarboxylic acid, di-C7-11-branched and linear alkyl esters (DHNUP)                                                                 | 68515-42-4              |
| 1,2-dimethoxyethane; ethylene glycol dimethyl ether (EGDME)                                                                                     | 110-71-4                |
| 1,3,5-Triazine-2,4,6-triamine                                                                                                                   | 108-78-1                |
| 1,3,5-triglycidyl-s-triazinetrione                                                                                                              | 2451-62-9               |
| 1,3,5-tris[(2S and 2R)-2,3-epoxypropyl]-1,3,5-triazine-2,4,6-(1H,3H,5H)-trione (ß-TGIC)                                                         | 59653-74-6              |
| 1-Butanone, 2-(dimethylamino)-2-[(4-methylphenyl)methyl]-1-[4-(4-morpholinyl)phenyl]-                                                           | 119344-86-4             |
| 2-(2H-Benzotriazol-2-yl)-4,6-bis(1,1-dimethylpropyl)phenol                                                                                      | 25973-55-1              |
| 2-Benzyl-2-(dimethylamino)-4'-mopholinobutyrophenone                                                                                            | 119313-12-1             |
| 2-methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one                                                                                        | 71868-10-5              |
| 2-Methylimidazole                                                                                                                               | 693-98-1                |
| 4,4'-Methylenedianiline                                                                                                                         | 101-77-9                |
| 4-Nonylphenol (4-NP) branched and linear (covering all isomers and UVCBs)                                                                       | 84852-15-3; 104-40-5    |
| 4-Tert-butylphenol                                                                                                                              | 98-54-4                 |
| 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol                                                                                                    | 119-47-1                |
| Alkanes, C14-17, chloro, medium chain chlorinated paraffin (MCCP)                                                                               | 85535-85-9              |
| Benzene-1,2,4-tricarboxylic acid 1,2 anhydride [trimellitic anhydride; TMA]                                                                     | 552-30-7                |
| Bis(2-ethylhexyl) tetrabromophthalate                                                                                                           | 26040-51-7              |
