

Increase Effectiveness of Construction Payment Management

Improved Control

- Visibility into billing, payment, and compliance status
- Standardised, builder-selected documents
- Single database for all project users and data

Increased Efficiency

- Fewer payment delays, stronger working relationships
- Expedited owner claim documents
- Creation of correct and consistent documents

Risk Reduction

- Current legal document status
- Payment holds tied to compliance status
- Automatically served payment schedules

Oracle Textura Payment Management is a web-based collaboration solution that automates and streamlines construction payment management processes. This enables head contractors to improve outcomes for all project stakeholders in core payment process areas: variation management, claim approvals, compliance management, and disbursement.

Owner/developers will derive numerous benefits from their head contractors' use of Oracle Textura Payment Management, including better control, improved efficiency, and reduced risk.
