Oracle Textura Payment Management and Integration with ERP Systems

Efficiency
- Cloud technology eliminates manual steps and paper
- Integration with ERP systems
- Dollar and time savings

Automation
- Workflows and notifications
- Automated subcontractor statement collection
- Compliance tracking

Collaboration
- One database for all users
- Anytime, anywhere online access
- Real-time information

Risk Reduction
- Better visibility into activities
- Sub-tier management
- Payment holds tied to compliance

Oracle Textura Payment Management is a web-based solution that automates and streamlines construction payment management processes. This enables online collaboration on core payment process areas: variation tracking, progress claim management, compliance management, and disbursement.

Oracle Textura Payment Management boosts efficiency by eliminating manual, paper-based processes and mitigates risk through improved visibility into project activities.

Our team provides unlimited training and support for all users, from owners through to subcontractors.
Oracle Textura Payment Management integrates with most major accounting systems to ensure a seamless flow of data across your key financial systems, optimising payment processes. The integration automates data exchange and eliminates the manual import/export of information between systems for contracts, variations, compliance status, progress claims, payments, and related documents.

Features include:
• Two-way automation of data transfers
• Configurable timing and frequency of import/export jobs
• Searchable audit screens for ready access of historical information
