The Path To Effective Modernization
Executive Overview

Oracle Consulting Services
September 2021
Looking from View of the Customer

Everyone wants this.

- Improved Agility And Speed To Maintain Competitive Edge
- Flexible Deployment Models
- Reduced Costs And Risks
- Dynamic Scaling To Fit Your Business Growth

But what inhibits getting there?

- Where’s my data?
  - Is that data right?
  - System is old and slow
  - No budget
  - No buy-in from Mgt
  - Analytics? What analytics?
  - Software needs upgrade

- Lack skillsets and resources
- How do I hire and keep people with these skills?
- No automation
- How am I supposed to innovate when just keeping the lights on is a full-time effort?
Oracle Services addresses Modernization across both IT and Business Processes

Application and Data Modernization that's Platform Agnostic

Business Process Modernization Lifecycle

Security Driven Throughout: MSA/MAA | Database Shield | IAM | DR | Blockchain | Cloud Security
Best Practices and Getting Started

Modernizing Current Processes and Technologies

The Value of Modernization

- Central to all business environment changes.
- Delivers Agility, Scalability, Flexibility and Security.
- Allows focus on your core competencies to remove overhead and extraneous infrastructure.
- Reinforces competitiveness through attracting a dynamic and capable workforce.

Think BIG with the End in Mind

- Remove silos. Think big picture desired outcomes.
- Understand first your entire current state architecture. Build to your modernized future state.
- Apply modernization business processes and technologies to initial key areas aligning to your desired outcome and strategic expansion.

Getting Started

A strategic approach to modernization in collaboration with you and your team that includes:

- Current state architecture buildout
- Modernization best practices
- Future state modernization architecture roadmap
