

Reinventa-Tech

Call for participants for the Oracle training program for Women in Spain

Please note this is not a job offer nor an internship: This is a call for applicants to the social initiative “Reinventa-Tech” in Spain, offered to unemployed women looking to upskill themselves with Oracle technologies. The trainings and certifications are subsidized by Oracle Women’s Leadership. They will have no economic cost for those selected.

We are offering 4 FREE training paths as:

Data Analyst/Data Science

Oracle Business Analytics Platform empowers employees with relevant, actionable insights from data across applications, data warehouses, and data lakes. Integration Cloud Services training will help you become a Business Analytics Expert by learning how to apply statistical knowledge and techniques to business contexts, guide you to become a Cloud Analytics Administrator by teaching you how to provision and administer Analytics Cloud and help you become a Data Scientist by building skills to analyze and interpret the big data. Certification exam is included in this learning path.

Java Development

Learn how to efficiently develop and deploy exciting applications and services, using Java SE, Java EE, and Java embedded technologies. Java Training will introduce you to the Java programming language and technology to create secure, portable, high-performance applications, learn how to build scalable business services that feed dynamic web and mobile applications using Java EE, show you how to develop highly functional, reliable, portable, and secure solutions for small to large embedded devices. Certification exams are included in this learning path.

Digital Marketing

Oracle’s CX Marketing helps businesses personalize every customer experience to increase engagement, advocacy, and revenue using a complete, data-driven marketing solution. **Oracle CX Marketing** training will explain modern marketing best practices and explore how to apply them in the real world using CX Marketing application, demonstrate how best to utilize data, analytics, and automation to create meaningful customer experiences that provide a return on investment, provide a growing repository of training on all CX Marketing applications. Certification exam is included in this learning path.

Database and Cloud operator

The current version of Oracle Database is the result of over 35 years of innovative development. Today’s Oracle Database offers more cost and performance management features than ever before, whether you run it in your data center on your hardware, run it Cloud at Customer, or run it in the Oracle Public Cloud. Oracle Database Training will teach you the skills you need to install, configure, design and troubleshoot database systems. Oracle’s Autonomous Database is transforming data management and administration. Enabling your business transition to Autonomous Database is critical to your success. Our training options, which are designed for administrators, developers, and business analysts, interested in learning about the world’s first Autonomous Database. Oracle Database Certifications are included in this learning path and are the top certifications in the industry, offering options that meet you where you are in your Database career.

Common Requisites

- University Degree
- Minimum 5 years of previous work experience
- Current unemployed
- High level of English (trainings are in English)
- Soft skills:
 - Adaptability to change
 - Problem solving
 - Customer Focus
 - Positive aptitude
 - Manifest strong desire to have job development
- **And the most important:**
be able to commit to invest the necessary time and effort in the training program.

What would that commitment be like

The trainings are programmed to be complete in 3 months with a dedication of 3/4 hours a day. Trainings are online and flexible and you can learn at your own pace but we will expect you to complete this at maximum 6 months. All trainings are online. You will need to pass an exam at the end of the training and once completed you will receive a certification.

These trainings are for beginners level and you do not need to have previous knowledge but to make the most of this particular one.
