PCI Expansion Unit

The PCI Expansion Unit—an I/O expansion option for Oracle’s Fujitsu SPARC M12 and Fujitsu M10 family of servers—meets demands for applications requiring extensive scalability, mission-critical levels of availability, and seamless data center integration. The PCI Expansion Unit takes maximum advantage of the high I/O bandwidth of Fujitsu SPARC M12 and Fujitsu M10 servers.

**PRODUCT OVERVIEW**

Perfectly suited for Fujitsu SPARC servers, the PCI Expansion Unit offers significant I/O adapter expandability. One or more PCI Expansion Units can be connected to both Fujitsu SPARC M12 and Fujitsu M10 servers, providing connectivity of up to 11 additional PCI Express (PCIe) slots per PCI Expansion Unit in a space-saving rackmount chassis (2U). PCIe generation 3 is supported by the PCI Expansion Unit.

**Easy Monitoring and Control from Fujitsu SPARC Servers**

The PCI Expansion Unit can be easily monitored and controlled in conjunction with the XSCF (eXtended System Control Facility) system monitoring function of Fujitsu SPARC servers. PCI Expansion Units power on and off in synchronization with the power status of Fujitsu SPARC servers.

**High Reliability, Availability, and Serviceability**

PCI Expansion Unit power supplies are configured with 1 + 1 redundancy and support dual power feed. Fans are configured with 2 + 1 redundancy. All PCIe cards, power supplies, and fans support hot swapping.

**Key Features**

- Supports the Fujitsu SPARC M12 and Fujitsu M10 family of servers
- Provides 11 PCIe 3.0 slots in a small 2U form factor
- Powers on and off in synchronization with the power status of Fujitsu SPARC M12 and Fujitsu M10 servers
- Enables hot swapping of PCIe cards, power supplies, and fans
- Monitored and controlled from the XSCF System Monitoring Function of the Fujitsu SPARC M12 and Fujitsu M10 servers
- Configured with 1 + 1 power supply redundancy and supports a dual power feed configuration
# PCI Expansion Unit Specifications

## Key Features

- PCIe 3.0 (8 lanes): 11 slots
- Redundant components: Power supply units (dual power feed supported) and fans
- Hot-swappable components: Power supply units, PCIe cards, link card in the server (except for in Fujitsu SPARC M12-1), and fans

## Power Supplies

- Two hot-swappable AC redundant (1 + 1) power supplies
- Voltage 100 to 120 VAC, 200 to 240 VAC, frequency 50/60 Hz
- Maximum operating input current at 100/200 VAC: 2.9/1.4 A
- Maximum operating input power at 100/200 VAC: 279/270 W

## Environment

- **Operating temperature:** 5°C to 35°C (41°F to 95°F)
- **Nonoperating temperature:** -25°C to 60°C (-13°F to 140°F) (packed) / 0 to 50°C (32°F to 122°F) (nonpacked)
- **Operating relative humidity:** 20% to 80% relative humidity, noncondensing
- **Nonoperating relative humidity:** 8 to 80% relative humidity, noncondensing

## Regulations (Meets or Exceeds the Following Requirements)

### Safety:

- UL/CSA 60950-1, UL/CSA 62368-1, EN 60950-1, EN 62368-1, IEC 60950-1 CB scheme with all country differences, IEC 62368-1 CB scheme with all country differences

### EMC:

- Emissions: FCC 47 CFR 15, ICES-003, EN 55032, KN32, VCCI V3, EN 61000-3-2, EN 61000-3-3, JIS C 61000-3-2
- Immunity: EN 55024, KN35

### Certifications:

- North America Safety (NRTL), European Union (EU), International CB Scheme, RCM (Australia), KCC (Korea), VCCI (Japan), EAC (Eurasian CU)

### European Union Directives:

All standards and certifications referenced are to the latest official version. For additional detail, please contact your sales representative.

Other country regulations/certifications may apply.

WARRANTY

The PCI Expansion Unit comes with a one-year warranty. Visit oracle.com/us/support/policies/ for more information about Oracle's hardware warranty.

COMPLETE SUPPORT

With Oracle Premier Support, you will get the services you need to maximize the return on your investment in the PCI Expansion Unit. Complete system support includes 24/7 hardware service, expert technical support, proactive tools, and updates to Oracle Solaris, Oracle VM, and integrated software (such as firmware)—all for a single price.
