Forward-thinking leadership

How do we stand before a transforming world and be of greatest service? How might we help people see data in new ways, discover insights, and unlock endless possibilities? These are the questions that drive us, that shape our mission—and our service takes many forms.

Technologically, we’re solving some of the world’s most challenging problems here at Oracle. We’re building a new generation of modern, secure healthcare information systems that will help healthcare providers lower costs, improve patient outcomes, and drive community health efforts that result in new treatments and better public health policy. We’re helping countries in Africa manage large-scale vaccination programs in the cloud, contain major diseases, and save lives. Worldwide, our technology is enabling organizations large and small, across industries, to operate sustainably and develop solutions to tackle climate change.

Philanthropically, we’re investing in social impact organizations whose work is critical to solving the challenges facing society today and tomorrow. Organizations funded by Oracle Giving are achieving transformational change in areas ranging from food security to educational equity to environmental conservation. In fiscal year 2022, we gave more than US$20 million to nonprofit and nongovernmental organizations around the world that are as rigorous and effective as they are caring.

We’re swift to act in times of crisis. In response to the war in Ukraine, we gave US$1 million to World Central Kitchen, International Medical Corps, the United Nations Children’s Fund (UNICEF), and the UN Refugee Agency (UNHCR). We then matched donations from Oracle employees to help people affected by the war, together contributing another US$1.6 million. We also donated technology and consulting services to UNHCR and the Norwegian Refugee Council, streamlining their operations and enabling them to focus on the humanitarian crisis on the ground.

We’re volunteering our time and talents. We began fiscal year 2022 with a 24-hour celebration of the Oracle Volunteering program’s 30th anniversary. Every year, Oracle Volunteers support students and educators, protect nature, and strengthen communities by helping people in need. They know that social change takes inspired action, sweat, and skill. More and more, we’re inviting nonprofit partners to bring us their problems and then matching them with teams of Oracle Volunteers who use their business and technical skills to design solutions that accelerate positive change.

We’re committed to education and have been for more than three decades. Beyond our contributions to the field through Oracle Giving and Volunteering, we run our own initiatives. Oracle Academy, which provides educational institutions with free access to a variety of curricula and technologies, including Oracle Cloud, expanded its offerings in fiscal year 2022 and received wide recognition for its impact. Oracle Education Foundation introduced a new curriculum combining design thinking with futures thinking, plus coding and physical computing, preparing young people to design and build what’s needed next. Both of our programs give special attention to young women, girls, and other historically marginalized student populations because the playing field isn’t going to level itself.
Culturally, we’re supporting diversity and inclusion, teamwork, continuous learning, and the overall well-being of our employees. These efforts earned us awards from the Great Place to Work Institute as well as a 100 percent rating on the Human Rights Campaign Foundation’s Corporate Equality Index for the 16th consecutive year.

Environmentally, we’re doubling down on our commitment to protect and restore the earth. Our ambitious sustainability goals include a commitment to power all operations, including Oracle Cloud, with 100 percent renewable energy by 2025. Further, we’re committed to cutting emissions in half across our operations and supply chain by 2030 and to achieving net-zero emissions by 2050. Worldwide, we’re embedding sustainability across our enterprise and delivering innovative cloud technology to accelerate meaningful change for our customers and our planet.

Throughout this report, we demonstrate Oracle’s commitment to being at the forefront of environmental and social impact. We know that to tackle the world’s most important problems our technology, philanthropy, sustainability, and culture all need to be in alignment and our workforce needs to reflect the diversity of the communities we live in, work in, and serve. Everyone here is on a mission to serve a transforming world and to help our customers do amazing things. We hope you’ll share this information with others, and if you’d like to share your feedback with us, please write to us at impact_ww@oracle.com.

Safra Catz,
Chief Executive Officer
Building a vibrant future through education

Our education initiatives—Oracle Academy and Oracle Education Foundation—are helping students develop the skills they need to become technology innovators and leaders. These programs are helping young people not only to prepare for the future but also to play an active role in shaping it.

Awards and recognition

Each year, Oracle is recognized in the areas of corporate social responsibility, workforce and employee recognition, sustainability, and education. View the full list of awards below.
Corporate social responsibility

- Included on CDP's Supplier Engagement Leaderboard in 2022
- Named a winner for SEAL Business Sustainability Awards in 2022 for the Sustainable Product category
- Received the Ukraine Peace Prize in 2022
- Included on JUST Capital’s America’s Most Just Companies in 2023
- Received a gold medal in the 2022 EcoVadis CSR Assessment, putting us in the top 5% of responding companies for supplier sustainability
- Ranked #14 on the Silicon Valley Business Journal’s list of largest corporate philanthropists in Silicon Valley in 2022
- Included on the San Francisco Business Times’ list of Top 100 Bay Area Corporate Philanthropists in 2022
- Received a Corporate Partner Award by the National Foundation for Ectodermal Dysplasias in 2022

Oracle Academy

- Received the Technology Education Leader of the Year Award from the Nigeria Education Conference and Awards in 2022
- Received the Edtech Development Private Organization of the Year Award at the Edtech Summit in 2022
- Received the Outstanding Impact Award in the Education and Technology category at the African Summit on Entrepreneurship and Innovation in 2022
- In Greece, received national awards in these categories in 2022: Gold Cloud Computing Awards - PaaS Excellence; Gold Hellenic Responsible Business Awards - Investment Model and Quality Education. Silver Education Leaders Awards - Digital Education and Distance/Hybrid Learning; and Silver Education Leaders Awards - Distance Learning and/or Hybrid Education
Workforce

- Included on Newsweek’s America’s Greatest Workplaces for Job Starters in 2023
- Included on Newsweek’s America’s Greatest Workplaces for LGBTQ+ in 2023
- Included on Newsweek’s America’s Greatest Workplaces for Women in 2023
- Included on Newsweek’s America’s Greatest Workplaces for Diversity in 2023
- Included on Forbes’ America’s Best Large Employers list in 2023
- Included on Forbes’ America’s Best Employers for Diversity list in 2023
- Included on Forbes’ Canada’s Best Employers list in 2023
- Included on Forbes’ World’s Best Employers list in 2022
- Included on Forbes’ Canada’s Best Employers for Diversity list in 2022
- Included on Forbes’ America’s Best Employers for Veterans in 2022
- Included on Forbes’ World’s Top Female-Friendly Companies in 2022
- Included on Forbes’ Best Employers for Women in 2022
- Included on Forbes’ America’s Best Employers For New Graduates in 2022
- Included on Forbes’ Mexico’s Best Employers 2022
- Ranked #27 overall and #4 in the technology sector on the American Opportunity Index in 2022
- Ranked on LinkedIn’s Top Companies list in the Australia, Brazil, Italy, Spain, United Arab Emirates and the United States in 2023
- Ranked #8 on LinkedIn’s Top Companies Technology & Information list in 2022
- Received a 100 percent rating on the Human Rights Campaign’s 2022 Corporate Equality Index for the 15th consecutive year
- Received a 100 percent rating on the Disability:IN Disability Equality Index of 2022 Best Places to Work
- Named on Universum’s list as an Attractive Employer in 34 countries in 2022
- Top 10 World’s Most Attractive Employers Universum IT Student Rankings, 2022
- Ranked #37 on HR Asia’s Best Companies to Work for in Asia 2022—Singapore
- Named to The Straits Times “Singapore’s Best Employers 2023
- Ranked #17 on the Great Place to Work Institute’s Best Workplaces in Latin America in 2022
- Named to the list of Greater Toronto’s Top Employers by Mediacorp Canada in 2022
- Ranked #48 on RateMyPlacement UK’s Best 100 Student Employers List in 2022–2023
- Included on Woman Engineer Magazine’s Top 50 Employers list in 2022
- Named to Top Supporters of HBCU Engineering Schools List in 2023
- Received a 5-Star Employer rating from the VETS Indexes Employer Awards in 2023
- Included on the Women’s Choice Awards’ Best Companies To Work For Lists in three categories in 2022: Women, Diversity and Millennials
- Recognized as a Premier Women in Sales Employer by the Institute for Excellence in Sales, 2023

*As of September 2022*
“We are on a big journey. This is an amazing time to be part of Oracle, and I want everyone to be involved and feel a sense of belonging. Diversity and inclusion is not only a personal mission of mine, but it is a business imperative.”

Safra Catz, CEO, Oracle

Connected through communities

At Oracle, we don't just value differences, we celebrate them. We know that to tackle the world's most important problems, our workforce needs to reflect the diversity of the people who use our technology. Our strength comes from our employees' diverse backgrounds, experiences, and passion to help our customers do amazing things. Our nine diversity and inclusion employee resource groups and 60 affinity groups help us support a culture of pride, connection, and allyship.

Employee well-being

The health and safety of our employees and their families is a top priority. Oracle’s benefits programs and resources support physical, emotional, mental, and financial health. Our flexible work environment fosters collaboration, innovation, and inclusion, regardless of where people work. And, when an unexpected crisis occurs, our teams are there to offer assistance. We continue to take every possible action to help employees and their families affected by the war in Ukraine, including financial assistance, evacuations, accommodations, travel services, relocation, and more.

## Training and awareness

To help employees understand and uphold Oracle's Code of Ethics and Business Conduct, Oracle provides training courses that include, but are not limited to, the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Anticorruption and Foreign Corrupt Practices Act</strong></td>
<td>Trains employees to conduct business ethically and in accordance with applicable anticorruption laws and Oracle policy.</td>
</tr>
<tr>
<td><strong>Antitrust</strong></td>
<td>Provides an overview of laws regarding illegal anticompetitive agreements and similar prohibited conduct, as well as guidance on how to interact with partners to avoid competition concerns.</td>
</tr>
<tr>
<td><strong>Conflicts of Interest</strong></td>
<td>Helps employees to identify and deal with situations that may give rise to potential conflicts or the appearance of conflicts of interest.</td>
</tr>
<tr>
<td><strong>Employee Health and Safety</strong></td>
<td>Trains employees to identify and understand workplace hazards and to comply with all applicable health and safety laws, regulations, and any additional requirements.</td>
</tr>
<tr>
<td><strong>Ethics and Business Conduct</strong></td>
<td>Trains employees to apply Oracle's Code of Ethics and Business Conduct in their daily work.</td>
</tr>
<tr>
<td><strong>Information Protection Awareness</strong></td>
<td>Teaches employees how to protect information at Oracle and how to apply Oracle's security and privacy policies and practices to their jobs.</td>
</tr>
<tr>
<td><strong>Insider Trading</strong></td>
<td>Trains employees to fully comply with the applicable insider trading and securities laws that govern transactions in the securities of Oracle and other companies.</td>
</tr>
<tr>
<td><strong>Sexual Harassment Awareness</strong></td>
<td>Teaches employees to recognize and report actions that may constitute sexual harassment.</td>
</tr>
<tr>
<td><strong>Software Security Assurance</strong></td>
<td>Explains to employees the processes to be followed during product development and describes how to handle security vulnerabilities.</td>
</tr>

Ukraine Peace Prize
Oracle proudly received the Ukraine Peace Prize from President Volodymyr Zelenskyy, given on behalf of the Ukrainian people, that expressed their gratitude for the support the company and our employees have provided during this pivotal time in Ukraine's history.

Supporting the people of Ukraine
Through our philanthropy, we’re supporting organizations working on the ground to help the people of Ukraine. Oracle donated US$1 million to four relief organizations: the UN Refugee Agency (UNHCR), the United Nations Children's Fund (UNICEF), International Medical Corps, and World Central Kitchen, all of which are helping to relieve suffering and save lives by providing emergency medical services, food, and shelter to those in need. Oracle employees worldwide gave generously too, and with Oracle’s 1-to-1 match, we raised another US$1 million to support these organizations.
Aiding affected employees

From the beginning of the war in Ukraine, Oracle provided affected employees with financial assistance, evacuation and relocation support, accommodations both within and outside of Ukraine, travel services, and around-the-clock emergency support. Beyond this, employees around the world donated to Oracle Cares, our employee assistance fund that supports colleagues in need. In fiscal year 2022, our colleagues donated more than US$293,000.

Using Oracle technology for good

Furthering our support for the people of Ukraine, we’ve deployed our technology to make an impact where the need is greatest. We provided technology and pro bono consulting to the Norwegian Refugee Council and UNHCR to help them implement cloud-based solutions, enabling both organizations to streamline their operations and focus on the growing refugee crisis on the ground. We also offered our technology and cybersecurity capabilities to the government of Ukraine at no cost and suspended all billing to our Ukrainian customers to help ensure their continued access to our products and services.
Employees making a difference

Our employees have been taking action to support the Ukrainian cause from the very beginning of the conflict. Oracle Volunteers across Europe, including Germany, Poland, and Romania, have helped colleagues find shelter in neighboring countries, assisted with evacuations, and donated food, clothing, water, and learning materials for children and families in need. Employees continue to volunteer and organize efforts to assist the people of Ukraine.
Our education initiatives—Oracle Academy and Oracle Education Foundation—are helping students develop the skills they need to become technology innovators and leaders. These programs are helping young people not only to prepare for the future but also to play an active role in shaping it.
Oracle Academy

Oracle Academy works with educators around the world to help them prepare students for successful technology careers with knowledge, hands-on practice, and career-relevant skills. The program offers free teaching and learning resources to advance technology education, skills, innovation, and diversity and inclusion.

Learn more about Oracle Academy
Design Tech High School

Oracle's Silicon Valley, California, campus is home to a pioneering public charter school—Design Tech High School (d.tech). While d.tech is autonomous, it's supported by Oracle Volunteers and Oracle Real Estate and Facilities year-round. The school and the company operate harmoniously.

Get to know Design Tech High School

Oracle Education Foundation

Oracle Education Foundation is a nonprofit organization funded by Oracle and staffed by Oracle employees. Its mission is to help young people develop the technical acumen and creative confidence to design outstanding solutions to people's needs and the world's problems.

Explore Oracle Education Foundation
The Ponelopele Oracle Secondary School in Johannesburg, South Africa, was established in 2006 under a public–private partnership between Oracle Corporation South Africa and the Gauteng Department of Education. More than 1,200 students attend annually. In 2021, Ponelopele achieved the second-highest matriculation pass rate in the country—a testament to the school’s success, even amid a pandemic.

Promoting Java education

Java is everywhere—it's used by the top 95% of all employers globally to build mission-critical systems. Through our education programs and philanthropy, we're advancing Java education for learners of all ages worldwide.

Explore how Oracle Giving advances Java education

New curriculum offers students core cloud skills

In fiscal year 2022, Oracle Academy expanded its offering of free technology resources to include
- A new Oracle Cloud Infrastructure curriculum and free cloud access for educators and learners, providing an introduction to core concepts and hands-on practice
- A career center, which helps learners connect curricula with career opportunities
- A member hub for easy online access to all resources

Oracle Academy works with educators around the world to help them prepare students for successful technology careers with knowledge, hands-on practice, and career-relevant skills. The program offers academic institutions and their educators free teaching and learning resources—including curricula, cloud technology, software, and professional development opportunities—to advance technology education, skills, innovation, and diversity and inclusion.
“When the pandemic halted classroom work in 2020, my students had already spent one year working with Oracle tools in the cloud. That was critical to their success in transitioning to virtual learning.”

**Soraya Abad-Mota**, Computer Science Lecturer, University of New Mexico

---

**Preparing students for careers in accounting with Oracle NetSuite**

Oracle Academy’s free resources help keep the curriculum relevant, practical, and accessible. Through her membership with Oracle Academy, Christy Nielson, assistant professor at the University of Mississippi’s Patterson School of Accountancy, uses Oracle NetSuite business management software to provide her students with hands-on learning in accounting workflows. She says, “The NetSuite system is cloud-based, which means my students can access it and complete their assignments from anywhere so long as they have internet access.”

*Read Christy’s story*
Enabling agile data management with Oracle Cloud and Oracle APEX

With free access to Oracle Cloud and Oracle APEX, Oracle Academy member educators and students can shift data to any environment swiftly, enabling learning on the go. This is a key benefit for educator Michal Kvet, associate professor at the University of Žilina, Slovakia. “Today, students need to know the importance of creating a skeleton solution based on self-adjusting technology,” he says. “That’s the Oracle Autonomous Database.”

Read Michal’s story

Empowering educators with free and flexible professional development

With Oracle Academy, learning never ends. Member educators such as Catalina Barbeyto, professor at Universidad Tecnológica de Nezahualcóyotl, Mexico, have access to a variety of professional development opportunities to grow their technical knowledge and skills. “Oracle Academy has played a key role in my academic and teaching journey,” says Catalina. “I believe it’s the best place to learn about databases, SQL, PL/SQL, virtual machines, artificial intelligence with machine learning, Java, and more.”

Read Catalina’s story
Bridging theory and practice with Oracle Primavera

For higher education institutions teaching construction and civil engineering, access to tools such as Oracle Primavera through Oracle Academy is invaluable. With Oracle Primavera, students build industry-specific skills in planning, budgeting, resourcing, scheduling, and program management. Okechukwu Nwadigo, project management lecturer at Auckland University of Technology in New Zealand, shares, “We are lucky to have Primavera for free classroom use through Oracle Academy. Primavera P6 is considered a highly relevant skill in the industry today and is great for students to have on their resumes.”

Read Okechukwu’s story

Awards

Oracle Academy receives numerous awards each year highlighting its commitment to education, innovation, technology, and scholarship globally.

View the full list on the Awards page
Oracle Education Foundation

Oracle Education Foundation is a nonprofit organization funded by Oracle and staffed by Oracle employees. Its mission is to help young people develop the technical acumen and creative confidence to design outstanding solutions to people’s needs and the world’s problems.

Impact at a glance

83% of students feel more comfortable with technology in FY21–22

80% of students feel more confident applying design thinking skills in FY21–22

23,325+ volunteer hours contributed to date
What we do

Oracle Education Foundation provides classes at the intersection of coding, physical computing, design thinking, and futures thinking. Each class teaches a technology, then asks students to apply that tech to a design challenge and create prototype solutions. Foundation educators lead classes, and Oracle Volunteers coach students. We engage students aged 14 to 18 through partner schools and nonprofits.

Design thinking, meet futures thinking

Designing the future can feel daunting. Even now, new tech and new environments are testing us in new ways. Young people need the creative confidence and ethical clarity to design and build a vibrant future for all. So, with the Institute for the Future's help, we incorporated future skills—such as how to make sense of loopy, complex systems, build a crew, and befriend the machines—into our classes.
The future of learning is hybrid

Pre-pandemic, we provided in-person classes in North America. Throughout the pandemic, we used Zoom, Miro, and other tools to deliver our classes and engage students and volunteers virtually. The upside of lockdown? Oracle Volunteers around the world coached students in six countries across the Americas. As we emerge from the pandemic, we’re keeping the best of both virtual and in-person learning.

Expanding the program throughout the Americas

In fiscal year 2022, the Oracle Education Foundation expanded its program to Latin America in partnership with Junior Achievement Americas. We delivered virtual Game Design classes for JA students in Argentina, Brazil, Chile, Mexico, and Peru. Students created games that address issues faced by local nonprofits and nongovernmental organizations and the communities they serve, including Oracle Giving grantee PROA Institute.
“As a volunteer with the Oracle Education Foundation, it’s rewarding to journey with the students as they learn new concepts, apply design thinking, and persevere through any setbacks to reach their final presentation.”

Pamela Luis, Manager, Software Development, Oracle
Student prototype spotlight

Game Design: Develop future skills

Students design and build a game based on a future scenario that helps them break out of habitual thinking and imagine new possibilities. As they take their game from idea to prototype, students learn coding concepts in Phaser, an HTML5 game development framework. No first-person shooter or fighting games here—students in our classes design games that teach, inspire empathy, and build resilience.

Neural Networks: Befriend the machines

Students learn how to use neural networks to build their own image classifier. They first learn how to train a network and then use that knowledge to create an image classifier that helps solve a real-world problem. In this context, students grapple with ethical questions about how we do and do not want to use AI, now and in the future.
Web Design: Make yourself known

Being able to build a personal brand and present your best self through a portfolio is an essential skill today. In this class, students design and code a website from scratch, curating their brand and accomplishments. They also learn core future skills such as how to protect and derive value from their personal data, manage their reputation, and communicate their brand via multiple media.

Oracle Education Foundation 3D Design Class for Girls

All Jacked Up—A Student 3D Project Presented by Oracle Education Foundation

Conservation Tech with Oracle Education Foundation and National Geographic
“Every day at d.tech, students play an active role in shaping the world. Our partnership with Oracle provides access to incredible resources, the best of which are Oracle employees, who generously volunteer their time and talents to provide d.tech students with real-world learning experiences.”

Ken Montgomery, Cofounder and Executive Director, Design Tech High School
Continuous adaptation

By design, d.tech was built to respond to the needs of both students and educators. Amid the pandemic, d.tech reopened its campus, offering a flexible schedule that enabled students to focus on their daily academic and extracurricular priorities.

The school’s success wouldn’t have been possible without the d.tech faculty, whose relentless optimism and commitment to their students transformed a moment of crisis into an opportunity for growth and learning.

Students making a difference

A social media alert to help people find COVID-19 vaccine appointments, a tutoring club to help Afghan refugees practice speaking English, an environmental advocacy project showcasing the impact of recycling through a colorful mural—these are just a few of the projects d.tech students are contributing to the world, each one making a positive difference.
Intersession: Learning beyond campus

The Intersession program is a defining d.tech educational experience. Three times a year, for 60 hours each time, students explore new disciplines and industries through classes offered by nonprofits, businesses, and professionals. Students choose from a wide range of classes such as photography, entomology, cooking, and event venue operations. Every Intersession, Oracle Education Foundation offers classes on technologies such as neural networks, web applications, data science, and more.

Oracle Volunteers at d.tech

Oracle Volunteers feel at home at d.tech, donating their time and talents to support students year-round. Last year, Oracle Volunteers developed software to improve scheduling for Intersession classes. The application, called Exploration Station, streamlined the student and faculty experience and enabled the program to continue virtually and in person throughout the pandemic.

Helping our employees increase their impact

We match our employees' charitable donations annually, and in times of crisis we run relief campaigns and increase our match. We also help each other through Oracle Cares, which makes grants to employees experiencing hardship and is funded by voluntary employee contributions matched by Oracle.

Strengthening global healthcare with Oracle technology

From clinical studies to vaccine safety and health record modernization, we’re using our technology and expertise to help protect people against HIV, COVID-19, yellow fever, and more. Working closely with the Tony Blair Institute for Global Change, we’ve donated our cloud-based health management system to several nations in Africa and elsewhere to help streamline vaccination administration programs. This is one of many initiatives we’re undertaking to redefine the future of healthcare globally.

“Leveraging Oracle’s matching gifts program goes a long way in extending the impact of your personal donation. By having Oracle match my donation to Louisville Community Foundation, we were able to buy 140 winter jackets, hats, and pairs of gloves for children, helping to ensure every child has comfort and warmth. Big thanks to Oracle for helping us touch the lives of those in need.”

**Greg Anderson,** Group Vice President, North America Applications Solution Engineering, Oracle
Matching employee donations

We support our employees' philanthropy by matching their personal charitable donations to causes around the world. We matched more than US$5.3 million in employee donations in fiscal year 2022.

Disaster relief

When a disaster occurs, Oracle matches employee relief donations. In fiscal year 2022, we responded to disasters in Afghanistan, Brazil, Haiti, the Philippines, Ukraine, and the United States. Together, we gave more than US$2.3 million in response to the war in Ukraine.
Employees helping employees

Oracle Cares is an employee assistance fund that enables employees to make donations to support colleagues in times of need. In fiscal year 2022, the fund provided 122 hardship grants totaling more than US$268,000 helping employees recover from natural disasters, loss of a loved one, and serious injury or illness, including COVID-19.

“We experienced an apartment fire this year and our family lost everything except the clothes we were wearing. We had to quickly find a new place to live and buy new clothes, necessities, and furniture. We are so thankful to Oracle Cares for taking a little stress away by providing financial assistance during this time.”

Oracle Cares hardship grant recipient

Within Oracle’s creative, solution-oriented culture is a community of employees who strive to make the world a better place. Oracle Volunteers lead and participate in virtual and in-person projects with hundreds of nonprofits and public institutions year-round. They support students and educators, protect nature and wildlife, and strengthen communities by helping people in need. Globally, the pandemic hit volunteering hard—but at the same time, it inspired action and empathy. Today, as its effects ebb, volunteerism is on the rise again.
30 years of Oracle Volunteering

We began the year with a 24-hour celebration in honor of the Oracle Volunteering program's 30th anniversary. More than 2,000 employees on six continents participated in virtual sessions that featured executive kickoffs for each region, volunteering activities, inspirational speakers, festive games, and brainstorming about how to do more good in the world.

Advancing education

Protecting the environment

Strengthening communities
Social impact in action

Skills-based philanthropy

Social change takes time, common cause, inspired action, money, and often sweat. It also takes skill. More and more, we’re inviting our nonprofit and NGO partners to bring us their problems and matching them with teams of Oracle Volunteers who use their business and technical skills—plus our Oracle Cloud Free Tier—to design solutions that help accelerate positive change.

Diversity and inclusion in action

Oracle employees bring their whole selves to work, and many enjoy the affinity of employee resource groups (ERGs). Every year, our ERGs create Oracle Volunteering projects that celebrate belonging and giving back, including Martin Luther King Jr. service week and events for International Women’s Day and Autism Awareness Month, among others.

Read how Oracle Volunteering supports diversity
Building culture through volunteering

Today, Oracle teams are often distributed across regions and time zones. The Oracle Volunteering program brings far-flung teammates together to do good. Camaraderie is a natural byproduct of volunteering with colleagues, whether virtually or in person. Of course, the world benefits too, and when volunteers work together to support the causes they care about, the ripple effect can be profound—for global society and for team culture.

Community building at Oracle

Doing well by doing good

Every full-time Oracle employee may volunteer up to 40 hours a year during their scheduled work time, and many Oracle Volunteers contribute hundreds of hours beyond that. Through Oracle Giving, we match our employees’ charitable donations to causes around the world up to US$1,000 per employee per year—and more in times of crisis. Why? Because ensuring that our people feel empowered to do good is part of our business.

Educational volunteering

Coaching the next generation of entrepreneurs, teaching youth about online safety, preparing tomorrow’s workforce—Oracle Volunteers help students worldwide develop the skills they need to create a vibrant future.

Check out what students are learning below.

“I’m grateful for the opportunity to serve as an Oracle Volunteer and to inspire students in Africa to dream big and pursue technology careers.”

Rufaro Mhuruyengwe, Social Impact Community Leader, South Africa, Oracle
Helping kids learn during the pandemic and beyond

Every year, Oracle Volunteers devote their time and energy to advancing education by helping kids learn to read, code, empathize, and become the problem solvers and creators of tomorrow. As learning environments evolve, Oracle Volunteers are committed to stepping up and lighting up the young hearts and minds that will brighten the future.

Helping young people be future-ready

Now more than ever, young people need the creative confidence, sense of self-efficacy, and skills to build a vibrant future in which they can thrive. That's why the Oracle Education Foundation engages Oracle Volunteers as coaches in multiday classes at the intersection of coding, physical computing, design thinking, and futures thinking. Volunteers donated nearly 8,400 hours in fiscal year 2022.
Empowering the next generation of entrepreneurs

Oracle Volunteers help activate the entrepreneurial potential of youth from underrepresented communities. This includes mentoring girls as they build applications to address issues facing their communities, helping young people design digital games that educate and inform, and equipping students with business and financial skills. Organizations we engage with include Halogen Foundation, Junior Achievement, and Technovation.

Providing youth with online safety resources

With the ever-expanding role of technology in education, keeping students safe online is essential. More than 2,500 students from 10 schools in India took part in the Cyber Bright, Cyber Right project. Oracle Volunteers taught students how to maintain privacy on social media, prevent cyberbullying, and navigate the internet safely. We also engage with organizations including BGS National Public School, Lakshmi Pat Singhania Education Foundation, and Salwan Junior School, among others.
Preparing students for successful careers

Oracle Volunteers lead by example and share their career experience with the next generation. Through career panels, mock interviews, and resume review workshops, Oracle Volunteers guide and inspire young people to pursue careers in technology and beyond. Organizations we engage with include Braven, Code2College, Design Tech High School, and Ponelopoele Oracle Secondary School.

Supporting students with disabilities

Equitable and inclusive learning experiences are essential to meeting the needs of students with disabilities. To promote inclusivity, Oracle Volunteers have facilitated sign language sessions for kids who are deaf or hard of hearing and recorded interactive audiobooks to benefit children with autism. Organizations we support include the Brooklyn Autism Center, Cheshire Disability Trust, Chosen Children Village Foundation, Texas Kids Read, and UNICEF India.
Oracle Volunteering’s rally called There’s No Planet B was a great opportunity to share the eco-friendly actions we take in our day-to-day lives and learn new practices we can implement.

Ronaldo Santos, Technical Account Manager, Oracle Brazil
Banding together for Earth Day

Focus on Environment, our global initiative that runs from March 1 to April 30 annually, coincides with Earth Day by design. In 2022, Earth Day also coincided with National Volunteer Week in the US, and Oracle Volunteers got especially busy. As the world began to reopen, Oracle Volunteers everywhere came together to restore our planet. They cleaned up beaches, planted trees and seedballs, tidied up their digital storage to reduce their carbon footprints, and much more.

Read the story

Rallying for the environment

Across Latin America, Oracle Volunteers participated in a multiweek rally called There's No Planet B. They learned about minimizing food waste while maximizing nutrition, making their own earth-friendly shampoo and cleaners, diverting goods from landfills, and generally walking more lightly on the earth. Organizations we engage with include Bandera Azul Ecológica, Gastromotiva, and Vegetarianos Hoy.
Protecting our oceans and waterways

Every piece of plastic or other litter you pick up is one less piece that ends up in the ocean. Year-round, Oracle Volunteers lead cleanups of their local beaches and fresh waterways, as well as cities, neighborhoods, and parks. Organizations we engage with include Keep Austin Beautiful, Keep Britain Tidy, Keep Massachusetts Beautiful, Ocean Conservancy, and SEGO Initiative.

Restoring local ecosystems

Globally, Oracle Volunteers participate in hands-on ecological restoration efforts to renew and rewild damaged ecosystems. This includes making and planting seedballs, removing invasive, non-native plant species, restoring trails, establishing community gardens, and more. Organizations we engage with include Bhumi, Los Angeles Community Garden Council, SayTrees, and The Trail Foundation.
Diverting waste from landfills

Around the world, solid waste generation rates are rising. This is the opposite of what needs to happen. Oracle Volunteers help tackle the problem by raising awareness and collecting and donating gently used items such as clothes, books, and electronics for reuse. Done responsibly, this can keep enormous amounts of waste from ending up in landfills or incinerators. Organizations we engage with include BRED Diocesano de Guadalajara A.C., Instituto Gerando Falcões, Instituto PROA, and Japan Refashion association.
“I chose to volunteer to support Ukrainian refugees when the war started, hosting refugees at my home and preparing bags of essential supplies for those at the border. I’m proud that Oracle empowers employees to volunteer for causes we believe in to help make the world a safer place.”

**Bogdan Turtoi**, Social Impact Community Leader, Romania, Oracle
Crocheting for impact

October is Breast Cancer Awareness Month, and for weeks in advance, Oracle Volunteers crocheted items that cancer survivors could keep close to their hearts—literally. A group of dedicated fiber artists wove lightweight, customized breast prostheses for women who have undergone mastectomies. These “knockers” followed patterns from Knitted Knockers, a nonprofit that designs patterns and distributes prostheses to breast cancer survivors.

Stepping up for the community in times of crisis

In times of distress and tumult, Oracle Volunteers rise to the occasion. Employees collected and delivered essential supplies to Ukrainian refugees, created welcome cards for newly resettled families from Afghanistan, and designed posters to raise awareness of the challenges faced by survivors of domestic violence. Organizations we engage with include Asociația Magic, the Casa Ioana Association, Jiyan Foundation for Human Rights, and Miry's List.
Fostering connections with our elders

Oracle Volunteers respect and value elders and actively connect with them, and as COVID-19 continued to cause heightened isolation and vulnerability among older people, they redoubled their efforts. In addition to sharing conversation and companionship, volunteers designed handmade greeting cards with uplifting messages. Organizations we engage with include Fundación Amanoz, Maya CARE Foundation, Second Harvest of Silicon Valley, and Seniors First.

Mobilizing for a healthy future

In addition to improving your own well-being, volunteering at athletic events is a powerful way to support the life-saving work of nonprofits advancing medical research and helping people with health conditions. In fiscal year 2022, Oracle Volunteers walked, ran, and pedaled to raise awareness and funds for the American Heart Association, JDRF Northern California Chapter, Pinkathon, San Francisco AIDS Foundation, and many more causes.
Spreading cheer among children in need

Year-round, Oracle Volunteers offer friendship and spread happiness among children in challenging circumstances. They do this by hosting arts and crafts sessions for children with developmental disabilities, leading collection drives for those in need, and delivering a variety of services to children from low-income backgrounds. Organizations we engage with include Divya Downs Development Trust, George Mark Children's House, Learning for All, Mani Trust, and Sarvani.

Oracle Social Impact Datasheet (PDF)
CDP climate change response (PDF)
Corporate Social Responsibility Report—India
At Oracle, we know that ensuring the health of our planet calls for bold and urgent action. We’re committed to building a more sustainable future and empowering our employees to do the same.
A message from Oracle’s CSO

When it comes to sustainability, Oracle is action oriented and outcome driven. We know that ensuring the health of our planet calls for bold and urgent action. To this end, we’ve embedded sustainability throughout our organization and business processes, including our value chain. This means creating a more circular economy and effectively managing climate-related risks companywide. It means empowering our employees to make decisions that put the planet first. It means providing our customers globally with a zero-emissions cloud by 2025. And it means committing to achieving net zero by 2050 and halving our value chain emissions by 2030.

Oracle was founded in 1977 with a goal to organize large amounts of data in a way that allowed for efficient storage and quick retrieval. Decades later, we still recognize the value of using data to solve some of the planet’s most complex problems. Companywide, we rely on data to operationalize sustainability, protect natural resources, reduce waste, and achieve energy efficiency.

While what we do ourselves is of paramount importance, helping our customers on their sustainability journeys has an impact many times greater than our own. I encourage you to read our customer stories and learn more about the technology solutions, such as sustainable computing infrastructure, that are helping them innovate, build sustainable supply chains, and perform environmental, social, and governance (ESG) planning and reporting. Many of our industry solutions, including our Energy and Water solutions, are also playing a critical role in driving the transformation needed to ensure a more sustainable future for our planet.

We believe access to data and technology can help today’s sustainability leaders get better information and make more informed decisions. Together, we can make a difference.

Jon Chorley
Chief Sustainability Officer, Oracle
Learn more about Oracle’s commitment to sustainability, including how we help our customers on their sustainability journeys.

View the full repository of Oracle’s policies, disclosures, and reports.

See our year-over-year progress and detailed sustainability metrics.

2025 sustainability goals

- **100%** renewable energy use for all operations, including Oracle Cloud
- **100%** of key suppliers have an environmental program in place
- **80%** of key suppliers have emissions reduction targets in place
- **33%** reduction in potable water use per square foot
- **33%** reduction in waste to landfill per square foot
- **25%** reduction in employee air travel emissions
Net zero

Oracle has set a target to achieve net-zero emissions by 2050 and to halve the greenhouse gas emissions across our operations and supply chain by 2030, relative to a 2020 baseline. This target has been approved by the Exponential Roadmap Initiative, an accredited partner of the United Nations’ Race to Zero.

For additional details about our goals, view the Social Impact Datasheet (PDF).

Operations

Sustainability is at the heart of how we operate our business. This includes working toward a 100% renewable energy goal, managing our use of natural resources, ensuring responsible supply chain practices, and building a more circular economy.

Read more about our sustainable operations

Employees

At Oracle, sustainability is everyone’s business and our employees are key to helping us operationalize sustainability. We inspire action by celebrating the sustainability champions in our midst, communicating key initiatives, providing learning resources, and offering tools for collaboration.

See our employees in action

Photo credits: All images copyright Oracle.
Targeting 100% renewable energy

55% decrease in emissions intensity per unit of energy since 2015

47% decrease in total emissions since 2020

37% increase in renewable energy use since 2019
Growing our renewable energy footprint

Emissions reduction is a key component of our sustainability strategy. Since 2015, we’ve reduced our carbon footprint on an absolute basis, despite the significant increase in our energy use resulting from the growth of Oracle Cloud.

We remain steadfast in our commitment to achieving 100% renewable energy use across our operations, aligned with the 1.5°C science-based target scenario for scope 1 and scope 2 emissions. We also aim to reduce the environmental impact of the products that we sell.

Visit our CDP response to learn more about our efforts (PDF)
Reducing resource consumption

36
Oracle-owned buildings globally are ENERGY STAR certified

28
Oracle-owned buildings received BOMA certifications

9
Oracle-owned buildings are LEED certified

As a global company, how we manage our use of natural resources can have a huge impact. We're always looking for ways to maximize energy efficiency and minimize water consumption and waste generation across our operations.

**Energy efficiency**
We manage our facilities to the highest industry standards and are proud to have been recognized for our highly efficient, environmentally friendly buildings and operations.

**Water conservation**
We pursue a variety of water-saving strategies across our facilities and data centers—including rainwater harvesting, xeriscape gardening, and condensate reclamation—to reduce our total potable water use.

**Waste management**
We have a robust waste management program that includes recycling and composting at our offices and raising employee awareness about responsible waste management to minimize waste to landfill.
Managing a responsible value chain

93% of Oracle's key direct manufacturers have an environmental program in

79% of Oracle's key direct manufacturers have energy or carbon reduction goals in place

40%+ reduction in logistics-related emissions since 2015

We know that our purchasing decisions can have a significant social and environmental impact. Our Supplier Code of Ethics and Business Conduct requires our suppliers to observe the law and conduct business in an ethical and responsible manner. Our Sustainable Procurement Statement (PDF) affirms our ambition to incorporate sustainability into procurement processes. Purchasing specification requirements, such as ENERGY STAR and EPEAT certification, are in place to ensure the procurement of more sustainable product and service offerings. Siting policies also take into consideration environmental impacts as we look to acquire, design, and build new facilities.

Here are some of the ways we're driving a sustainable value chain.

• Engaging with indirect and direct suppliers to report data on their carbon, water, and waste footprints.
• Working with our key suppliers to ensure alignment and identify new opportunities to reduce our environmental impact.
• Investing in educating our suppliers about our goals and expectations as we transition to a low-carbon economy as part of our net-zero goal.
• Managing, monitoring, and auditing our direct hardware supply chain as part of our membership in the Responsible Business Alliance (RBA). In fiscal year 2021, 20 audits based on the RBA Code of Conduct were completed at direct hardware supplier factory locations to ensure compliance.
• Working closely with our logistics partners to minimize shipments, maximize consolidation, and take sustainability into account when selecting modes of transportation, including lower-emissions options such as bio-liquefied natural gas.
• Collaborating with our travel partners to reduce emissions from flights taken, encourage the use of public transportation, and promote lodging venues that integrate sustainability into their operations.

Read about Oracle's adherence to environmental, health, and safety standards in the ESG Hub
Recycling and reusing hardware

99.9% of electronic waste is reused or recycled

3M+ pounds of retired customer hardware assets are collected for recycling or reuse annually

100% of our technology recycling partners are ISO 14001 certified

Creating a sustainable hardware lifecycle isn't just about sourcing the right materials and getting them where they need to be as efficiently as possible; it's also about removing resource inefficiencies across the lifecycle, reusing and repurposing materials, and keeping assets in use for as long as possible. From packaging to hardware, our Design for the Environment principles focus on recyclability, reuse, disassembly, and efficiency in the manufacturing, distribution, and use of our products.

To ensure the responsible disposal of excess and used products, we provide take back programs free of charge to our customers and suppliers. These programs help protect the environment and provide valuable services to our customers.

Internally, we provide program management for the recycling and reuse of retired office equipment, including personal computers and phones.

Read more about the Oracle Hardware Take Back and Recycling Program
Technology plays a critical role in building a more sustainable future, and—in collaboration with our customers—our employees are the ones making that a reality. Year-round, our employees improve how we all live and work by participating in a variety of activities to drive a more sustainable future. See them in action below.

Employees

At Oracle, sustainability is everyone’s business and our employees are key to helping us operationalize sustainability. We inspire action by celebrating the sustainability champions in our midst, communicating key initiatives, providing learning resources, and offering tools for collaboration.

Technology plays a critical role in building a more sustainable future, and—in collaboration with our customers—our employees are the ones making that a reality. Year-round, our employees improve how we all live and work by participating in a variety of activities to drive a more sustainable future. See them in action below.
Green Teams

Employees who share a passion for the environment band together to form **Green Teams** that lead sustainability efforts in Oracle hubs globally. They make an impact in their local communities by hosting educational sessions, driving energy efficiency, engaging with real estate and facilities teams to promote recycling and eliminate waste, encouraging more sustainable modes of transportation, volunteering with environmental organizations, and more.

Sustainability Champions

Annually, Oracle recognizes a group of **Sustainability Champions**—employees around the world who are leading by example and directly contributing to a more sustainable future. Sustainability Champions include employees who lead environmental volunteering projects, build application capabilities to address environmental needs, engage with suppliers to increase their environmental performance, raise awareness of alternative commuting options, and coordinate sustainability activities with colleagues in their local offices.

[Watch the video](#)
Oracle Volunteering

Protecting the environment is a key focus area of the Oracle Volunteering program. Year-round, Oracle Volunteers contribute tens of thousands of hours to care for the planet, including during Focus on Environment—Oracle's annual global volunteering initiative, which spans the months of March and April.

See Oracle Volunteers in action

Daily actions to protect the planet

Oracle employees enthusiastically participate in Missions, a new initiative that empowers individuals to take positive actions that benefit the planet. Through easy-to-complete activities, employees can track how their daily actions support sustainability. From rethinking food waste to prioritizing water conservation, there are many ways employees can take action to help the planet both at home and at work. Since the program's launch in 2021, over 1,000 employees have completed more than 11,000 activities to help protect the planet.
Education

We empower employees to build their knowledge about the solutions needed for a sustainable future. In addition to learning what Oracle is doing to make an impact, employees engage in training and development opportunities to enhance their skills and support sustainability decisions at scale. By acquiring the skills to innovate and create new technology, our employees can further support our customers in achieving their sustainability goals.

The RBA Code of Conduct is an integral part of Oracle's supplier contract, and our suppliers are assessed on their compliance with RBA on a quarterly basis.
Safeguarding the privacy and security of the data we manage

Protecting our customers' personal information is a top priority for Oracle. We enforce corporate policies and practices designed to protect the personal information in our possession.
Providing a workplace that is diverse, inclusive, and safe

In addition to tracking formal training hours delivered to employees through Oracle University, Oracle provides a variety of career and skills development programs that are not tracked by hours, but rather by number of resources, modules, or assets accessed by employees.

While we do not publicly disclose this data, we provide detailed information about our career development programs and offerings in the Workforce section and on the Oracle Careers website.

**Task Force on Climate-related Financial Disclosures (TCFD) standards**

The international Financial Stability Board created the Task Force on Climate-related Financial Disclosures (TCFD) to improve and increase reporting of climate-related financial information. This TCFD review provides an overview of Oracle's corporate reporting practices in accordance with the TCFD guidelines.

Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term.

Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management.
