

Oracle Business Intelligence Publisher/Oracle Analytics Server Licensing with Oracle Enterprise Manager Cloud Control 13c

March 31, 2021
Copyright © 2021, Oracle and/or its affiliates

PURPOSE STATEMENT

This document provides an overview of Licensing for Oracle Business Intelligence Publisher or Oracle Analytics Server for use with Oracle Enterprise Manager Cloud Control.

DISCLAIMER

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle software license and service agreement, which has been executed and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

This document is for informational purposes only and is intended solely to assist you in planning for the implementation and upgrade of the product features described. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described in this document remains at the sole discretion of Oracle.

Due to the nature of the product architecture, it may not be possible to safely include all features described in this document without risking significant destabilization of the code.

BI Publisher/Oracle Analytics Server Licensing Document for Oracle Enterprise Manager

1.0 INTRODUCTION TO ORACLE ENTERPRISE MANAGER LICENSING

Oracle Enterprise Manager Cloud Control 13c (Enterprise Manager) is Oracle's single, integrated solution for managing all aspects of the Oracle Cloud and the applications running on it. Enterprise Manager couples a potent, top-down monitoring approach to delivering the highest quality of service for applications with a cost-effective automated configuration management, provisioning, and administrative solution. This powerful combination provides unequaled management for any size Oracle data center.

Oracle also offers several options, management packs, management plug-ins, and other products such as Oracle Business Intelligence Publisher (BI Publisher), now re-branded as Oracle Analytics Server (OAS) Reports that enhance the capabilities of Enterprise Manager. This document describes the separately licensed Enterprise Manager Management packs, management plug-ins, and other products you can purchase to enhance the capabilities of Enterprise Manager for BI Publisher/OAS.

1.1 LICENSE AUTHORIZATION REQUIREMENT

Use the options, packs, reports, licensed repository views, or Command Line Interface (CLI) verbs described in this document **only** with the appropriate licenses.

1.2 BI PUBLISHER/OAS LICENSING WITH ENTERPRISE MANAGER

Enterprise Manager includes restricted use of BI Publisher/OAS and Business Intelligence Mobile for use with Enterprise Manager functions and interfaces only. This restricted BI Publisher/OAS license allows reporting only against the Enterprise Manager repository and against data dictionary (including AWR and AWR Warehousing data) of target databases. In order to report against other data sources, it is necessary to have the BI Publisher/OAS license.

Some Enterprise Manager Management packs include BI Publisher/OAS reports that use a different data source. The license to use these reports is provided as part of the license for the relevant management pack. The following table provides information on the Enterprise Manager management packs, the corresponding licensed reports, and how these reports can be accessed. For more information on Licensed Packs and the Views each allow, see: [Oracle® Enterprise Manager Cloud Control Licensing Information User Manual](#)

MANAGEMENT PACK	TYPE OF LICENSING INFORMATION	LICENSING INFORMATION
<p>Database Lifecycle Management Pack for Oracle Database</p>	<p>Licensed Reports</p>	<p>The following reports are part of the Database Lifecycle Management Pack for Oracle Database. Oracle Real User Experience Insight	Restricted-Use License	<ul style="list-style-type: none"> • A restricted use license of BI Publisher/OAS is included to enable you to run reports on the Real User Experience Insight (RUEI) repository and to modify provided layouts.

1.3 LIST OF REPORTS AND MINIMUM LICENSE PACK REQUIRED

The reports listed in this section are covered by more than one license pack, which are needed for every different target and target types. This list uses the information in: [Oracle® Enterprise Manager Cloud Control Licensing Information User Manual](#) , for the list of Views Licensed to each Pack.

To obtain reports on Alerts, Configuration, Metrics and other generic functionality you must have the license for the specific underline target. For example, to use alerts on a Weblogic Server target and to obtain alert-related reports, you must have the Oracle Weblogic Server Management Pack license. You can obtain the Alert History report on database targets if you have the Oracle Diagnostics Pack, however you need the specific Management Pack license to obtain generic functionality reports for other targets such as Weblogic servers, IDM, and so on.
