

September 2020 Release Announcement

Oracle BI Applications 11.1.1.10.3 upgrades to Oracle FMW 12c tech stack and extends Premier support through 2031

Oracle BI Applications

Oracle BI Applications (OBIA) are complete, prebuilt, extensible, role-based analytic solutions that enable organizations to gain insight and greater value from a range of data sources, including Oracle on premise Applications (E-Business Suite, PeopleSoft, JD Edwards and Siebel), Oracle SaaS Applications (HCM Cloud, ERP Cloud, SCM Cloud and CX Cloud) and third-party systems.

Release Highlights

1. New Support for Fusion Middleware (FMW) 12c Stack

Customers can now deploy Oracle Business Intelligence Applications 11.1.1.10.3 on a consolidated [Fusion Middleware \(FMW\) 12c](#) technology stack, minimizing management resources and up-taking new FMW 12c capabilities:

- New support for [ODI 12.2.1.3.2](#)
- Certified Oracle Business Intelligence Applications Configuration Manager (BIACM) and [OBIEE 12.2.1.4.1](#) with Oracle Fusion Middleware 12c

2. New Oracle Analytics Cloud and Oracle Analytics Server certifications

- [Oracle Analytics Cloud](#) (OAC) certification on Oracle OCI Gen2 Cloud Infrastructure has many functional updates that will benefit Oracle Business Intelligence Applications customers with cloud and hybrid deployments.

- [Oracle Analytics Server](#) (OAS) is an out-of-place platform upgrade from OBIEE and has many functional advantages and updates that will benefit Oracle Business Intelligence Applications on-premise customers.

3. Alignment of Premier support for Oracle Business Intelligence Applications 11.1.1.10.3 with Oracle Applications Unlimited Premier support timelines

- Oracle BI Applications 11.1.1.10.3 extends Premier Support to align with Oracle SaaS and Oracle Applications Unlimited (Business Suite, PeopleSoft, Siebel, JD Edwards) Lifetime Support timelines through at least 2031.
- Updated Oracle Business Intelligence Applications [Statement of Direction \(June 2020\)](#)
