ORACLE®

Oracle Global Leaders Program

Winter Meeting
Agenda

Miami Beach

January 19-20, 2023

Hilton Bentley, Miami Beach, FL

Invitation from Oracle

Dear Oracle Global Leaders and prospective members,

Welcome to our winter event in Miami on 19-20th January 2023.

Customers and partners will talk about their experiences, solutions and plans in architecting and implementing Oracle data management solutions and journeys to cloud deployments.

Product Management and Product Development from Oracle Database, Cloud Infrastructure, Data Integration and Analytics will keep you updated on Oracle product developments and strategy.

Decision makers and owners of data management systems will gain from hearing about architecture design as well as business benefits of implementations. C level and strategists will gain insight from successes, challenges, experiences through networking with peers. Implementers of solutions, such as program and project managers, architects, database managers will get insights to the latest oracle updates in this space too!

Our team, as the development team for Oracle Database, are committed to your continued success with these products, and again, we will offer 1:1 CVC sessions for customers with our management, along with the other product managers from Analytics, AI, Data Integration.

We aim to have an ongoing strategic relationship with our customers through this venue and our program generally. Your success is our success.

Logistics:
•Pre-event light faire/reception on Wednesday evening
•Lunch and refreshments on Thursday and Friday
•Appreciation reception and dinner on Thursday evening

ABOUT ORACLE

Oracle (Nasdaq: ORCL) is the world's largest enterprise software company.

Oracle's business is information – how to manage it, use it, share it, protect it. For nearly three decades, Oracle has provided the software and services that let organizations get the most up-to-date and accurate information from their business systems.

Today, Oracle is helping more governments, businesses and healthcare institutions around the world become information-driven than any other company.
