

Cloud Investment Services | FinOps* for OCI

Already on Oracle cloud? Make data-driven decisions, bring accountability to cloud spend, and align consumption to business value

Value Proposition

OCI Cost Management

- 1 Spend transparency and visibility through reporting and alerting
- 2 More predictable manageability through forecasting and trend analysis
- 3 Improved operational discipline through governance & quotas
- 4 Improved cloud economics and optimized utilization through best practices

How we can help

- Improve visibility and align OCI consumption to business metrics
- Train teams on OCI budgeting, forecasting, spend analysis, and cost reduction programs
- Train engineers how to identify and optimize utilization and improve governance across OCI consumption including automated scheduling
