

Oracle Consolidation Planning Service for Oracle Database

ORACLE® Advanced Customer Services

PLANNING, VALIDATION AND MIGRATION OF YOUR DATABASE

KEY FEATURES

- Analyze business and technical compatibility of critical database systems
- Help customers model the most optimal database deployment scenarios including workloads (+20 days) and configuration
- Actionable recommendations and easy to interpret reports
- Leverages Oracle Advanced Support Cloud and the Oracle Advanced Support Platform

KEY BENEFITS

- Simplify IT
- Faster Results
- Lower Risk

Is complexity a challenge you are facing in your IT environment? Are you consolidating or migrating your current database in order to meet the critical demands of your business and IT environment? Oracle delivers the latest database technology to help you with these goals through Oracle Database 12c and Oracle Exadata. To help you get to the latest technology quickly, Oracle Consolidation Planning Service assists and supports you in consolidating and migrating your database to Oracle Database 11g, Oracle Database 12c, and Oracle Exadata.

This fixed-scope, fixed-price service, delivered by Oracle Advanced Customer Services, helps you identify the most optimal consolidation and deployment scenarios based on your current configurations, workloads, and security requirements.

If you are migrating or consolidating your databases, choose Oracle Consolidation Planning Service to help you meet your goals quickly and effectively.

Expertise, Tools, and Automation

Combining the latest recommended practices, advanced support tools, and expertise, Oracle Consolidation Planning Service delivers a well-defined outcome for a fixed fee.

Our experts have extensive Oracle Database consolidation experience. Through our engineers, you get a direct connection with Oracle Support and Product Development.

With the Oracle Consolidation Planning Service, you have the option of requesting all local onsite delivery resources or a blend of local and remote resources. The Oracle Consolidation Planning Service uses the Oracle Advanced Support Platform (an on-premises software toolset) to provide service automation, data analytics, modeling, monitoring, and reporting to help drive faster execution of the solution.

Once the Oracle Advanced Support Platform is in place, most customers connect to the Oracle Advanced Support Cloud to enable remote support delivery.

Oracle Consolidation Planning Service includes:

- Analysis of business and technical compatibility of critical database systems
- Help to model the most optimal database deployment scenarios including workloads (+20 days) and configuration
- Actionable recommendations and easy to interpret reports
