Is Your Software Vulnerable To Cybercrime?

Third-party support and self-maintenance can’t protect you—the real solution is at the source.

Cybercrime is Real

$10.5 trillion

The estimated annual cost of cybercrime damages worldwide by 2025

Cyberattacks and data breaches continue to increase exponentially

$4.45 million

Estimated annual cost of data breach in 2020

Ransomware attacks

Many businesses never recover from the fallout

Don’t be fooled by third-party support providers and self-maintenance security methods

There’s no patching in “virtual patching”

U.S. Department of Homeland Security

“...it is necessary for all organizations to establish a strong ongoing patch management process to ensure the proper preventive measures are taken against potential threats.”

https://www.cisa.gov/

Firewalls aren’t fireproof

The perimeter-focused security strategies leave your software open to a hack.

Virtual patching is a workaround that doesn’t actually patch or update your software.

E.G. General Data Protection Regulation

A single set of rules to enhance data privacy and guarantee the security of personal data and data processing.

Applies to any organization handling EU citizen data

Enforceable May 25, 2018

Noncompliance or violation can lead to heavy fines
