

Standard Template

The Oracle Prime Projects Cloud Service Standard Template is a base configuration provided with the initial provisioning to address a particular industry or set of use cases.

The Standard Template contains a configuration loaded into the client's instance consisting of Views, Forms, Workflows, Configured Fields, Templates, and other Objects. It has been developed using full lifecycle design best practices, including Architecture Diagrams, User Stories, Process Flows and Test Scripts.

The following use cases are based on an Oracle Modern Best Practice and are currently included in the Standard Template:

PORTFOLIO MANAGEMENT

Allows you to Propose, Select, and Manage your projects with pre-defined Prime Measures across the Portfolio Management lifecycle.

To enhance your Oracle Prime Projects configuration to further align with your organization's needs, contact the Professional Services sales team.

PROJECT MANAGEMENT

Enables the Initiation, Definition & Planning, Monitoring & Controlling, and Closeout of projects across your organization.

Project Management also includes Lean Scheduling components to support Task Management analytics and associations to CPM Schedules.

Additional Information & Services

For additional information on the Oracle Prime Projects Standard Template, [watch the overview video](#).

Additional services can be purchased via the Construction & Engineering Advisory Services Pack for 40 hours of Consulting Services to assist you with defining additional requirements for further implementation or more detailed enablement beyond what's provided in the Training Center in Prime.

To read the Professional Services Description for the Advisory Services pack, [click here](#). Or, for additional details, contact Kristin DeSha as indicated on this page.

The use cases are configured into Oracle Prime Projects upon provisioning, and include the following configuration components:

Reason Codes		11
Configured Fields	40	22
Codes		24
Measures	9	
Folder Templates		1
Resources	20	30
Roles		53
Filters - Activities		4
Views	9	16
Investor Maps	5	
Evaluation Categories	14	
Portfolios	14	
Strategy Types	2	
Strategies	12	

ABOUT ORACLE PRIME PROJECTS:

Oracle Prime Projects is cloud-based, enterprise software for managing simple to complex projects under a single platform.

Oracle Prime Projects provides an integrated solution to effectively control project cost, schedule, scope, resources, and risk. Real-time visibility in to performance information allows project managers and stakeholders to make the right decisions.

The Oracle solution enables companies to manage long-range capital plans, easily manage and track all of their prospective and on-going projects.
