

# Oracle Backup and Recovery Services for Oracle Secure Backup

## ORACLE® Advanced Customer Services

### BACKUP AND RECOVERY SERVICES FOR ORACLE SECURE BACKUP OF ORACLE OPTIMIZED SOLUTIONS

#### KEY FEATURES

- Configuration of Oracle Backup and Recovery solution based on Oracle Optimized Solutions
- Backup and recovery guidance from Oracle Advanced Support Engineers
- Solution documentation and handover

#### KEY BENEFITS

- Optimized data center protection for backup and recovery
- Improved scalability and operational effectiveness
- Increased efficiency and performance

As environments grow in size and complexity, IT administrators must cope with explosive data growth and the pressure to meet escalating service levels, while backup windows shrink. In addition, some legislative, corporate, and industry regulations mandate long-term data retention and retrieval requirements.

Organizations must ensure that their backup and recovery solution is optimized to meet these business and regulatory demands.

Oracle Backup and Recovery Services for Oracle Secure Backup is based on the Oracle Optimized Solution. These pretested, high-performance architectures can be used to accelerate data protection processing and management with breakthrough cost structures using the Oracle Secure Backup software powered by Oracle servers, storage, operating systems, and tape storage.

### Optimize Performance of your Oracle Storage Environment

Oracle Advanced Support Engineers understand Oracle storage, software, and operating system technology. Based on our aggregated Oracle knowledge base, engineers know how to install, configure, and tune Oracle systems so they are running at peak performance and can meet backup and recovery objectives. Oracle Backup and Recovery Services for Oracle Secure Backup combines tested backup architecture with expert knowledge to configure, and integrate an end-to-end solution. From hardware and software configuration, to client backup configuration and services, Oracle storage engineers provide the expertise to ensure optimized solutions are installed according to Oracle recommended practices.

### Solution Overview

This time and material based service provides complete end-to-end data protection for network backup clients and can complement Oracle Recovery Manager and Oracle Active Data Guard solutions using Oracle's Sun ZFS Storage Appliance, providing cost effective long-term storage on high-performing encrypted tape. Oracle Advanced Customer Services works with your team to configure Oracle Secure Backup Solution for your Oracle Optimized Solution environment.

**TECHNOLOGIES COVERED:****Oracle Optimized Solutions  
(Configuration Dependent):**

- SPARC SuperCluster
- Oracle Exadata
- Oracle ZFS Storage Appliances
- Oracle StorageTek Tape

**Technologies:**

- Oracle Secure Backup
- Oracle Key Manager
- ACSLS
- ACSLS / HA

**ADDITIONAL SERVICES**

- Oracle Standard System Installation for Oracle storage technologies
- Oracle Advanced Monitoring and Resolution of storage environments

Sample activities may include:

- Prepare project plan for tasks and resources
- Review current data protection, backup, and restore strategy and capabilities
- Implementation and integration of Oracle Secure Backup Solution Configurations
- Configure Admin and Media Servers
- Configure Oracle Key Manager, ACSLS (Automated Cartridge System Library Software), ACSLS/HA, and Oracle Secure Backup Systems Integration of tape, SAN, and servers
- Create build documentation

**Getting Started**

Proper planning, installation, configuration, deployment, and support of your Oracle storage systems are critical to optimizing overall IT performance. By utilizing Oracle enterprise storage services and personalized expertise, you ensure the ongoing system stability and performance expected from your technology—right from the start.
