

# Re-imagine Your Financial Processes in the Cloud

Cloud-based EPM solutions deliver greater agility and efficiency, at a lower cost—which is why hundreds of Hyperion customers are upgrading to Oracle EPM Cloud

## Why Cloud? Why Now? Why Oracle?

Scroll to find out

### Why Cloud?

On-premises EPM systems need regular updates and maintenance—and the upgrade cycle can consume significant time and resources.

To stay on top of innovation and remain agile, hundreds of Hyperion customers have already migrated to a cloud-based EPM solution.

#### The Cloud Advantage: The Last Upgrade You'll Ever Do

Frequent, easy-to-adopt updates to Oracle EPM Cloud mean you're always up-to-date and able to take advantage of continuous innovation. Lengthy, costly upgrade cycles are a thing of the past. Plus, you'll benefit from unprecedented security, improved flexibility, and lower total cost of ownership.

Regular updates

Proactive maintenance

High security

Continuous innovation

Lower cost of ownership

**"We selected Oracle because of its leading-edge offerings, enhanced performance, security, and regular updates that Oracle brings to our planning and budgeting. It was also important to have a smooth transition from Oracle's Hyperion solution that we ran for ten years on-premises."**

Hans van den Berg, Business Controller, Eindhoven University of Technology

### Why Now?

To stay ahead of the competition, you need to adopt current best practices and emerging technologies.

On-premises EPM systems have served finance functions well to date, but when you take them to the cloud, you can reimagine your processes and really boost the productivity of your teams.

#### The Cloud Advantage: Outpace Your Competition

New technologies are changing how finance operates... AI, machine learning, chatbots, process automation, and more. When you migrate to a cloud-based EPM solution, you can access these features and functionality to gain greater efficiencies and improve the quality of decision-making.

Intelligent process automation

Automated account reconciliation

Financial close orchestration

Autonomous consolidations

AI-enabled planning & decision making

Hilton Hotels re-engineered forecasting and budgeting for its more than 700+ properties, enhancing operational planning and improving the experience for more than 2,400 users globally. Hilton is now able to create more accurate forecasts in a timely manner.

### Why Oracle?

Oracle Consulting and our large, experienced EPM partner community have helped hundreds of Hyperion customers move to Oracle EPM Cloud.

We have tools and services to rapidly upgrade with minimal disruption, making your transition as smooth as possible.

#### The Oracle Cloud Advantage: Future-Ready EPM

Oracle's next-generation EPM cloud suite is the market's most comprehensive and scalable, and is ranked the market leader by analysts. It is the only EPM cloud offering built on a modern platform that incorporates machine learning. Oracle's EPM Cloud suite is proven, with thousands of customers across every EPM business process.

Only EPM Cloud built on machine learning

Recognized market leader

Most comprehensive, scalable EPM cloud suite

Only Oracle delivers best-in-class EPM capabilities along with ERP, HCM, CX, and PaaS

**"We moved to Oracle Cloud solutions because we already had significant investment in Oracle's technology and Oracle also offers the most comprehensive solutions in the cloud space, making the transition very simple and fast for us."**

Andrew McGee, IT Manager, Australian Finance Group Ltd.
