

Oracle Fusion Cloud Self Service Procurement

An integral part of Oracle Fusion Cloud Procurement, Oracle Self Service Procurement provides a user-friendly approach to managing employee requests for goods and services. Oracle Self Service Procurement provides the best capabilities of consumer shopping web sites with the tools to control spend. This increases the level of satisfaction for your employees, reduces your support costs and ensures more of your spend is at the best price possible with the lowest impact on your procurement team.

ACCELERATE SELF SERVICE ADOPTION

Oracle Self Service Procurement delivers a friendly user experience that is similar to the best consumer web sites. With little or no training, employees can easily search, use shopping lists, browse categories, and find what they need quickly. This means that for most use cases, there's little for employees to learn and fewer barriers to success.

You can also leverage advanced capabilities for instances where there are requirements such as one-time delivery, accounting splits and project accounting. Oracle Self Service Procurement's user experience changes the dynamics of user acceptance. Ultimately this has a major impact on user satisfaction, which drives broader adoption, compliance, and savings.

Key Business Benefits

- Increase adoption with consumer-like user experiences
- Ensure contract compliance by directing purchases to approved suppliers
- Ensure policy compliance with multilevel approval workflows
- Minimize training
- Reduce support costs

ENFORCE NEGOTIATED TERMS AND POLICY COMPLIANCE

Oracle Self Service Procurement helps you enforce compliance with negotiated terms and approval policies. Catalog management tools help improve compliance with supplier agreements by directing users to preferred suppliers and negotiated prices. Flexible rules can be used to automate financial accounting using attributes such as amount, commodity and cost center. Approval workflow rules help enforce controls, close compliance gaps, and simplify exception management. Simplified approval notifications provide a quick, clear view to the most important information on all platforms including smart phones and tablets. With Oracle Self Service Procurement, the savings you negotiate with suppliers are automatically enforced.

ORACLE FUSION CLOUD PROCUREMENT APPLICATIONS

Oracle Procurement helps organizations streamline, standardize and automate their source-to-settle process through modern technologies that help increase influence over spend and procurement practices. It increases user engagement, increases collaboration and simplifies, standardizes and automates routine transactions resulting in lower costs and higher margins.

Oracle Fusion Cloud Procurement

Oracle Procurement modernizes procurement by standardizing, streamlining and automating the source-to-settle process through automation and social collaboration, while controlling costs and achieving higher margins.
