

Manufacturing company review of GraalVM Enterprise on TrustRadius

Rating
9
out of 10

“Specifically on mission-critical applications, as the startup time is an order of magnitude less than traditional Java JVM-based applications, GraalVM is a great choice. Also, for a polyglot team, who need a JVM solution to support engineers skilled and comfortable in multiple programming languages. Moreover, it makes profiling easy at the JVM level to troubleshoot memory issues.”

Sharique Khan, Software Engineering Manager

Varian Medical Systems
