

Oracle's Primavera Aspire for Primavera P6 Cloud

The right balance of functionality, user adoption and speed of implementation provides value to organizations. Designed for organizations who are looking to innovate, Oracle's Primavera Aspire for Primavera P6 Enterprise Project Portfolio Management in the Cloud provides the foundation for your business transformation and delivers the application flexibility needed to grow and change as your business matures. The Primavera Aspire for Primavera P6 approach prepares your organization for the adoption of our enterprise grade, global application configured with core scheduling and planning functionality in as little as 60 days.

ORACLE'S PRIMAVERA ASPIRE CONSULTING SERVICE

Oracle's Construction & Engineering Professional Services developed Oracle's **Primavera Aspire** as a simple, fast, cost-effective cloud-based deployment approach for organizations looking to quickly achieve return on their EPPM investment. Delivered by Primavera experts, Primavera Aspire packages are a combination of leading practice processes and a robust library of tools and templates designed to make your organization's move to Primavera Cloud service fast and cost-effective. Oracle's Construction & Engineering Professional Services experts help drive your organization's project to success and accelerate time-to-value by providing a streamlined methodology and approach.

The Primavera Aspire approach to implementing Oracle's Primavera P6 EPPM significantly reduces implementation time, effort and risk to provide a foundation for planning and scheduling with your Primavera P6 EPPM Cloud Service subscription.

ORACLE'S ASPIRE FOR PRIMAVERA P6 OVERVIEW

The Aspire for Primavera P6 packaged service offers the best-in-industry range of capability and features pre-designed based on leading industry practice and leverages a "crawl-walk-run" approach.

You start with the Foundation Starter Pack and add various service packs and modules to meet your additional requirements. This approach allows users to familiarize themselves with core features and concepts before progressing onto more advanced features. By leveraging our deep knowledge in Oracle's Primavera products, we can assist your organization with rapid decision making as we guide you through the deployment process.

Get started with a simple, fast and cost effective Primavera P6 Cloud solution today!

Key Features

- Pre-defined Processes
- Fully Functional Processes
- Reduced Costs
- Accelerated Timelines
- Reduced Risk

Key Benefits

Pre-configured Primavera P6 solution footprint offering substantial savings and benefits which include :

- Choice of pre-configured and tailored best practice business processes
- Accelerated time-to-value through the use of prescriptive, best practice methodology

Aspire Foundation Starter Pack

The foundation Starter Pack focuses on project planning, scheduling, status updating, and tracking processes. With the Foundation Starter pack you are able to do:

PORTFOLIO MANAGEMENT

By providing a consistent overview and analysis of the portfolio or program as projects are added and removed, Primavera P6 ensures project performance can be easily quantified and communicated to project stakeholders.

PROJECT PLANNING

Create, plan, and schedule projects within your organization leveraging pre-defined project templates. Primavera P6 allows project managers to fine tune and optimize the project schedule leveraging Critical Path Method scheduling. Establish the project baseline to measure schedule performance.

PROJECT EXECUTION

During project execution, project managers track project progress, revising and adjusting the schedule as necessary.

PROJECT CLOSURE

Upon completion, Project Managers close out the project after conducting reviews and formal project closure assessments. Completed projects provide a robust repository of lessons-learned for future projects.

Aspire for Primavera P6 Additional Modules

Oracle's Primavera enterprise project portfolio management solutions are the industry's most comprehensive for project-driven organizations and their demanding project and program environments. Our modular approach allows you to choose from a library of pre-defined options to rapidly adopt functionality to meet your organization's needs.

Additional modules that can be added to the Foundation Starter Pack Include:

- Risk and Issue Management – Improving Project Success
- Resource Management – Matching People with Projects
- Collaboration and Content Management
- Project Cost Management

ARE YOU A CANDIDATE?

Successful organizations are those that can readily adopt the business processes enabled by deployment of Oracle's Primavera P6 EPPM Cloud Service, and have the agility to make decisions quickly. By doing so, organizations can reap the benefits of a comprehensive solution in the simplicity of the cloud, delivered in the most cost effective manner by Oracle's Construction & Engineering Professional Services.

- A comprehensive approach to deploying Primavera P6 processes quickly and cost-effectively to the cloud
