Customer Solutions for Industries – Comms Service Engagement Value

Oracle Customer Solutions for Industries - Comms enhanced services package provides custom-tailored professional services specific to its customers' unique network needs. These services help support, operate, and manage existing Oracle Communications solution environments during annual peak traffic periods. With our team's dedication to delivering consistent value throughout the course of the engagement, Oracle provides total assurance of solution optimization and stability. We ensure the achievement of targeted business and technology outcomes, reducing overall solution risk, providing an accelerated time to market for new services, lowering the total cost of ownership, and providing increased capacity for innovation.

Key Benefits and Value proposition

- Provides access to dedicated Oracle Communications subject matter experts with unmatched product experience and expertise to proactively support and maintain the existing Oracle Communications architecture. This may be in preparation for, and throughout, annual peak traffic periods, for the purposes of maximizing performance, capacity, stability, redundancy, resiliency, and achieving overall solution optimization, while ensuring total system compliance with proven best practices and methodologies.
- Offers key reactive support throughout recurring annual peak traffic periods via 24x7 service desk, resulting in highly efficient root cause analysis with critical support for the broader network environment ecosystem. Included are hands-on assistance with existing service expansion, change management, software release management, method of procedure development, and application of additional operational efficiencies.
- Improves overall operational efficiency and reduces expenses throughout peak season, while allowing for reallocation of key technical personnel to focus attention on other more strategic and critical facets of the business where they are needed the most.
- Minimizes potential service impacts via proactive monitoring and support, effectively intercepting issues and reducing downtime if/when incidents Oracle Customer Solutions for Industries- Communications occur due to shortened support and repair times. This effectively ensures total service availability during critical peak and off-peak traffic periods.
- Offers a cost-effective services solution to provide comprehensive system coverage for the Oracle Communications portfolio during peak traffic season, as compared to a higher-cost subscription to a larger-scale annual Managed Services program.
