

Oracle's Primavera P6 Migration to Cloud

The last upgrade you will ever do.

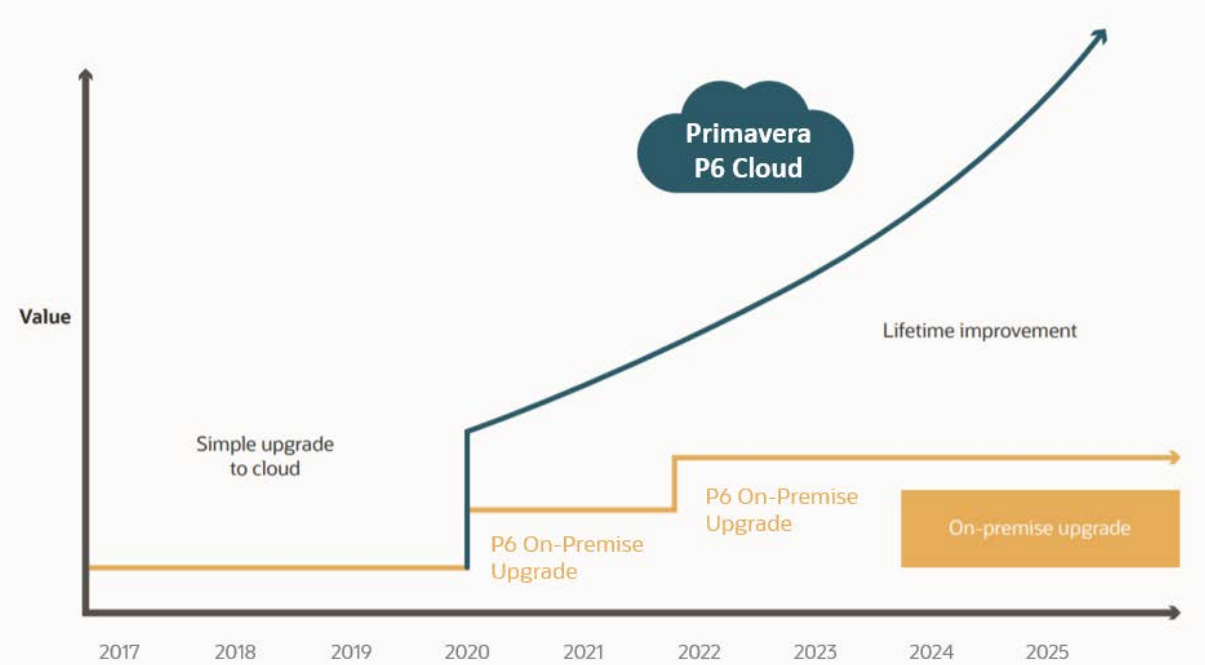

Get Ready for the Cloud with Oracle Soar

Upgrade or migrate to the cloud?

Doing nothing isn't an option.

Standing still only allows the gap between you and your competition to widen. Even if you're currently happy with the value you're getting from your on-premise solution, its lengthy upgrade cycles still make it an expensive option. You can avoid these costs by moving to the cloud.

With a simple upgrade to cloud using our accelerators, you'll get immediate additional value, which will appreciate throughout the ongoing updates.

Upgrade to the Cloud: Our Commitment to You

We have invested in **unique accelerators** and tools to transition our customers like you in a quick and simple way. We are committed to your success and want you to benefit from the investment you have made with Oracle by moving you to our cloud platform, where you are no longer on the road to long-term obsolescence.

We will help you in your journey to the cloud with the best of our Oracle Construction and Engineering Consulting team working together with product strategists, sales, and support.

Low Cost	High Speed	Reduced Risk
<p>Optimized cost based on a unique know-how of the initial solution and the target solution.</p> <p>A conversion toolkit to reduce human workload and automates what can be.</p>	<p>Unique accelerators and upgrade processes to simplify and ensure a smooth and efficient transition.</p> <p>Ability to take your interfaces into our configurable integration platform.</p>	<p>Shifts responsibility of success to Oracle through fixed-scope engagements.</p> <p>Intelligently clean-up your data with the ability to consolidate your databases and streamline administration.</p>

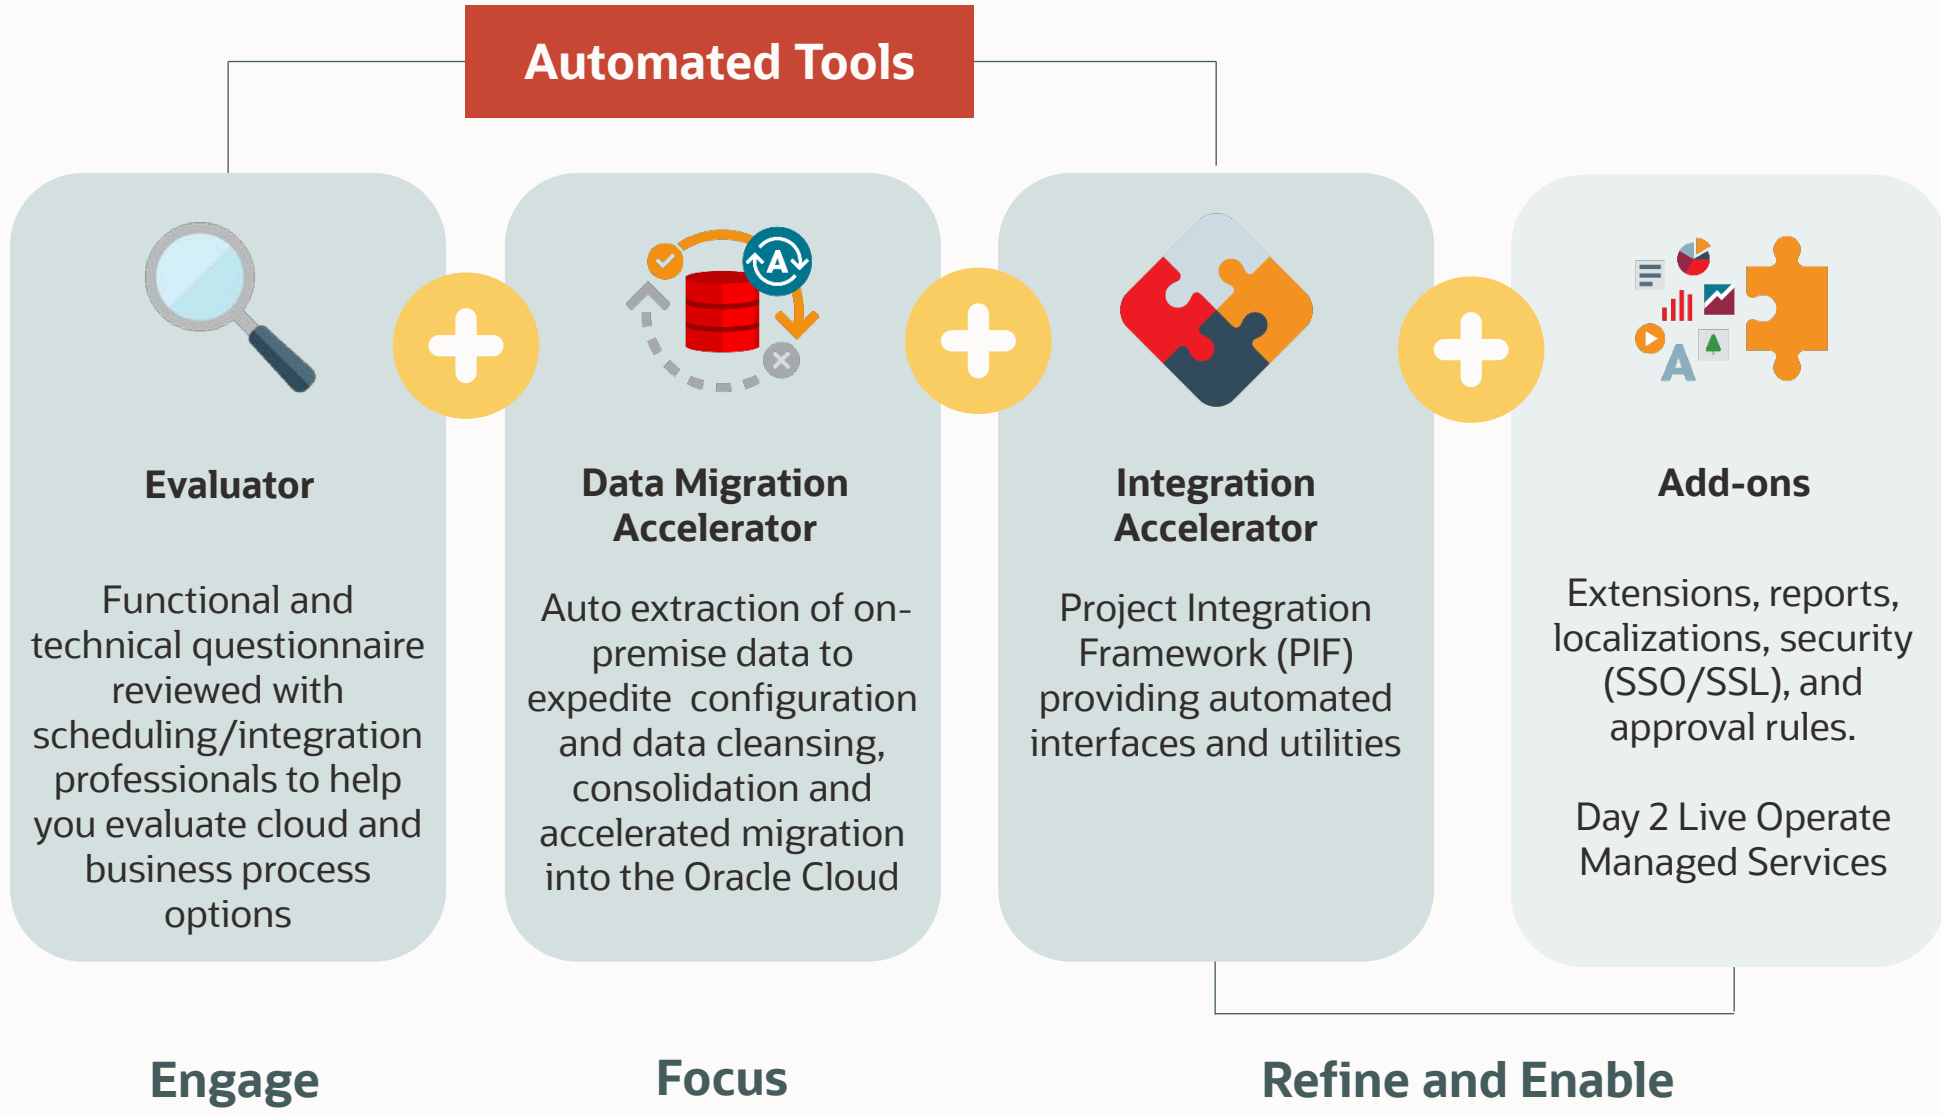

Go Live on the Cloud with Oracle's Primavera P6 in as few as 5 weeks

Our Automated Upgrade Proposition

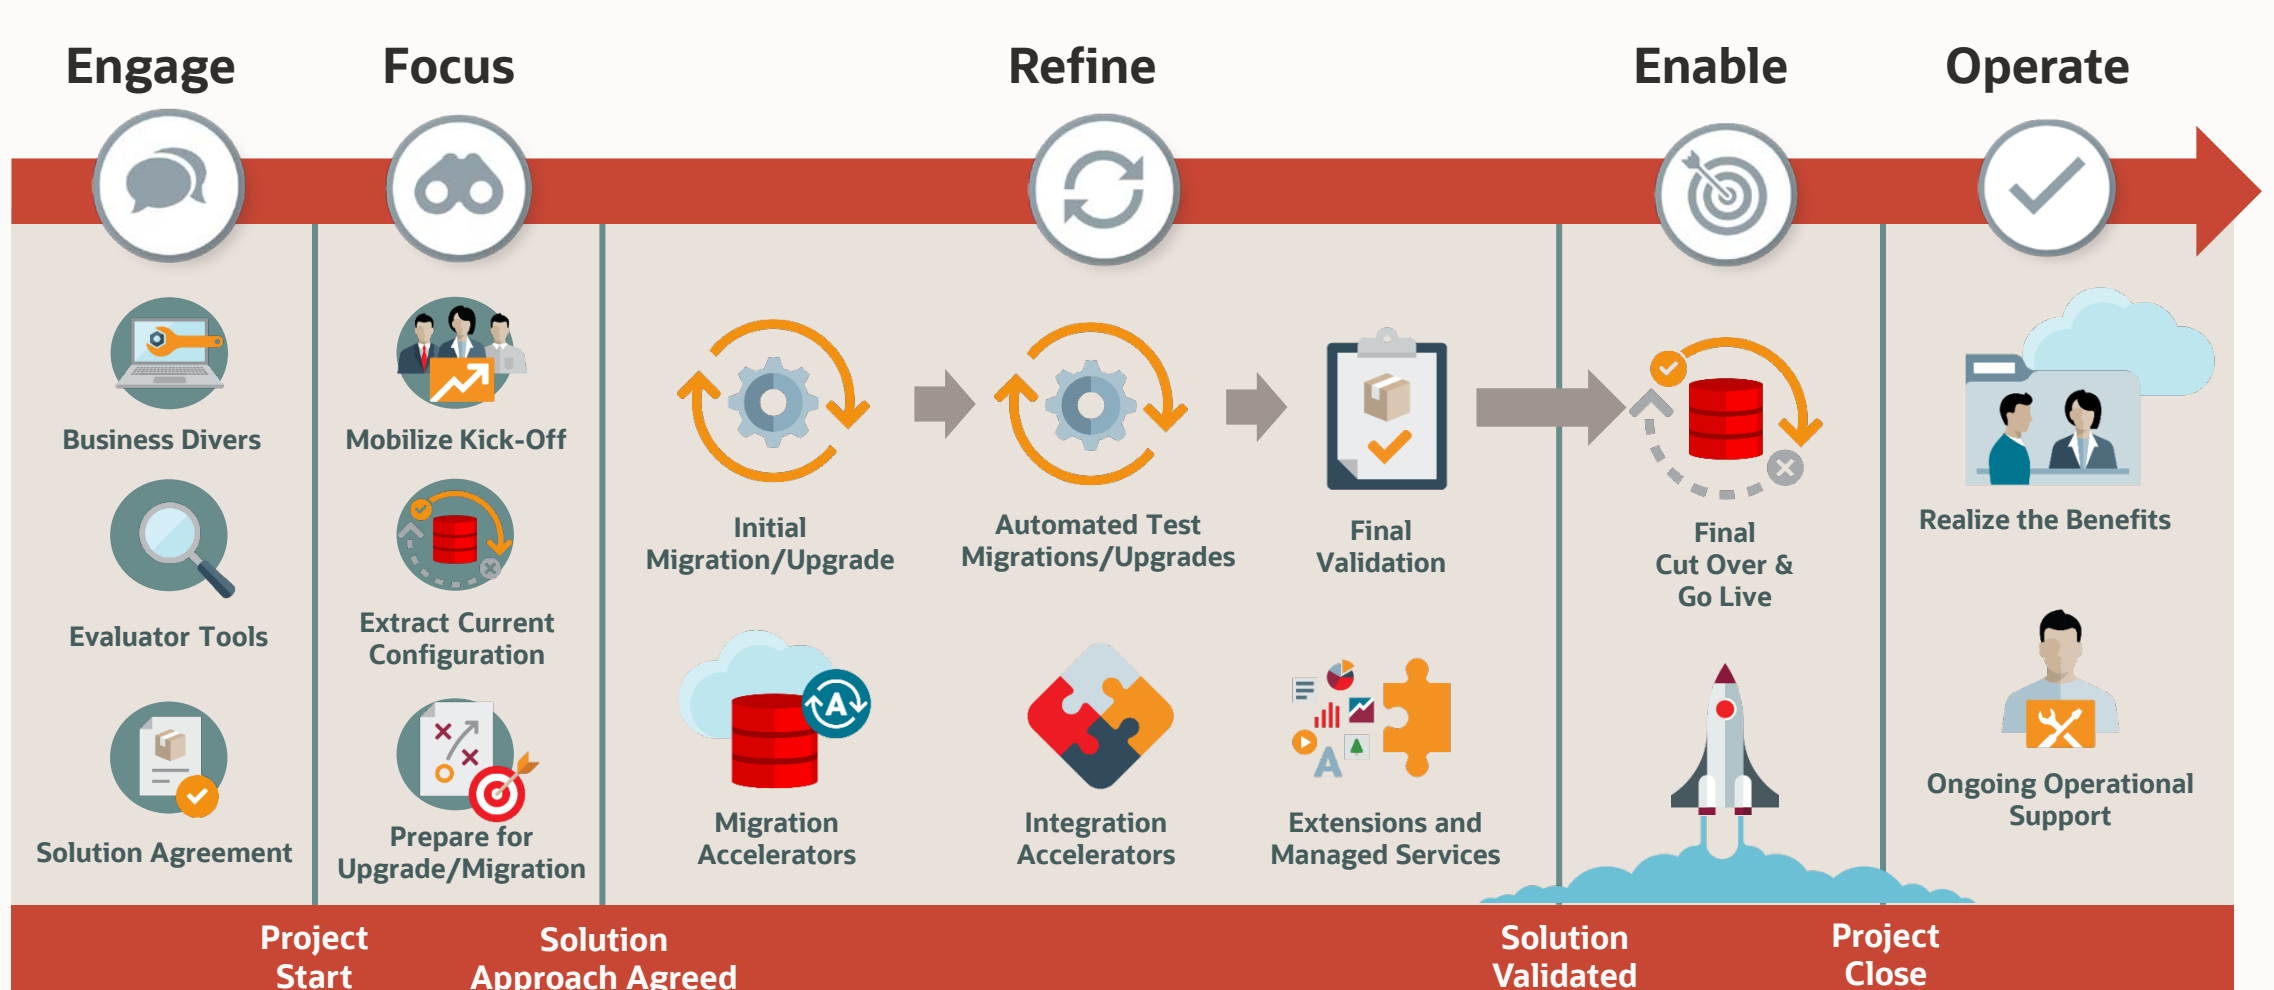

You can reduce the time of cloud migration by up to 30-50% by using rapid upgrade tools and an accelerated upgrade approach.

Rapid Upgrade Tools

Oracle Soar includes a discovery assessment, environment analyzer, automated data and configuration migration utilities, and rapid integration tools. The automated process is powered by **Oracle's True Cloud Method** and **Project Integration Framework (PIF)**, Oracle's proprietary approach to support customers throughout the journey to the cloud. It is guided by Oracle to help ensure a rapid and predictable upgrade that aligns with modern industry best practices.

Accelerated Upgrade

Accelerate your journey to the cloud today with Oracle Soar.
