

Optimization Services for Oracle's Primavera Solutions

Project and portfolio management operations sit at the core of many organizations. But once critical enterprise data is captured in a project or portfolio management solution, how can you ensure your organization is taking full advantage of accelerating your organization's adoption of project management processes and tools through an intelligent, well-designed implementation strategy? Oracle's Construction and Engineering Professional Services can help you unlock the power of your solutions and deliver better results from your technology investment by helping increase operational efficiencies, driving down costs and securing vital data.

ORACLE'S CONSTRUCTION AND ENGINEERING PROFESSIONAL SERVICES CONSULTANTS PROVIDE TECHNICAL AND BUSINESS GUIDANCE

Whether you decided to go it alone, teamed up with Oracle Construction and Engineering Professional Services, or selected one of our business partners to assist with your implementation, how can you be sure that you are getting the maximum return on your software investment? Oracle's team of highly qualified business and technical consultants are available to review, evaluate, and help improve your implementation configuration, processes, procedures, technical environment and infrastructure – even your integration to other Oracle or third-party systems.

Oracle's Construction and Engineering professional services consultants focus on the unique challenges of managing and deploying enterprise project management applications. Whether your business is looking for high performance and availability to meet the demands of customers and partners, or improved operational efficiency to reduce total spend, Oracle's specialists can help.

INVEST IN AN OPTIMIZATION SERVICES PACKAGE

Oracle will provide consultants to participate in reviews and provide recommendations regarding your organization's unique IT and system requirements as needed for your on-premise or cloud implementation. More specifically Oracle can provide:

Ensure that you are making the most of your investment in Oracle's solutions.

Why Oracle Consulting

- **Leading Expertise:** Oracle's own experts providing thought leadership for every Oracle solution.
- **Broad Coverage:** "End-to-end" lifecycle services across the entire Oracle product footprint.
- **Unified Methodology:** Based on industry standards, high quality results across complex projects.
- **Flexible Delivery:** Onsite, offsite, and offshore, along with innovative solutions such as Rapid Starts and Expert Services.

Application processes and procedures review

- Review current implementation configuration including business processes, security profiles, key data structures, user interface views, set-up and utilization of resources, roles and costs features and functionality as well as project and activity coding structures.
- Review supporting business processes governing: ideation, project creation, prioritization and selection; scheduling execution and control methods, reporting and project closeout procedures.

Technical review

- For on-premise installations we will review the Database Server, Web Application Server and Desktop Clients in the production and test environments for recommended system configurations for running Oracle's Primavera suite of applications including: Oracle's Primavera P6 Enterprise Project Portfolio Management, Oracle's Primavera Unifier, Oracle's Primavera Portfolio Management and Oracle's Primavera Analytics.
- Facilitate discussions regarding common architectures used in similar technical and/or industry related environments as well as planned capacity and projected growth.

Interface review (optional)

- Review of systems interfaces including integration into existing Oracle applications and customer integrations into third-party systems, where applicable.

Leverage Oracle's methods, tools and extensive experience with customer implementations across diverse industries and geographies. Tight integration across consulting, development, support, curriculum and global delivery puts the entire Oracle team behind your success.

HOW ARE WE DIFFERENT?

The Construction and Engineering professional services team is focused exclusively on Oracle's Primavera and Oracle technologies, and we have the experts that others turn to for leading practices in Primavera implementations. We know how to best optimize your investment in Oracle's Primavera products and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

SOLUTIONS MADE EASY

Oracle offers a variety of flexible implementation services. A comprehensive implementation program includes on-site consulting, software installation, custom workshops, manuals and reports, and a variety of coaching and educational programs.
