Upgrade Assessment for Oracle's Primavera Solutions

Oracle's Construction and Engineering Professional Services offers a full complement of project management and technical experts committed to helping you get the most out of your Construction and Engineering products. We understand that determining the service needs of your organization can be overwhelming. That's why we help simplify the process with an Upgrade Assessment package. An upgrade assessment is designed to help customers understand the overall impact of an upgrade. An assessment of existing hardware, software and an evaluation of new features of Oracle's Primavera and/or other Construction and Engineering solutions are included.

CONSTRUCTION AND ENGINEERING CONSULTANTS PROVIDE TECHNICAL AND BUSINESS GUIDANCE

A structured assessment, as well as planning in advance of an upgrade, provides important input to support the eventual success of the upgrade. The Oracle Upgrade Assessment package leads your company through a set of well-designed and integrated discovery and evaluation processes to unlock additional value from your existing Oracle's Primavera products (Oracle's Primavera P6, Oracle's Primavera Unifier, Oracle's Primavera Analytics and Oracle's Primavera Portfolio Management). It provides your company with a well-defined approach to guide the upcoming upgrade project.

Most companies view upgrades as part of a regular "fitness plan" that provides continuous momentum and agility. Upgrades can also help organizations leverage enhanced product functionalities, lowering the cost and risk of expensive customizations. Embedded best practices and enhanced performance and scalability are additional advantages to upgrading to the latest release of software.

With more experience than anyone in the industry, and through close coordination with product development, Oracle's Construction and Engineering professional services are your best choice in planning and executing your upgrades. As your single source of accountability, Oracle's Construction and Engineering professional services have the greatest incentive to accelerate upgrade time-to-value.

HOW ARE WE DIFFERENT?

The Construction and Engineering professional services team is focused exclusively on Primavera and Oracle technologies, and we have the experts that others turn to for leading practices in Oracle's Primavera and Oracle hardware and software implementations. We know how to best optimize your investment in Primavera products and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Maintain your competitive edge by taking advantage of the latest Construction and Engineering Primavera Solutions from Oracle.

Why Oracle Professional Services

- Leading Expertise: Oracle's own experts providing thought leadership for every Oracle solution.

- Broad Coverage: "End-to-end" lifecycle services across the entire Oracle product footprint.

- Unified Methodology: Based on industry standards, high quality results across complex projects.

- Flexible Delivery: Onsite, offsite, and offshore, along with innovative solutions such as Rapid Starts and Expert Services.

WHAT IS AN UPGRADE ASSESSMENT PACKAGE?

An Upgrade Assessment includes the following six step process:

- Document, Review and baseline the 'As Is' environment against its expected requirements

- Make recommendations for how to address any issues found

- Recommend the 'To Be/Post Upgrade' environment

- Perform a Functional Impact Analysis and Recommendation

- Perform a Technical Impact Analysis and Recommendation

- Perform an Integrations Impact Analysis and Recommendation

- Perform a customized Reports Impact Analysis and Recommendation

Our seasoned consultants leverage Oracle's methods, tools and extensive experience with customer implementations across diverse industries and requirements. Tight integration across Consulting, Development, Support and Curriculum puts the entire Oracle team behind your success.

SOLUTIONS MADE EASY

Oracle offers a variety of flexible implementation services. A comprehensive implementation program includes on-site consulting, software installation, custom workshops, manuals and reports, and a variety of coaching and educational programs.

To learn more about upgrade assistance or the implementation program that is right for you, contact your local Oracle representative listed below.
