Oracle Database Appliance

Oracle Database Appliance runs and deploys Oracle databases and applications.

Oracle Database Appliance vs. DIY x86 Solutions

Oracle Database Appliance

10X Faster to deploy

DIY x86 Solutions

"Oracle Database Appliance supports built-in virtualization to run both database and applications, which enables the creation of a simple solution in a box."

Mark Peterson, Principal Analyst and Practice Director, ESG

Oracle Database Appliance Key Strengths

Ready to install

Lower costs

Optimized for maximum performance

Easier to manage

Enhanced security

Oracle Cloud Integration

Oracle Database Appliance provides end-to-end databases on-premises.

"Either waste time and money on a commodity x86 database system or get an integrated, automated, and much more affordable Oracle Database Appliance for faster deployment, greater uptime, and increased productivity."

Mark Peterson, Principal Analyst, ESG Consulting
