

Ship Your Goods Faster and at a Lower Cost

Transport your goods quickly and cost efficiently worldwide with Oracle Transportation Cloud, Oracle Global Trade Management Cloud, and expert operational support.

Faster, Cheaper, More: The Global Race for Shipping Goods

Shipping goods around the globe requires selecting the best transportation options to balance time and cost for your customers and for your company's success, as well as adherence to global trade rules.

Constant transparency and control are also crucially important. If you have a multitude of integrated systems and third-party components within your logistics processes, you'll need superior data flows to always know where your goods are and how your processes are performing.

Oracle Cloud Applications can give you the efficiency and transparency you need in your logistics.

Oracle Transportation Management runs all transportation activity across global, multimodal supply networks with effective shipment planning and execution. The solution creates scenarios to ensure optimal routing, the best carrier rates, lower transportation costs, and excellent customer service.

Oracle Global Trade Management centrally manages and automates global trade operations and compliance. The solution screens for restricted parties, sanctions, embargoes, and tariffs on both imports and exports, produces complete customs documentation to ensure on-time delivery, and mitigates the risk of penalties.

End-to-end operational support by Oracle Customer Success Services will let you achieve best results with your Oracle Cloud logistics. You will have experts by your side to support, manage, and monitor your processes and data flows from start to finish across integrated systems—keeping you constantly informed and in control.

Who Better to Support Oracle Than Oracle
