Appendix: Maintenance Units and Interactions Table for Oracle Responsys SMS Full-Serve Cloud Service	215

GLOSSARY

METRICS

\$B in Assets Under Management: \$B in Assets Under Management: is defined as one Billion in US Dollars (1,000,000,000 Base Unit) of the total value of assets You manage, and administer for Yourself and that You manage and administer on behalf of Your customers, as disclosed in Your company's annual report and/or regulatory filings.

Brand: A pharmaceutical drug, biologic brand, medical device name, medical supply product or category name as defined in the [FDA database](http://www.accessdata.fda.gov/scripts/cder/drugsatfda/index.cfm) (<http://www.accessdata.fda.gov/scripts/cder/drugsatfda/index.cfm>) or equivalent government medical product regulatory database in countries outside the U.S.A. or as defined in your website product section.

Contact: is defined as a single record in the contact table of the Oracle Eloqua Cloud Service database, consisting of the identity of a lead, prospect, customer or person to whom you are directing marketing activities. The Contact band stated in the ordering document defines the maximum number of Contacts that can be in the contact table of the Oracle Eloqua Cloud Service database at any one time. Contacts may sometimes be referred to as “buyers under management”.

Hosted Named User: is defined as an individual authorized by You to access the hosted service, regardless of whether the individual is actively accessing the hosted service at any given time.

Test: is defined as a single test performed by You within the Test Environment of the capabilities of the Oracle Eloqua Cloud Services.

Test Environment: is defined as a single test environment provided to You as part of the Cloud Services. A test environment is used for testing and validating changes prior to promotion to the production environment, as well as for recreating events and duplicating issues occurring in the production environment for the purposes of trouble shooting and facilitating incident resolution.

Activation Vendor: is defined as a third party vendor to which Oracle passes data campaigns for media execution within the vendor's platform.

Audience Analytics: is defined as a series of reports that enables You to gain insight across all of Your audiences.

Category: is defined as the smallest targetable unit of data available within the Oracle Data Cloud Marketplace. Categories may include Oracle unbranded and branded data and third party and first party data.

Channel: is defined as a set of integrations in a particular vertical that encompass data endpoints for activation in attribution, display, email, mobile, search, site optimization, social or standalone video.

Domain: is defined as a unique name that identifies a single website. A domain can be a parent site (e.g., for display: www.example.com; and for mobile: www.example.mobi), a subdomain site (e.g., west.example.com); a country specific domain (e.g., for Canada: www.example.ca); and each of these examples would be considered one domain.

File Format: is defined as the pattern and convention by which a computer program stores information in a file.

Instance: is defined as a single deployment of an Oracle Cloud Service ordered by You.

Look-alike Modeling: is defined as Using 1st, 2nd, and/or 3rd party data, to train a multivariate model to find a prospecting audience that is similar to Your customers and converters.

Marketing Channel: is defined as a set of integrations which allow You to send data end points for activation to vendors within media targeting (which includes display, mobile, and video), search, social, site optimization, attribution, and email networks.

Match, Matching or Matched: is defined as a process that enables You to port Your off-line data into an Oracle Marketing Cloud Service in order to achieve greater reach and scale when targeting anonymous user audiences.

Model: is defined as a single model request submitted to the Look-alike model activation vendor.

Profiles Stored: Total unique profile records stored within CX Unity. Customers will be able to import their customer data from multiple sources (e.g. CRM, Marketing Automation, Support/Service, eCommerce, etc.). CX Unity provides capabilities for profile unification and generation of a set of Master Customer Profiles (based on applying a set of configurable deduplication and promotion rules). Profiles Stored is the count of unique Master Customer Profiles within CX Unity. While there are many ways in which CX Unity delivers value (export of intelligent master customer profiles; export of hyper-targeted segments to be used within Marketing Automation or AdTech (either through native integration or data exports); real-time API calls from CRM, eCommerce, Support/Service, etc. systems.), pricing is based on number of unique profiles stored within CX Unity.

CX Unity also enables the Master Profiles to be enriched through 3rd party data sources. The mechanism for accomplishing this is to export the Master Profiles to the 3rd party system(s) for enrichment purposes, and import the enriched profiles back into CX Unity.

Profiles Used: This is a consumption-based metric, wherein pricing is based on value derived by customer from usage of CX Unity. There are many ways in which CX Unity delivers value: export of intelligent master customer profiles; export of hyper-targeted segments to be used within Marketing Automation or AdTech (either through native integration or data exports); real-time API calls from CRM, eCommerce, Support/Service, etc. systems.

This will be non-unique count, thus every export of a profile out of CX Unity counts towards the volume. CX Unity also enables the Master Profiles to be enriched through 3rd party data sources. The mechanism for accomplishing this is to export the Master Profiles to the 3rd party system(s) for enrichment purposes, and import the enriched profiles back into CX Unity.

A **Server Call** is generated each time data is sent to Oracle servers to process. Typically, all pages on a digital property are tagged and that tag will gather information from the browser and fire a server call, sending all data for the page on a single Server Call. However, many clients have other page interactions tagged, which can generate additional Server Calls from within a single page. Examples that will generate additional server calls include: link tracking, file downloads, hover events, partial form fills, and video completion %, among others.

Tag Management: is defined as an Oracle Marketing Cloud Service feature which You use to manage tags.

Taxonomy: is defined as the way in which data is classified within the Your Oracle Cloud Service.

1,000 Impressions: is defined as 1,000 Impressions per Month, where one Impression means as a single measure of the number of times an ad is displayed. Whether or not an ad is clicked on is not relevant for counting number of Impressions. Each time an ad displays it is counted as one Impression.

1,000 Page Views: is defined as 1,000 Page Views per Month, where one Page View means one visit by a unique internet user to a particular page on a website.

1,000 Interactions: is defined as 1,000 units of an Interaction, where an Interaction is the number of times a decision is made on which content to serve within an active optimization campaign. For example, an Interaction is counted when a page is served that contains campaign content, or when a mobile application containing active optimization campaigns performs a content fetch.

1,000 Messages: 1,000 Messages, collected from data providers and categorized by the Oracle Social Cloud system during the contract term. Unused or partially used messages expire at the end of the annual Service Period and do not rollover, and are not otherwise applied, to a new annual term. The annual quantity purchased is the quantity that is identified on the order form. The price identified is the per unit price.

1,000 Recommendations: is defined as 1,000 Recommendations where one recommendation represents a single decision by the recommendation engine to determine what widget content is served to a visitor.

1,000 Sessions: is defined as 1,000 online sessions to a website or mobile app. A session is counted each time a user visits a site or mobile app. We associate all of the events collected within a single session that can be attributed to the same user or device, and count each session once. We identify uniqueness using 1st-party cookie, followed by fall-back sessionization based on IP-address and user agent, in the event

that cookies are not accepted. Sessions are timed out after 30 minutes of inactivity, 2 hours or 5000 events, whichever comes first. Units of service are sold per 1000 sessions and can be used at any time during the term of the subscription. Any unused sessions will not rollover to the next contract term.

Unsampled Reports: is defined as reports that return results on the entire population of users, providing more granular report results on users for smaller data sets

OHash ID means a non-personally identifiable unique identifier derived from a piece of personal information (such as an email address or telephone number) using Oracle's proprietary OHash or other hashing techniques.

OHash Linkage Data means a mapping between two or more non-personally identifiable unique identifiers, consisting of at least one OHash ID and at least one Unique User ID.

Participants means You and other third parties participating in the Oracle Match Multiplier program.

Unique User means a user of a website or mobile application or a recipient of an email.

Unique User ID means a non-personally identifiable identifier (usually captured in alpha-numeric symbols) assigned to a Unique User.

Production Environment: is defined as the combination of systems that is used by Oracle to perform Oracle Cloud Services, and configured for

- the Oracle Social Cloud Service programs operating on it, and
- for specific uses as part of the Oracle Cloud Services.

Oracle Marketing Automation Eloqua SMS Full-Serve Cloud Service Maintenance Fee – Maintenance Unit

Applicable Part #B94180

Users of Oracle Marketing Automation Eloqua SMS Full-Serve Cloud Service Maintenance Fee are authorized to access the following modules subject to the terms set forth herein:

- Oracle Marketing Automation Eloqua SMS Dedicated Random Shortcode Cloud Service
- Oracle Marketing Automation Eloqua SMS Dedicated Vanity Shortcode Cloud Service
- Oracle Marketing Automation Eloqua SMS Dedicated Random Longcode Cloud Service
- Facilitate the setup of the applicable code with supported wireless carriers

Your Obligations:

- Work with the Oracle Mobile Team to answer questions from supported wireless carriers related to your code and mobile programs.

Dedicated Random Shortcode: is defined as a string of randomly-selected numbers assigned by the short code administration body for dedicated use by a single Customer to use for its campaigns only.

Dedicated Vanity Shortcode: is defined as a string of custom-selected numbers assigned by the short code administration body for dedicated use by a single Customer to use for its campaigns only. (additional cost compared to a dedicated random shortcode)

Dedicated Random Longcode: is defined as a string of randomly-selected numbers assigned by the long code administration body for dedicated use by a single Customer to use for its campaigns only.

Keyword: is defined as a word or name that is paired with a particular a Shortcode or Longcode and sent by a mobile device to trigger a marketing campaign.

Service Usage

Your usage will be measured based on the maintenance units attributed to each country and code type for the wireless carriers that you have enabled to support your Oracle Marketing Automation Eloqua SMS Full-Serve Cloud Service with a given year. The actual number of Maintenance Units attributed to a country and code type combination are detailed in the table included in the appendix of this Service Description booklet. This Maintenance Unit table reflects 3rd party services and may be updated during

Your Services Period to reflect changes in prices by the aggregators.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Marketing Automation Eloqua SMS Full-Serve Cloud Service -- 1,000 Interactions

Applicable Part #B94179

Users of Oracle Marketing Automation Eloqua Full Service SMS Service, in country indicated on order are authorized to access the following modules:

- Oracle Marketing Automation Eloqua SMS Messaging Cloud Service, MT Sent in specified countries
- Oracle Marketing Automation Eloqua SMS Messaging Cloud Service, MO Sent in specified countries

Usage Limits: The Oracle Marketing Automation Eloqua Cloud Service is subject to usage limits based on:

- A maximum number of multiples of 1,000 interactions as defined in Your order.

Overage

This Cloud Service is subject to overage fees.

Usage Rates

Your usage will be measured based on the number of interactions attributed to each SMS message that you send via the Oracle Marketing Automation Eloqua Full-Serve SMS Cloud Service client. The actual number of interactions attributed to any SMS message is based on the country you are sending to, the code type and aggregator (if multiple are available for one country), as described in the table included in the appendix of this Service Description booklet. This Interaction table reflects 3rd party Services and may be updated during Your Services Period to reflect changes in prices by the aggregators.

Advanced Support Assistance for Oracle Eloqua Marketing Cloud Service

Applicable Part #B85325

Advanced Support Assistance consists of:

- Advanced Technical Guidance and Assistance. One Advanced Support Engineer (“ASE”) will be assigned to you for the duration of the service period set forth in the ordering document. The ASE will serve as your primary contact for the delivery and administration of the services and will communicate with you in English (except where a local language is available).

Your ASE shall provide the following support services during core hours of operations within contracted region, 9:00 AM – 6:00 PM:

Support Request (“SR”) analysis;
Functionality guidance; and

Operational workarounds for SRs;
Emergency technical advice and guidance for system outages;
Document the contact details for key Oracle contacts and up to 5 (five) technical and/or end user contacts (“Customer Contacts”) and Oracle’s escalation procedures (“Joint Contacts and Escalation Guide”);

Your ASE will also assist with the following:

Conduct an orientation for your Customer Contacts;
Maintain the Joint Contacts and Escalation Guide;
Review all Oracle Support Services activity, including SR activity in connection with individual SRs logged by you or your Customer Contacts. The review may consist of status reports, next steps, if any, and review of your SR priorities;
Serve as your designated point of contact for Severity 1 and mutually agreed upon Severity 2 SR (collectively, “Critical SRs”) and Oracle Cloud services incidents (“Incidents”). The ASE will provide assistance in managing Critical SRs and Incidents as follows:

- SR and Incident management, prioritization and escalation;
 - Communicate the status of your priority SRs and Incidents to your Customer Contact(s); and
 - Facilitate communications between Oracle and your Customer Contacts.
- Other.
- Advanced Support Assistance If you renew Advanced Support Assistance, your renewal fee for such services will be based on the Advanced Support Assistance pricing policies in effect at the time of renewal.
Advanced Support Assistance may not be available for all programs

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Eloqua Web Based Training Subscription

Part # B74267, 3706003

Provides an unlimited user license to self-paced eLearning titles including:

- RPM Introduction (WBT);
- RPM Basics (WBT);
- or Eloqua Foundation (WBT)
- The Web Based Training (WBT) is provided in digital format to the customer for hosting. Customer is responsible for loading the digital files provided to their LMS and verifying compatibility using the Oracle WBT Test module prior to purchase.

- The license provides unlimited use of the content
- The customer may not , repurpose or provide the content to any 3rd party without the prior written consent of Oracle, which may be withheld at Oracle's sole discretion
- Upon expiration of the subscription term, the content is to be deleted and/or removed from the customer's systems. The customer will certify as to such deletion and/or removal upon written request from Oracle
- If Oracle updates licensed content during the subscription term, Oracle will provide the customer any updates to the underlying content that might have been made by Oracle during the term
- Initial license per title must be purchased for a minimum of 12 months.

RESPONSYS SERVICE DESCRIPTIONS (CX PILLAR)

 - Oracle will configure three (3) WRS database table per WRS Account. The tables will be created

and available within Your Oracle Responsys account.

Oracle recommends the use of no more than three (3) PET tables in a single campaign.

- Raw Event History Retention
 - The raw events collected by the Event Listener will be retained by Oracle for up to thirty calendar (30) days from the time of event collection.

Oracle will provide the following cloud support services as part of this Oracle Cloud Service:

- Address and correct occasional errors in the transfer of files.
- Correct any material defects in T-WRS, based on the priority of the defect.
- Make changes to T-WRS required as a direct result of a process or platform change by Oracle.
- Restart T-WRS event collector due to interruptions caused by Oracle system maintenance.

The Oracle Cloud Services *do not* include:

- Manual production support or manual intervention required to accomplish non-standard tasks
- Investigation, troubleshooting, re-work, or development effort caused by or related to changes or errors by You. Such errors/issues might include:
 - Changes to Your Campaign(s)
 - Bad or non-conforming data passed into T-WRS
- Investigation, troubleshooting, re-work, or development effort caused by or related to You changes to hardware infrastructure, operating system environments, or source systems
- Development effort required for migration of Your systems to a new Oracle release (point release or major release)
- Investigation or monitoring of specific data elements, data-quality, or data relationships resulting from the normal operation of T-WRS. Oracle will monitor the proper functioning of T-WRS, however Oracle does not perform investigation or assessment of specific results and/or possible data quality issues

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies,

including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Web Retargeting Cloud Service- 1,000 Events

Applicable Part # B77936

Users of Oracle Responsys Web Retargeting Cloud Service are authorized to access the following modules:

- Web Retargeting Event Listener
- Web Retargeting Event Processor
- Personalization Data Tables

Usage Limits: The Oracle Responsys Web Retargeting Cloud Service is subject to usage limits based on:

- A maximum number of 1,000 Events as defined in Your order.
- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.

Overage

This Cloud Service is subject to overage fees.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Travel Retargeting Cloud Service- 1,000 Events

Applicable Part # BB85223

Users of Oracle Responsys Travel Retargeting Cloud Service are authorized to access the following features:

- Collect conversion path events transmitted by You from Your website to Oracle.
- Periodically process conversion events into a format usable by the Oracle Responsys Cloud Service.
- Upload events into the Your instance of the Oracle Responsys Cloud Service.

Usage Limits: The Oracle Responsys Travel Retargeting Cloud Service is subject to usage limits based on OMC Service Descriptions 091125

on:

- A maximum number of 1,000 Events as defined in Your order.
- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.

Overage

This Cloud Service is subject to overage fees.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys for Social Cloud Service Set Up Fee-Account

Applicable Part # B78073

As part of the setup of this Oracle Cloud Service, Oracle will perform the following:

- Enable the Social Campaigns feature within the specified Responsys account(s) so You may connect the specified Responsys account(s) with Your Facebook and/or Twitter pages.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys for Social Cloud Service-Account

Applicable Part # B78702

Users of Oracle Responsys Social Cloud Service are authorized to access the following modules:

- Social Campaigns for Facebook
- Social Campaigns for Twitter

Usage Limits: The Oracle Responsys Social Cloud Service is subject to usage limits based on:

- A maximum number of Accounts as defined in Your order.

- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.
- Up to 10 Facebook pages per Account.
- Up to 10 Twitter Pages per Account.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys for Social Cloud Service Sub Account-Account

Applicable Part # B77934

Users of Oracle Responsys Social Cloud Service are authorized to access the following modules:

- Social Campaigns for Facebook
- Social Campaigns for Twitter

Usage Limits: The Oracle Responsys Social Cloud Service is subject to usage limits based on:

- A maximum number of Accounts as defined in Your order.
- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.
- Up to 10 Facebook pages per Account.
- Up to 10 Twitter Pages per Account.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Real-Time Messaging Cloud Service Set Up Fee-Account

Applicable Part # B78074

As part of the setup of this Oracle Cloud Service, Oracle will perform the following:

- Enable Oracle Responsys Real-Time Messaging Account

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Real-Time Messaging-Messages Per Minute

Applicable Part # B77881, B77882

Users of Oracle Responsys Real-Time Messaging Cloud Service are authorized to access the following modules:

- Oracle Responsys Interact
- Oracle Responsys Real-Time Messaging

Usage Limits: The Oracle Responsys Real-Time Messaging Cloud Service is subject to usage limits based on:

- A maximum number of Accounts as defined in Your order.
- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Send Time Optimization Cloud Service - STO Connector - Account

Applicable Part # B81594

Users of the Oracle Responsys Send Time Optimization Cloud Service - STO Connector are authorized to access the following modules:

- Connect

As a prerequisite for this Oracle Cloud Service, You must also separately purchase Cloud Professional Services for the set up and configuration of this service.

Usage Limits: Oracle Responsys Send Time Optimization Cloud Service - STO Connector is subject to usage limits based on:

- A maximum number of Accounts as defined in Your order.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Audience Segmentation Cloud Service – 1 GB of Data Storage

Applicable Part # B93539

The Oracle Audience Segmentation Cloud Service provides Customers with an account for the Oracle Audience Segmentation Cloud Service.

Users are authorized to access the following modules and features:

- Data
- Segmentation
- Account Management
- Integrate

Streaming Entities API is used to ingest specific data into the platform to update relevant data objects. Real-time event API is used to ingest real-time data streams into the platform.

Usage Limits: The Oracle Audience Segmentation Cloud Service is subject to usage limits based on:

- 20 concurrent jobs and a maximum of 500 jobs in a calendar day.
- A maximum of 350 records/sec for the Streaming Entities API .
- A maximum of 500 records/sec for the Real-time event API.
- All user created custom tables count towards total usage against storage limits.
- If Your usage exceeds any or all of the maximum number of concurrent jobs, maximum jobs in a calendar day, maximum number of records per second as set forth herein, Oracle may, in its sole discretion, take proportionate remediation action including limiting Your use of the affected services.

Overage

This cloud service is subject to overage fees.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys AppCloud Platform Fee Cloud Service -- Account

Applicable Part Number: B91244

Description:

Provides access to AppCloud platform which enables access to Responsys apps available in the Marketplace.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies,

including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys AppCloud Framework Services Cloud Service – 1,000 Messages

Applicable Part Number: B91243

Description:

Provides for usage of apps that are enabled in an authorized account on a CPM basis.

Users of Oracle Responsys Interaction Cloud Service are authorized to access the following modules and features:

- AMS: Application Management Services
 - o Manages the application's registration by the app developer, and installation by the user from the marketplace/catalog into a customer's account
- AES: Application Execution Service
 - o Framework to host and execute apps at run time. App developers can use AES in place of finding their own application server to host and execute the application, and all that goes along with that like scalability, redundancy, logging, reporting, encryption, etc.
- AIS: Application Integration Service
 - o A global service that allows a product to exchange needed information with one or more application. AIS will use the state of the systems, the QoS rules and the filters defined in AMS to proceed with or deny the requests. AIS also exposes a single set of APIs for the developers to work and translate/transform as needed.
- Action Service
 - o Execute an action in an external system (e.g. add someone to a Facebook Custom Audience)
- Decision Service
 - o Provide workflow branching decision based on external data (e.g. has someone attended a WebEx)
- Content Service
 - o Insert content in a campaign asset (landing page or email) from external system (e.g. open time content from a vendor like Moveable Ink)
- Menu Service
 - o Augment a core product interface via a contextual link (e.g. Open a Direct Mail campaign designer from the New Campaign workflow)

Usage Limits:

Maximum number of messages as set forth in Your order. Message use is tracked and limits are burned down based on the predetermined usage schedule as set forth in Your order. Usage is CPM-based.

Overage:

Overages are charged at the contracted CPM.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, OMC Service Descriptions 091125

including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

UNITY SERVICE DESCRIPTIONS (CX PILLAR)

Oracle Unity Customer Data Orchestration Platform Cloud Service – 1000 Profiles

Applicable Part # B109580

Users of Oracle Unity Customer Data Orchestration Platform Cloud Service are authorized to access the following modules and features:

Account Management

- Account settings and access controls

Data Management

- Data model, data visibility, data exploration, events
- Profile Explorer, Master entities, intelligent attributes
- Ingest, Export, Enrichment: Jobs, Feeds, Publishing

Data Science

- Intelligent workbench
- Intelligent attributes

Segmentation & Activation

- Segmentation canvas
- Campaign personalization

Analytics

- Analytics Dashboard, Campaign analysis, Campaign performance

Integrations

- All integration methods: sources, destinations, batch, API access
- Streaming Entities API is used to ingest specific data into the platform to update relevant data objects. Real-time event API is used to ingest real-time data streams into the platform.

Usage Limits:

Oracle Unity Customer Data Orchestration Platform Cloud Service is subject to usage limits based on:

- A maximum number of Profiles Stored as set forth in your order.
- Oracle will provision one production environment for this Oracle Cloud Service. Oracle will provision up to two (2) test environments for this Oracle Cloud Service.
- A maximum of 100 concurrent jobs across all environments.
- A maximum of 1500 records/sec for the Streaming Entities API.
- A maximum of 2000 records/sec for the Real-time event API.
- If Your usage exceeds any or all of the number of maximum concurrent jobs, maximum jobs in a calendar day, maximum number of records per second as set forth herein, Oracle may, in its sole discretion, take proportionate remediation action including limiting Your use of the affected services.
- If You use a Third-Party Service in connection with the Services (e.g., You use the Services to transmit data to a third party) then You must adhere to all applicable third party terms (e.g., Terms of Use, Advertising Policies, and/or their equivalents).

Usage of Oracle Unity Behavioral Intelligence Cloud Service Part #B93568 under this contract is subject to the usage limits set forth in the service description for that service.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the *Oracle Cloud Hosting and Delivery Policies*, including the *Oracle SaaS Public Cloud Services Pillar Document*, which may be viewed at www.oracle.com/contracts.

Oracle Unity Behavioral Intelligence Cloud Service – 1,000 Sessions

Applicable Part # B93568

Users of the Oracle Unity Behavioral Intelligence are authorized to access the following modules or features:

- Data Streaming pipeline, fed by
 - Oracle CX Tag with Infinity module for web-based data collection
 - Oracle CX mobile SDK (iOS / Android)
 - Data Collection API
- Connections module and all Connectors contained therein
- Actions module
- Settings
- Analytics
- Testing* & Personalization
- Marketing Recommendations

*The Testing feature will be deprecated as of May 31, 2024.

Usage Limits: Oracle Unity Behavioral Intelligence Cloud Service is subject to usage limits based upon:

- Number of 1,000 Sessions as set forth in Your order
- Row Limits on REST API data extraction in Infinity Analytics – There is a limit of 3M rows per data extraction
- 25 months of event-level data retention
- Oracle Cloud Operations may temporarily regulate incoming client traffic for the Content Generator service if such action required to maintain service performance and/or service stability.
- Oracle can regulate maximum number of products used to train algorithms and produce recommendations based on the customer configuration and level of incoming runtime traffic
- Oracle can regulate incoming client traffic for the runtime service if such action required to maintain service performance and/or service stability.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Unity Streams Cloud Service – 1,000 Sessions

Applicable Part # B93569

Users of the Oracle Unity Streams Cloud Service are provided access to the following:

- Data Streaming pipeline, fed by
 - Oracle CX Tag with Infinity module for web-based data collection
 - Oracle CX mobile SDK (iOS / Android)
 - Data Collection API
- Connections module and all Connectors contained therein
- Actions module, limited to rules-based Actions on live streaming data
- Settings
- Analytics

Usage Limits:

- Limit of 100 distinct Streams running at any one time, which includes all running Actions and queries against the Infinity API
- 3 months of data retention

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Unity Data Connector Cloud Service – 1,000 Sessions

Applicable Part # B93571

Users of the Oracle Unity Data Connector are provided the following:

- Connections – Each connection consists of two elements
- The query that defines the data to be included in the transfer
- The location, format and schedule for the transfer

Usage Limits: The Oracle Unity Data Connector Cloud Services is subject to usage limits based upon:

- Licensing of Unity Data Connector uses the same metric as the Infinity base services, and is limited to the number of 1,000 Sessions as set forth in Your order
- Maximum of 5 active Connections at any time
- 48 hour time limit from the time at which the data is recorded by Oracle in which to retrieve data

Client must have a system capable of consuming the volumes and velocity of data being delivered. Oracle is only responsible for the transmission of the data.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Unity Extended Data Retention Cloud Service – 1,000 Sessions

Applicable Part # B93570

Users of the Oracle Unity Extended Data Retention are provided access to the following:

- Additional 12 months of data beyond standard retention of 25 months, for a total retention of 37 months
- Access to retained data through the calendar selector within the reports
- Export of retained report data through REST API, subject to the 3M row API export limits

Usage Limits: The Oracle Unity Extended Data Retention is subject to usage limits based upon:

- Licensing of Unity Data Connector uses the same metric as the Unity Behavioral Intelligence or Unity Streams base services, and is limited to the number of 1,000 Sessions as set forth in Your order
- Data will be deleted on a monthly basis to maintain a rolling 37 months
-

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle B2B Orchestration Cloud Service – 1000 Contacts

Applicable Part # B109581

Users of Oracle B2B Orchestration Cloud Service are authorized to access the following modules and features:

- Campaign Management
- Contact Management
- Lead Management
- Marketing Effectiveness
- CRM Integration
- System Management
- Oracle Eloqua Standard Branding and Configuration Cloud Service
- Oracle Eloqua Event Management Cloud Service
- Oracle Eloqua Advanced Lead Scoring Cloud Service
- Oracle Eloqua Data Tools Cloud Service
- Oracle Eloqua Security Administration Cloud Service
- Oracle Eloqua Integration API Cloud Service
- Oracle Eloqua Advanced Intelligence Cloud Service
- Oracle Cloud Support
- Oracle Eloqua Business Intelligence Cloud Service
- Oracle Eloqua Marketing Users
- Oracle Eloqua Marketing Approvals Cloud Service
- Oracle Eloqua Engage Cloud Service
- Oracle Eloqua Customer Profiler Cloud Service
- Oracle Eloqua Guided Campaigns Cloud Service

Usage Limits: The Oracle B2B Orchestration Cloud Service is subject to usage limits based on:

- A maximum number of Contacts as defined in your order

- Oracle will provision 1 production environment and 1 non-production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.
- See table below for usage limits allocated per licensed metric

Licensed Metric	Tracked Page Views Per Month	Email Sends Per Month	Email Sends Per Hour	Form Submissions Volume Per Month	Form Submissions Per Hour	API Calls Per Day
Per Production Environment	Up to 5,000,000	Up to 10,000,000	Up to 250,000**	Up to 500,000	Up to 5,000	Up to 100,000

* Email throughput may vary with overall system load, complexity of email content and number of concurrent sending activities.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts

Oracle HIPAA for B2B Orchestration Cloud Service – Each

Applicable Part # B109583

Users of Oracle HIPAA Advanced Data Privacy Cloud Service are authorized to access the following modules:

- Oracle Eloqua Advanced Data Security Cloud Service
- HIPAA Contact Security preventing access to ePHI data
- HIPAA Secure Communication Application for delivery and viewing of emails through secure authenticated channels

Usage Limits: The Oracle Advanced Security Cloud Service is subject to usage limits based on:

- A maximum number of Brands as defined in your Order.
- Oracle will provision this for one production environment and up to 2 Test Environments of Oracle B2B Orchestration Platform. Additional environments may be purchased subject to additional fees.
- The Oracle Eloqua HIPAA Advanced Data Privacy Cloud Service is subject to the usage limits of the Oracle Eloqua Platform Marketing Cloud Service.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle B2C Orchestration Cloud Service - 1000 Interactions

Applicable Part # B109582

Users of Oracle Marketing Automation B2C Cloud Service are authorized to access the following modules and features:

- Campaign
- Insight's Interactive Dashboards
- API/Connect
- CX Apps platform
- Collaboration Cloud Service

- Access to a network of aggregators to select from as part of our self-service SMS model (aka SPAN)
- Mobile SDK
- Within 7 days from Oracle's acceptance of your order, Oracle will begin provisioning a domain based on the branding information provided by you, or if none is provided within that period, Oracle will begin provisioning a non-branded domain.

Usage Limits: The Oracle B2C Orchestration Cloud Service is subject to usage limits based on:

- A maximum number of Messages as defined in your order.
- A maximum number of seven (7) Authorized Users one of which is an automatically generated admin@ user. Additional Users may be added upon request.
- 1 Promotional sending IP address.
- Email from addresses varied by username within the domain/sub-domain assigned to the Responsys account.
- Responsys hosted reply to addresses varied by username within the domain/Sub- domain assigned to the Responsys account.
- Oracle will provision 1 production environment for this Cloud Service. Additional environments may be purchased subject to additional fees.
- As part of the Cloud Support for this Oracle Cloud Service, Oracle will address the following basic email deliverability issues with ISP's (Internet Service Providers):
 - Configure promotional email IP address for a new account.
 - Set up all necessary authentication (DKIM, SPF, DMARC)
 - Monitor critical industry blacklists
 - Monitor deliverability metrics, complaints, bounces - this service will identify abnormal rates, and Oracle will work with Customer to use capabilities of the Oracle Cloud Service to improve email deliverability and will:
 - Interface with ISPs on behalf of senders
 - Open tickets and manages the individual ISP ticket/support process
 - Work with Customer to administer changes within the capabilities of the Oracle Cloud Service to improve email deliverability based on feedback from ISP
 - Transport Layer Security ("TLS ") is used when communicating via SMTP with ISPs, if the target ISP supports TLS with SMTP.
 - TLS is not used when communicating within the Oracle networks prior to sending the message over the internet to the ISPs
 - You shall comply with the following usage guidelines:
 - Supplemental Tables – You may maintain a maximum of 30 supplemental tables per account. Each supplemental table may contain up to a maximum of 35 fields.
 - Profile Extension Tables – You may maintain a maximum of 100 profile extension tables per list table.
 - SQL Views – Oracle's written approval is required before using the "SQL Views" feature of the Oracle Cloud Service.
 - Join Views – The "Join View" feature of the Hosted Service may be used to join up to a maximum of three tables.

- Responsys Connect – Each Connect job may not be run more often than four times per day. Each Connect data upload may only contain incremental data (i.e., updates to existing data or inserts of new data). The aggregate size of daily Interact Connect data uploads may not exceed 1GB per day.
- Responsys Program – It may be used to publish only programs that result in campaign messaging activity.
- Responsys API – It may only be used in compliance with Oracle Responsys's API Developer Guide.
- RPL and Built-In Functions – It may only be used in compliance with Oracle Responsys's RPL and Built-In Functions Guide.
- ANSI SQL Standards – All use of Structured Query Language (SQL) within the Oracle Cloud Service must comply with American National Standards Institute (ANSI) SQL standards.
- IP Address Restriction – For added security, you must enable and use two-step authentication to access the Hosted Service or use the IP Address Restriction feature of the Oracle Responsys Cloud Service.
- Mobile Apps integrated with Oracle Responsys must use the Oracle Responsys Mobile SDK
- Usage guidelines specified for Oracle Responsys Marketing Platform Cloud Service
- A shortened URL's maximum lifespan is 30 calendar days.
- Those customers using our aggregator network to serve their SMS messaging needs must procure code(s) directly from an aggregator available in the network. The aggregator(s) will invoice the customer directly.
- Customer is responsible for any usage charge incurred with the aggregator(s) and must directly pay the aggregator(s). Oracle will not pay the aggregator(s) on your behalf. The aggregator(s) usage fees are not part of the Responsys Interaction SKU.

Overage

This Cloud Service is subject to overage fees.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Full Service Maintenance Messaging Cloud Service – Maintenance Unit

Applicable Part # B109584

Users of Oracle Full Service Maintenance Messaging Cloud Service – Maintenance Unit are authorized to access from the following modules subject to the terms set forth herein:

- Oracle Responsys SMS Dedicated Random Shortcode Cloud Service
- Oracle Responsys SMS Shared Shortcode Cloud Service
- Oracle Responsys SMS Longcode Cloud Service

- Facilitate the setup of the applicable code with supported wireless carriers

Your Obligations:

- Work with the Oracle Mobile Team to answer questions from supported wireless carriers related to your code and mobile programs.

Random Shortcode: is defined as a string of randomly-selected numbers assigned by the short code administration body.

Dedicated Shortcode: is defined as a shortcode phone number owned by a single Customer to use for its campaigns only.

Random Longcode: is defined as a string of randomly-selected numbers assigned by the long code administration body.

Dedicated Longcode: is defined as a longcode phone number owned by a single Customer to use for its campaigns only.

Keyword: is defined as a word or name that is paired with a particular a Shortcode or Longcode and sent by a mobile device to trigger a marketing

Service Usage

Your usage will be measured based on the maintenance units attributed to each country and code type for the wireless carriers that you have enabled to support your Oracle Marketing Automation Responsys SMS Full-Serve Cloud Service Maintenance Fee with a given year. The actual number of Maintenance Units attributed to a country and code type combination are detailed in the table included in the appendix of this Service Description. This Maintenance Unit table reflects 3rd party services and may be updated during Your Services Period to reflect changes in prices by the aggregators.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Full Service Messaging Cloud Service – 1000 Interactions

Applicable Part # B109585

Users of Oracle Full Service Messaging Cloud Service, in country indicated on order are authorized to access the following modules:

- Oracle Full Service Messaging Cloud Service, MT Sent in specified countries
- Oracle Full Service Messaging Cloud Service, MO Sent in specified countries

Usage Limits: The Full-Service Messaging Cloud Service is subject to usage limits based on:

- A maximum number of multiples of 1,000 interactions as defined in Your order.

Overage

This Cloud Service is subject to overage fees.

Usage Rates

Your usage will be measured based on the number of interactions attributed to each SMS, WhatsApp or Rich Communication Service (RCS) message that you send via the Oracle Marketing Automation Responsys SMS Full-Serve Cloud Service client. The actual number of interactions attributed to any SMS, WhatsApp or RCS message is based on the country you are sending to, the code type and aggregator (if multiple are available for one country), as described in the table included in the appendix of this Service Description booklet. This Interaction table reflects 3rd party Services and may be updated during Your Services Period to reflect changes in prices by the aggregators.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Automatic Failover for Transactional Messages Cloud Service – Account

Applicable Part # B109586

As part of the setup of this Oracle Cloud Service, Oracle will perform the following:

- Create and set-up of a secondary failover account and automated data replication/syncing between the primary and failover account.
- Oracle will begin provisioning a domain based on the branding information provided by you within seven (7) days of Your order, or if none is provided within that period, Oracle will begin provisioning a non-branded domain.

Usage Limits: The Oracle Automatic Failover for Transactional Messages Cloud Service is subject to usage limits based on:

- Oracle will provision one production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.
- This Oracle Cloud Service applies only to Messages triggered via a specific endpoint and API function provided by Oracle. It does not cover other API functions. This service does not cover Messages triggered via the Oracle Responsys Marketing Platform Cloud Service or bulk email launches.
- This Oracle Cloud Service provides a secondary environment of Oracle Marketing Automation Responsys Automatic Failover for Transactional Messages Cloud Service to which You may send existing API-triggered transactional campaigns while Your primary environment is not available. You cannot log-in to this secondary environment, and its only purpose is for sending email, push, or SMS messages and collecting response data. The response data will automatically be synchronized back to Your primary environment when that environment becomes available.

This Oracle Cloud Service supports personalization using data values passed-in to the API function and from the campaign's profile list table. It does not support personalization from Profile Extension Tables or Supplemental Tables.

- Oracle Cloud Policies

- Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

RETIRED SERVICE DESCRIPTIONS

Responsys SMS Messaging Cloud Service-MT Sent in Brazil Shortcode-1,000 Messages

Oracle Responsys Marketing Platform Cloud Service-1,000 Messages

Applicable Part # B77854

A one-time custom order for professional services is required when ordering this Cloud Service offering.

Users of Oracle Responsys Marketing Platform Cloud Service are authorized to access the following modules and features:

- Interact Campaign
 - Interact Program
 - Interact Profile
 - Interact Content
 - Interact Insight
-
- Interact API/Connect

Within 7 days from Oracle's acceptance of your order, Oracle will begin provisioning a domain based on the branding information provided by you, or if none is provided within that period, Oracle will begin provisioning a non-branded domain.

Usage Limits: The Oracle Responsys Marketing Platform Cloud Service is subject to usage limits based on:

- A maximum number of Messages as defined in your order.
- a maximum number of seven (7) Authorized Users one of which is an automatically generated admin@<riAccountName> user. Additional Users may be purchased subject to additional fees.
- 1 Promotional sending IP address, which may be associated with a maximum of five (5) domains/sub-domains assigned to Your Responsys Account. Additional transactional sending IP addresses may be purchased subject to additional fees.
- 1 Response Handler URL for all personalizations.
- Unlimited email from each IP address varied by username within the domain/sub-domain assigned to the Responsys Account.
- Unlimited Responsys hosted reply to addresses varied by username within the domain/sub-domain assigned to the Responsys Account.
- Oracle will provision 1 production environment for this Oracle Cloud Service. Additional environments may be purchased subject to additional fees.

As part of the Cloud Support for this Oracle Cloud Service, Oracle will address the following basic email deliverability issues with ISP's (Internet Service Providers):

- Configuring and 'warming up' IP address for a new Customer or when adding new IP addresses to an existing Customer
- Set up all necessary authentication (DKIM, SPF, DMARC)
- Monitor important industry blacklists
- Monitor deliverability metrics, complaints, bounces - this service will identify abnormal rates, and Oracle will work with Customer to use capabilities of the Oracle Cloud Service to improve email deliverability and will:
 - Interface with ISPs on behalf of senders
 - Open tickets and manages the individual ISP ticket/support process
- Work with Customer to administer changes within the capabilities of the Oracle Cloud Service to improve email deliverability based on feedback from ISP

You shall comply with the following usage guidelines:

- Supplemental Tables – You may maintain a maximum of 30 supplemental tables per account. Each supplemental table may contain up to a maximum of 35 fields.
- Profile Extension Tables – You may maintain a maximum of 100 profile extension tables per list table.
- SQL Views – Oracle's written approval is required before using the "SQL Views" feature of the Oracle Cloud Service.
- Join Views – The "Create Join View" feature of the Hosted Service may be used to join up to a maximum of three tables.
- Interact Connect – Each Interact Connect job may not be run more often than four times per day. Each Interact Connect data upload may only contain incremental data (i.e., updates to existing data or inserts of new data). The aggregate size of daily Interact Connect data uploads may not exceed 1GB per day.
- Interact Program – Interact Program may be used to publish only programs that result in campaign messaging activity.

- Interact API – Interact API may only be used in compliance with Oracle's Interact API Developer

Guide.

- Built-In Functions – Built-in functions may only be used in compliance with Oracle's Built-In Functions Guide.
- ANSI SQL Standards – All use of Structured Query Language (SQL) within the Oracle Cloud Service must comply with American National Standards Institute (ANSI) SQL standards.
- IP Address Restriction – For added security, You must enable and use two-step authentication to access the Hosted Service or use the IP Address Restriction feature of the Oracle Cloud Service.

Oracle Responsys Marketing Platform Cloud Service Additional Account Bundle -

Account

Applicable Part #B77904

OMC Service Descriptions 091125

The Oracle Responsys Marketing Platform Cloud Service Additional Account Bundle (“Additional Account Bundle”) provides Users with the capability to access the Oracle Responsys Marketing Platform Cloud Service. The Additional Account Bundle requires You to maintain a subscription to Oracle Responsys Marketing Platform Cloud Service (“Primary Account”). The Additional Account Bundle includes an additional IP address with its own domain branding and SSL enablement. The Additional Account Bundle is connected to the Primary Account with the same contact person, Order Form, and “bill to”. Within 7 days from Oracle's acceptance of your order, Oracle will begin provisioning a domain based on the branding information provided by you, or if none is provided within that period, Oracle will begin provisioning a non-branded domain.

Usage Limits: The Oracle Responsys Marketing Platform Cloud Service Additional Account Bundle is subject to usage limits based on:

- a maximum number of one (1) Authorized Users which is an automatically generated admin@<riAccountName> user. Additional Users may be purchased subject to additional fees or allocated from their Primary Account.

- Request for multiple event types may be in a single request, provided all event types are requested at the same time.

Oracle Cloud Policies Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle Responsys Interaction Cloud Service-1,000 Interactions

Applicable Part # B89416

Users of Oracle Responsys Interaction Cloud Service are authorized to access the following modules and features:

- Responsys Campaign
- Responsys Program
- Responsys Insight’s Interactive Dashboards

- Responsys API/Connect
- Access to a network of aggregators to select from
- Oracle Responsys Mobile SDK

Within 7 days from Oracle's acceptance of your order, Oracle will begin provisioning a domain based on the branding information provided by you, or if none is provided within that period, Oracle will begin provisioning a non-branded domain.

Usage Limits: The Oracle Responsys Interaction Cloud Service is subject to usage limits based on:

- A maximum number of Messages as defined in your order.
- A maximum number of seven (7) Authorized Users one of which is an automatically generated admin@ user. Additional Users may be purchased subject to additional fees.
- 1 Promotional sending IP address, which may be associated with a maximum of five (5) domains/subdomains assigned to your Responsys Account1 Response Handler URL for all personalization.
- Unlimited email from each IP address varied by username within the domain/sub-domain assigned to the Responsys account.
- Unlimited Responsys hosted reply to addresses varied by username within the domain/Sub-domain assigned to the Responsys account.
- Unlimited Responsys hosted reply to addresses varied by username within the domain/sub-domain assigned to the Responsys account.
- Oracle will provision 1 production environment for this Cloud Service. Additional environments may be purchased subject to additional fees.

As part of the Cloud Support for this Oracle Cloud Service, Oracle will address the following basic email deliverability issues with ISP's (Internet Service Providers):

- Configure promotional email IP address for a new account.
- Set up all necessary authentication (DKIM, SPF, DMARC)
- Monitor critical industry blacklists
- Monitor deliverability metrics, complaints, bounces - this service will identify abnormal rates, and Oracle will work with Customer to use capabilities of the Oracle Cloud Service to improve email deliverability and will:
 - Interface with ISPs on behalf of senders
 - Open tickets and manages the individual ISP ticket/support process
- Work with Customer to administer changes within the capabilities of the Oracle Cloud Service to improve email deliverability based on feedback from ISP
- Transport Layer Security ("TLS ") is used when communicating via SMTP with ISPs.
- TLS is not used when communicating within the Oracle networks prior to sending the message over the internet to the ISPs.

You shall comply with the following usage guidelines:

- Supplemental Tables – You may maintain a maximum of 30 supplemental tables per account. Each supplemental table may contain up to a maximum of 35 fields.
 - Profile Extension Tables – You may maintain a maximum of 100 profile extension tables per list table.
 - SQL Views – Oracle’s written approval is required before using the “SQL Views” feature of the Oracle Cloud Service.
 - Join Views – The “Join View” feature of the Hosted Service may be used to join up to a maximum of three tables.
 - Responsys Connect – Each Connect job may not be run more often than four times per day. Each Connect data upload may only contain incremental data (i.e., updates to existing data or inserts of new data). The aggregate size of daily Interact Connect data uploads may not exceed 1GB per day.
 - Responsys Program – It may be used to publish only programs that result in campaign messaging activity.
 - Responsys API – It may only be used in compliance with Oracle Responsys’s API Developer Guide.
 - RPL and Built-In Functions – It may only be used in compliance with Oracle Responsys’s RPL and Built-In Functions Guide.
 - ANSI SQL Standards – All use of Structured Query Language (SQL) within the Oracle Cloud Service must comply with American National Standards Institute (ANSI) SQL standards.
 - IP Address Restriction – For added security, you must enable and use two-step authentication to access the Hosted Service or use the IP Address Restriction feature of the Oracle Responsys Cloud Service.
- Mobile Apps integrated with Oracle Responsys must use the Oracle Responsys Mobile SDK
 - Usage guidelines specified for Oracle Responsys Marketing Platform Cloud Service
 - A shortened URL’s maximum lifespan is 30 calendar days.
 - The customer can access the aggregator network and procure code(s) directly from an aggregator available in the network. The aggregator(s) will invoice the customer directly.
 - Customer is responsible for any usage charge incurred with the aggregator(s) and must directly pay the aggregator(s). Oracle will not pay the aggregator(s) on your behalf. The aggregator(s) usage fees are not part of the Responsys Interaction SKU.

Overage

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Responsys SMS Full-Serve Cloud Service Maintenance Fee – Maintenance Unit

Applicable Part # B92518

Users of Oracle Responsys SMS Full-Serve Cloud Service Maintenance Fee are authorized to access from the following modules subject to the terms set forth herein:

- Oracle Responsys SMS Dedicated Random Shortcode Cloud Service
- Oracle Responsys SMS Shared Shortcode Cloud Service

- Oracle Responsys SMS Longcode Cloud Service
- Facilitate the setup of the applicable code with supported wireless carriers

Your Obligations:

- Work with the Oracle Mobile Team to answer questions from supported wireless carriers related to your code and mobile programs.

Random Shortcode: is defined as a string of randomly-selected numbers assigned by the short code administration body.

Dedicated Shortcode: is defined as a shortcode phone number owned by a single Customer to use for its campaigns only.

Random Longcode: is defined as a string of randomly-selected numbers assigned by the long code administration body.

Dedicated Longcode: is defined as a longcode phone number owned by a single Customer to use for its campaigns only.

Keyword: is defined as a word or name that is paired with a particular a Shortcode or Longcode and sent by a mobile device to trigger a marketing campaign.

Service Usage

Your usage will be measured based on the maintenance units attributed to each country and code type for the wireless carriers that you have enabled to support your Oracle Responsys SMS Full-Serve Cloud Service with a given year. The actual number of Maintenance Units attributed to a country and code type combination are detailed in the table included in the appendix of this Service Description booklet. This Maintenance Unit table reflects 3rd party services and may be updated during Your Services Period to reflect changes in prices by the aggregators.

Oracle Cloud Priority Service for Oracle Marketing Cloud Service

Applicable Part # B74256, B77075

Oracle Cloud Priority Service consists of:

- Support Delivery Management. One Oracle Technical Account Manager (“TAM”) will be assigned to you for the duration of the service period set forth in the ordering document. The TAM will serve as your primary contact for the administration of the services and will communicate with you in a local language (except as noted below).

Your TAM shall provide the following support services:

- Prepare and maintain quarterly service delivery progress reports;
- Document the contact details for key Oracle contacts and up to 5 (five) technical and/or end user contacts (“Customer Contacts”) and Oracle’s escalation procedures (“Joint Contacts and Escalation Guide”);
- Provide access to a customer-specific web portal.

Your TAM will also assist with the following:

- Conduct an orientation for your Customer Contacts;
- Conduct a delivery planning session;
- Maintain the service delivery plan;
- Perform quarterly service delivery plan reviews;
- Maintain the Joint Contacts and Escalation Guide;
- Review all Oracle Support Services activity, including service request (“SR”) activity in connection with individual SRs logged by you or your Customer Contacts. The review may consist of status reports, next steps, if any, and review of your SR priorities;
- Serve as your designated point of contact for Severity 1 and mutually agreed upon Severity 2 SR (collectively, “Critical SRs”) and Oracle Cloud services incidents (“Incidents”). The TAM will provide assistance in managing Critical SRs and Incidents as follows:

SR and Incident management, prioritization and escalation;

Communicate the status of your priority SRs and Incidents to your Customer Contact(s); and
Facilitate communications between Oracle and your Customer Contacts.
Facilitate your access to monthly web conference sessions delivered in English featuring Oracle products.

Prioritization.

Oracle will give you priority access to change windows related to your Oracle Cloud services;

Oracle will prioritize your SRs and Incidents above SRs and Incidents of the same severity level submitted by other Oracle Cloud services customers. Oracle will respond to your SRs and Incidents per the following guidelines (“Service Request Response Guidelines”):

90% of Severity 1 SRs and Incidents within one (1) hour (24x7);
90% of Severity 2 SRs and Incidents within two and one half (2.5) local business hours;
90% of Severity 3 SRs and Incidents within the next local business day; and
90% of Severity 4 SRs and Incidents within the next local business day.

Oracle will initiate internal escalations for Severity 1 and Severity 2 SRs and Severity 1 and Severity 2 Incidents according to the Service Request Response Guidelines; and

Oracle will communicate SRs and Incidents to Oracle Product Development, as appropriate.

□ Other.

If you renew Oracle Cloud Priority Service, your renewal fee for such services will be based on the Oracle Cloud Priority Service pricing policies in effect at the time of renewal.

Oracle Cloud Priority Service may not be available for all programs.

TAM is available 1 day a week over a 12-month period.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which

may be viewed at www.oracle.com/contracts.

Oracle Cloud Priority Service for Oracle Eloqua Marketing Cloud Service – Enterprise TAM

Applicable Part #B85323

Oracle Cloud Priority Service consists of:

- Support Delivery Management. One Oracle Technical Account Manager (“TAM”) will be assigned to you for the duration of the service period set forth in the ordering document. The TAM will serve as your primary contact for the administration of the services and will communicate with you in English (except where a local language is available).
- a. Your TAM shall provide the following support services:
 - Prepare and maintain quarterly service delivery progress reports;
 - Document the contact details for key Oracle contacts and up to 5 (five) technical and/or end user contacts (“Customer Contacts”) and Oracle’s escalation procedures (“Joint Contacts and Escalation Guide”);
 - Provide access to a customer-specific web portal.

□ Your TAM will also assist with the following:

- Conduct an orientation for your Customer Contacts;
- Conduct a delivery planning session;
- Maintain the service delivery plan;
- Perform quarterly service delivery plan reviews;
- Maintain the Joint Contacts and Escalation Guide;
- Review all Oracle Support Services activity, including service request (“SR”) activity in connection with individual SRs logged by you or your Customer Contacts. The review may consist of status reports, next steps, if any, and review of your SR priorities;
- Serve as your designated point of contact for Severity 1 and mutually agreed upon Severity 2 SR (collectively, “Critical SRs”) and Oracle Cloud services incidents (“Incidents”). The TAM will provide assistance in managing Critical SRs and Incidents as follows:

- SR and Incident management, prioritization and escalation;

- Communicate the status of your priority SRs and Incidents to your Customer Contact(s); and
 - Facilitate communications between Oracle and your Customer Contacts.

Facilitate your access to monthly web conference sessions delivered in English featuring Oracle products.

□ **Prioritization.**

Oracle will give you priority access to change windows related to your Oracle Cloud services;

Oracle will prioritize your SRs and Incidents above SRs and Incidents of the same severity level submitted by other Oracle Cloud services customers.

Oracle will respond to your SRs and Incidents per the following guidelines (“Service Request Response Guidelines”): ^[1]_{SEP}

90% of Severity 1 SRs and Incidents within one (1) hour (24x7);

90% of Severity 2 SRs and Incidents within two and one half (2.5) local business hours;

90% of Severity 3 SRs and Incidents within the next local business day; and

90% of Severity 4 SRs and Incidents within the next local business day.

Oracle will initiate internal escalations for Severity 1 and Severity 2 SRs and Severity 1 and Severity 2 Incidents according to the Service Request Response Guidelines; and

Oracle will communicate SRs and Incidents to Oracle Product Development, as appropriate.

□ **Advice and Guidance.**

User adoption strategy;

Guidance for operational and supportability requirements;

Coordination with your systems integrator(s);

Find any chronic issues and develop a “get-well” roadmap.

□ **Governance Assistance.**

Participate in your program management office (“PMO”) and steering committees;

Ensure customer understands how to work with Oracle Support;

Enterprise Solution support planning.

□ **Other.**

If you renew Oracle Cloud Priority Service, your renewal fee for such services will be based on the Oracle Cloud Priority Service pricing policies in effect at the time of renewal.

Oracle Cloud Priority Service may not be available for all programs.

TAM is available 2 ½ days a week over a 12-month period.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle Cloud Priority Service for Oracle Eloqua Marketing Cloud Service – Dedicated Enterprise TAM

Applicable Part #B85324

Oracle Cloud Priority Service consists of:

- Support Delivery Management. One Oracle Technical Account Manager (“TAM”) will be assigned to you for the duration of the service period set forth in the ordering document. The TAM will serve as your primary contact for the administration of the services and will communicate with you in English (except where a local language is available).
- a. Your TAM shall provide the following support services:
1. Prepare and maintain quarterly service delivery progress reports;
 - Document the contact details for key Oracle contacts and up to 5 (five) technical and/or end user contacts (“Customer Contacts”) and Oracle’s escalation procedures (“Joint Contacts and Escalation Guide”);
 - Provide access to a customer-specific web portal.

Oracle Cloud Priority Service for Oracle Eloqua Marketing Cloud Service Multi Region Support Add-on

Applicable Part #'s B74255, 20202000, B77076

Oracle Eloqua Marketing Multi-Region Add-on to Cloud Priority Service consists of:

- Support Delivery Management. Two additional Technical Account Managers (“TAM”) will be assigned to you for the duration of the service period set forth in the ordering document. The additional TAMs will be assigned in two geographic regions in addition to the TAM provided in the region for Cloud Priority Service.

2.

- Your TAMs shall provide the following support services for each region:
- Prepare and maintain quarterly service delivery progress reports;

Document the contact details for key Oracle and your appropriate technical contacts (“Customer Contacts”) and Oracle’s escalation procedures (“Joint Contacts and Escalation Guide”); and

Provide access to a customer-specific web portal.

Your TAM will also assist with the following for each region:

Conduct an orientation for your Customer Contacts;

Conduct a delivery planning session;
Maintain the service delivery plan;
Perform quarterly service delivery plan reviews;
Maintain the Joint Contacts and Escalation Guide;
Review all Oracle Support Services activity, including service request (“SR”) activity in connection with individual SRs logged by you or your Customer Contacts. The review may consist of status reports, next steps, if any, and review of your SR priorities;
Serve as your designated point of contact for Severity 1 and mutually agreed upon Severity 2 SR (collectively, “Critical SRs”) and Oracle Cloud services incidents (“Incidents”). The TAM will provide assistance in managing Critical SRs and Incidents as follows:
SR and Incident management, prioritization and escalation;

Communicate the status of your priority SRs and Incidents to your Customer Contact(s); and

Facilitate communications between Oracle and your Customer Contacts.

Facilitate your access to monthly web conference sessions delivered in English featuring Oracle products.

□ Prioritization.

Oracle will give you priority access to change windows related to your Oracle Cloud Priority Services;

Oracle will prioritize your SRs and Incidents above SRs and Incidents of the same severity level submitted by other Oracle Cloud services customers. Oracle will respond to your SRs and Incidents per the following guidelines (“Service Request Response Guidelines”): ^[1]_{SEP}

- (b) tracking, alerting, or other monitoring of sensitive events (including but not limited to protests, rallies, or community organization meetings);

(2) any entity (including but not limited to a public sector entity whose primary function or mission includes conducting surveillance or gathering intelligence) for the purposes of conducting or providing surveillance, analysis or research that isolates a group of individuals or any single individual for any unlawful or discriminatory purpose or in a manner that would be inconsistent with Twitter's users' reasonable expectations of privacy; or

(3) any entity to target, segment, or profile individuals based on health (including pregnancy), negative financial status or conditions, political affiliation or beliefs, racial or ethnic origin, religious or philosophical affiliation or beliefs, sex life or sexual orientation, trade union membership, data relating to any alleged or actual commission of a crime, or any other sensitive categories of personal information prohibited by law.

In the event You are a governmental entity or governmental-related entity or an entity that will provide content to such governmental/governmental-related entity and You have a use case for the Oracle Social Cloud Service that You believe does not meet the restricted use case above, You may provide a description of the use case to Oracle and we will seek approval from Twitter for Your use. If approved, we will memorialize this approved use case in Your contract with Oracle.

Other Social Media Sites

Oracle Social Cloud Service may enable You to link to, transmit Your Content or Third Party Content to, or otherwise access, or retrieve content from, other web sites, platforms or services of third parties. Oracle does not control and is not responsible for such third party web sites, platforms and services and You are solely responsible for entering into and compliance with separate terms with such third party. Oracle is not responsible for the security, protection or confidentiality of such content (including obligations in the Oracle Cloud Hosting and Delivery Policies and Data Processing Agreement and Oracle's Privacy Policy)

that is transmitted to such third parties.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud- Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle Social Cloud, Enterprise – Production Environment

Part # B88388

Oracle Social Cloud, Enterprise – Message Data – 1,000 Messages

Part # B88391

Users of Oracle Social Cloud, Standard are authorized to access the following modules and features:

- Social Application
 - Listening data, social analytics, engagement and response.
 - *Unlimited Topics, Indicators, Queries, Users, Historical Data Topic Days, Channels (Social Properties)
- Social Platform
 - Access to APIs

Usage Limits:

- Oracle will provision 1 production environment for this Oracle Cloud Service.
- The Oracle Social Cloud, Enterprise – Message Data is subject to usage limits based on the following:
- Minimum Commitment of 15,000,000 Messages / year.

*Subject to current platform limitations.

You may use the application programming interfaces of this Oracle Cloud Service, (APIs) solely to interface the applications on Your system with this Oracle Cloud Service. You are responsible for enabling your access to, and your use of the APIs with Oracle, for your use of the APIs, and for any set up, configurations or modifications necessary for the APIs to interface with your applications.

Third Party Content and Social Media Providers

Oracle Social Cloud Service includes content provided by Third Party Content providers and is subject to policies of such Third Party Content providers as described below. By using this Oracle Cloud Service, You represent that You are in compliance with all of the Third Party Content providers' policies described in this service description.

Twitter

Twitter content and information derived from Twitter content may not be made available to:

(1) any governmental entity or governmental-related entity (any entity that is owned, managed, controlled or partially controlled by a government) or entities providing services to such entities for surveillance purposes, including but not limited to:

- (a) investigating or tracking Twitter's users or their content; or
- (b) tracking, alerting, or other monitoring of sensitive events (including but not limited to protests, rallies, or community organization meetings);

(2) any entity (including but not limited to a public sector entity whose primary function or mission includes conducting surveillance or gathering intelligence) for the purposes of conducting or providing surveillance, analysis or research that isolates a group of individuals or any single individual for any unlawful or discriminatory purpose or in a manner that would be inconsistent with Twitter's users' reasonable expectations of privacy; or

(3) any entity to target, segment, or profile individuals based on health (including pregnancy), negative financial status or conditions, political affiliation or beliefs, racial or ethnic origin, religious or philosophical affiliation or beliefs, sex life or sexual orientation, trade union membership, data relating to any alleged or actual commission of a crime, or any other sensitive categories of personal information prohibited by law.

In the event You are a governmental entity or governmental-related entity or an entity that will provide content to such governmental/governmental-related entity and You have a use case for the Oracle Social Cloud Service that You believe does not meet the restricted use case above, You may provide a description of the use case to Oracle and we will seek approval from Twitter for Your use. If approved, we will memorialize this approved use case in Your contract with Oracle.

Other Social Media Sites

Oracle Social Cloud Service may enable You to link to, transmit Your Content or Third Party Content to, or otherwise access, or retrieve content from, other web sites, platforms or services of third parties. Oracle does not control and is not responsible for such third party web sites, platforms and services and You are solely responsible for entering into and compliance with separate terms with such third party. Oracle is not responsible for the security, protection or confidentiality of such content (including obligations in the Oracle Cloud Hosting and Delivery Policies and Data Processing Agreement and Oracle's Privacy Policy) that is transmitted to such third parties.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud- Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle Social Media Manager Cloud Service – 1,000 Messages

Part # B90745

Users of Oracle Social Media Manager Cloud Service are authorized to access the following modules and features:

- Social Application
 - Listening data, social analytics, engagement and response.
 - *Unlimited Topics, Indicators, Queries, Users, Historical Data Topic Days, Channels (Social Properties)
- Social Platform
 - Access to APIs

*Subject to current platform limitations.

Usage Limits:

- Oracle will provision 1 production environment for this Oracle Cloud Service.
- The Oracle Social Media Manager Cloud Service is subject to usage limits based on the following:
 - Minimum Commitment of 500,000 Messages / year.

Overage:

- This Cloud Service is subject to overage fees.

You may use the application programming interfaces of this Oracle Cloud Service, (APIs) solely to interface the applications on Your system with this Oracle Cloud Service. You are responsible for enabling your access to, and your use of the APIs with Oracle, for your use of the APIs, and for any set up, configurations or modifications necessary for the APIs to interface with your applications.

Third Party Content and Social Media Providers

Oracle Social Cloud Service includes content provided by Third Party Content providers and is subject to policies of such Third Party Content providers as described below. By using this Oracle Cloud Service, You represent that You are in compliance with all of the Third Party Content providers' policies described in this service description.

Twitter

Twitter content and information derived from Twitter content may not be made available to:

(1) any governmental entity or governmental-related entity (any entity that is owned, managed, controlled or partially controlled by a government) or entities providing services to such entities for surveillance purposes, including but not limited to:

- (a) investigating or tracking Twitter's users or their content; or
- (b) tracking, alerting, or other monitoring of sensitive events (including but not limited to protests, rallies, or community organization meetings);

(2) any entity (including but not limited to a public sector entity whose primary function or mission includes conducting surveillance or gathering intelligence) for the purposes of conducting or providing surveillance, analysis or research that isolates a group of individuals or any single individual for any unlawful or discriminatory purpose or in a manner that would be inconsistent with Twitter's users' reasonable expectations of privacy; or

(3) any entity to target, segment, or profile individuals based on health (including pregnancy), negative financial status or conditions, political affiliation or beliefs, racial or ethnic origin, religious or philosophical affiliation or beliefs, sex life or sexual orientation, trade union membership, data relating to any alleged or actual commission of a crime, or any other sensitive categories of personal information prohibited by law.

In the event You are a governmental entity or governmental-related entity or an entity that will provide content to such governmental/governmental-related entity and You have a use case for the Oracle Social Cloud Service that You believe does not meet the restricted use case above, You may provide a

description of the use case to Oracle and we will seek approval from Twitter for Your use. If approved, we will memorialize this approved use case in Your contract with Oracle.

Other Social Media Sites

Oracle Social Cloud Service may enable You to link to, transmit Your Content or Third Party Content to, or otherwise access, or retrieve content from, other web sites, platforms or services of third parties. Oracle does not control and is not responsible for such third party web sites, platforms and services and You are solely responsible for entering into and compliance with separate terms with such third party. Oracle is not responsible for the security, protection or confidentiality of such content (including obligations in the Oracle Cloud Hosting and Delivery Policies and Data Processing Agreement and Oracle's Privacy Policy) that is transmitted to such third parties.

Your order for this Oracle Cloud Service is subject to the Oracle Cloud- Hosting and Delivery Policies, which may be viewed at www.oracle.com/contracts.

Oracle Social Cloud, Chinese Social Networks

Part #B88413

Users of Oracle Social Cloud, Chinese Social Networks are authorized to access the following module:

- p Chinese Social Networks.

Usage Limits:

- Allows Social Customers to listen to one or more of the Chinese Social Networks: Sina Weibo, Discuzz! and Tencent Weibo.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Your order for this Oracle Cloud Service is subject to Auto Renewal under the terms of the Agreement.

Oracle Infinity Digital Analytics & Streams Cloud Service – 1,000 Server Calls

Part # B88840

Users of the Oracle Infinity Digital Analytics & Streams Cloud Service are authorized to access the following modules or features:

- Infinity Tag for data collection
- Infinity iOS and/or Android SDKs
- Report Collections
- Reports – Default Reports + Report Builder
- Reusable Report Objects, including Dimensions, Measures and Segments, and their associated in-application Builders
- Library
- Account Settings

- Streams module
- Action Center module
- REST API for Report Data Extraction
- Streams API

Usage Limits: Oracle Infinity Digital Analytics & Streams Cloud Service is subject to usage limits based upon:

- Number of 1,000 Server Calls as set forth in Your order.
- Row Limits on REST API data extraction – There is a limit of 3M rows per data extraction
- 25 months of customer data retention

This service does not encrypt data at rest.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Data Connector Cloud Service – 1,000 Server Calls

Part # B88841

Users of the Oracle Infinity Data Connector are provided the following:

- Connections – Each connection consists of two elements
 - The Infinity query that defines the data to be included in the transfer
 - The location, format and schedule for the transfer

Usage Limits: The Oracle Infinity Data Connector Cloud Services is subject to usage limits based upon:

- Maximum of 5 active Connections at any time
- 48 hour time limit from the time at which the data is recorded by Oracle in which to retrieve data
- Client must have a system capable of consuming the volumes and velocity of data being delivered. Oracle is only responsible for the transmission of the data.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Streams Cloud Service – 1,000 Server Calls

Part # B88842

Users of the Oracle Infinity Streams Cloud Service are provided access to the following:

- Infinity Tag for data collection
- Infinity iOS and/or Android SDKs
- Access to the Streams module
- Access to Action Center module and all Connectors contained therein
- Ability to define and save Streams Labs
- Access to the Streams API
- Ability to connect saved Streams Labs to actions within Action Center

Usage Limits:

- Limit of 100 distinct Streams running at any one time, which includes all running Actions
- No data retention

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Extended Data Retention – 1,000 Server Calls

Part # B88843

Users of the Oracle Infinity Extended Data Retention are provided access to the following:

Users of the Oracle Infinity Extended Data Retention are provided access to the following:

- Additional 12 months of data beyond standard retention of 25 months, for a total retention of 37 months
- Access to retained data through the calendar selector within the reports
- Export of retained report data through REST API, subject to the 3M row API export limits
- Data will be deleted on a monthly basis to maintain a rolling 37 months

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity IQ Cloud Service – 1,000 Sessions

Applicable Part # B92792

Users of the Oracle Infinity IQ Cloud Service are authorized to access the following modules or features:

- Data Streaming pipeline, fed by
 - Oracle CX Tag with Infinity module for web-based data collection
 - Oracle CX mobile SDK (iOS / Android)
 - Data Collection API
- Connections module and all Connectors contained therein
- Actions module
- Account Settings
- Analytics
- Testing & Personalization
- Marketing Recommendations

Usage Limits: Oracle Infinity IQ Cloud Service is subject to usage limits based upon:

- Number of 1,000 Sessions as set forth in Your order
- Row Limits on REST API data extraction in Infinity Analytics – There is a limit of 3M rows per data extraction
- 25 months of event-level data retention
- Oracle Cloud Operations may temporarily regulate incoming client traffic for the Content Generator service if such action required to maintain service performance and/or service stability.
- Oracle can regulate maximum number of products used to train algorithms and produce recommendations based on the customer configuration and level of incoming runtime traffic
- Oracle can regulate incoming client traffic for the runtime service if such action required to maintain service performance and/or service stability.

This service does not encrypt data at rest.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Streams Cloud Service – 1,000 Sessions

Applicable Part # B92793

Users of the Oracle Infinity Streams Cloud Service are provided access to the following:

- Data Streaming pipeline, fed by
 - Oracle CX Tag with Infinity module for web-based data collection
 - Oracle CX mobile SDK (iOS / Android)
 - Data Collection API
- Connections module and all Connectors contained therein
- Actions module, limited to rules-based Actions on live streaming data

Usage Limits:

- Limit of 100 distinct Streams running at any one time, which includes all running Actions and queries against the Infinity API
- 3 months of data retention

This service does not encrypt data at rest.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Data Connector Cloud Service – 1,000 Sessions

Applicable Part # B92795

Users of the Oracle Infinity Data Connector are provided the following:

- Connections – Each connection consists of two elements
- The Unity query that defines the data to be included in the transfer
- The location, format and schedule for the transfer

Usage Limits: The Oracle Infinity Data Connector Cloud Services is subject to usage limits based upon:

- Licensing of Infinity Data Connector uses the same metric as the Infinity base services, and is limited to the number of 1,000 Sessions as set forth in Your order
- Maximum of 5 active Connections at any time
- 48 hour time limit from the time at which the data is recorded by Oracle in which to retrieve data

Client must have a system capable of consuming the volumes and velocity of data being delivered. Oracle is only responsible for the transmission of the data.

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Infinity Extended Data Retention Cloud Service – 1,000 Sessions

Applicable Part # B92794

Users of the Oracle Infinity Extended Data Retention are provided access to the following:

- Additional 12 months of data beyond standard retention of 25 months, for a total retention of 37 months
- Access to retained data through the calendar selector within the reports
- Export of retained report data through REST API, subject to the 3M row API export limits

Usage Limits: The Oracle Infinity Extended Data Retention is subject to usage limits based upon:

- Licensing of Infinity Data Connector uses the same metric as the Infinity base services, and is limited to the number of 1,000 Sessions as set forth in Your order
- Data will be deleted on a monthly basis to maintain a rolling 37 months

-

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document and the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts

Oracle Marketing Automation Responsys Marketing Platform Cloud Service - Additional Full User - Hosted Named User

Applicable Part: B93600

The Oracle Marketing Automation Responsys Marketing Platform Cloud Service - Additional Full User - Hosted Named User provides Authorized Users with the capability to access the Oracle Responsys Marketing Platform Cloud Service.

Usage Limits:

- A maximum number of Authorized Users (Hosted Named User) as set forth in Your order.
- The Oracle Marketing Automation Responsys Marketing Platform Cloud Service - Additional Full User - Hosted Named User is subject to usage limits specified for the Oracle Responsys Marketing Platform Cloud Service.

Oracle Cloud Policies

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies, including the Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts.

Oracle Unity Cloud Service - 1000 Profiles Stored

Part # B92618

Users of Oracle Unity Cloud Service are authorized to access the following modules and features:

Account Management

- Account settings and access controls

Data Management

- Data model, data visibility, data exploration, events
- Profile Explorer, Master entities, intelligent attributes
- Ingest, Export, Enrichment: Jobs, Feeds, Publishing

Data Science

- Intelligent workbench
- Intelligent attributes

Segmentation & Activation

- Segmentation canvas
- Campaign personalization

Analytics

- Analytics Dashboard, Campaign analysis, Campaign performance

Integrations

- All integration methods: sources, destinations, batch, API access

Streaming Entities API is used to ingest specific data into the platform to update relevant data objects. Real-time event API is used to ingest real-time data streams into the platform.

Usage Limits: Oracle Unity Cloud Service is subject to usage limits based on:

- A maximum number of Profiles Stored as set forth in your order.
- Oracle will provision one production environment for this Oracle Cloud Service. Oracle will provision up to two (2) test environments for this Oracle Cloud Service.
- A maximum of 100 concurrent jobs across all environments.
- A maximum of 1500 records/sec for the Streaming Entities API.
- A maximum of 2000 records/sec for the Real-time event API.
- If Your usage exceeds any or all of the number of maximum concurrent jobs, maximum jobs in a calendar day, maximum number of records per second as set forth herein, Oracle may, in its sole discretion, take proportionate remediation action including limiting Your use of the affected services.
- If You use a Third Party Service in connection with the Services (e.g., You use the Services to transmit data to a third party) then You must adhere to all applicable third party terms (e.g., Terms of Use, Advertising Policies, and/or their equivalents).

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the *Oracle Cloud Hosting and Delivery Policies*, including the *Oracle SaaS Public Cloud Services Pillar Document*, which may be viewed at www.oracle.com/contracts.

Oracle Unity Recommendations Cloud Service – 1,000 Interactions

Part # B91912

Users of the Oracle Unity Recommendations Cloud Service are authorized to use the following:

- All available algorithms and filters for use in any available application or channel to deliver content, product, and/or service recommendations

Usage Limits:

- Oracle Cloud Operations can temporarily regulate incoming client traffic if such action is required to maintain service performance and/or service stability.
- Oracle can regulate maximum number of products used to train algorithms and produce recommendations based on the customer configuration and level of incoming runtime traffic

Oracle Cloud Policies:

Your order for this Oracle Cloud Service is subject to the Oracle Cloud Hosting and Delivery Policies and Oracle SaaS Public Cloud Services Pillar Document, which may be viewed at www.oracle.com/contracts
