

## Oracle Secure Backup (OSB) 12.1.0.3.0 Supported Platforms and Browsers

<b>Platforms</b>		<b>Operating Systems and Versions</b>	
AIX		6.1, 7.1	
HP-UX		11.31	
Linux x86 (64bit)		RH5.6+, RH6, RH7, OEL5.6+, OEL6, OEL7, SLES11	
SPARC (64-bit)		Solaris 10_u10 (8/11), 11, Linux 1.0	
Solaris x86 (64-bit)		Solaris 10_u10 (8/11), 11	
Windows x86 (64-bit)		Windows 7, 2008R2, 2012, 2012R2, Windows 10	
<b>Virtualization</b>			
Oracle VM Server for Linux, Solaris x86 and Windows		Linux, Solaris x86 and Windows An Oracle VM Server may be configured in the Oracle Secure Backup Administrative Server and/or Client role(s). A VM Server can be configured in the Media Server role only if an OSB diskpool device is used. Tape devices are not supported because they require SCSI pass through which is not supported.	
Oracle VM Server for Solaris SPARC		Solaris SPARC - All Oracle Secure Backup roles are supported. Tape and OSB diskpool devices are supported - Refer to My Oracle Support note 1577295.1 – Implementing Oracle Secure Backup Media Servers in Oracle VM for SPARC domains	
<b>NAS devices</b>		<b>Operating Systems and Versions</b>	
Oracle Pillar Axiom 300, 500 and 600		2.6, 3.0, 4.2 and 4.6	
Oracle ZFS Storage Appliance		2010.Q3, 2011.1.1, 2013.1.3.0 Refer to My Oracle Support Note 1302117.1 for additional qualification details	
<b>OSB Web Tool: Supported Browsers</b>			
Google Chrome 39-55 Internet Explorer 10, 11 Mozilla Firefox 34, 35, 50 Safari 8, 9.1.2		The browser and version is supported by Oracle Secure Backup as supported by the underlying platform. Typical OSB configurations will run the webserver daemons on the admin. The OSB webserver will be accessed from the user's desktop running the browsers as listed.	

Please refer to Certifications on My Oracle Support for additional information pertaining to supported platforms, operating system, NAS devices and qualification details.
