

ORACLE

Maximize Your Investment with

Oracle Applications Unlimited

Since the beginning, Oracle has delivered the technical support you need to drive your business.

We See The Big Picture

The Applications Unlimited Products:

 Oracle E-Business Suite

 JD Edwards EnterpriseOne

 PeopleSoft

 Siebel CRM

 Oracle Hyperion

Oracle recognizes that Applications Unlimited products are central to your strategy and long-term roadmap. You've integrated these applications into your business model and we're committed to help you maximize your investment.

The current Continuous Innovation release for the Applications Unlimited products gives you the latest features and functionality without major upgrades.

How Applications Unlimited Works

With the latest Continuous Innovation release, we've eliminated major upgrades, saving you time and money that you can apply to your business priorities.

Access new features without major upgrades.

New functionality delivered as updates to the existing Continuous Innovation release.

Fixes and updates are cumulative and available in most current releases.

Our Commitment To Excellence Starts With You

Committed to Customers:

Customers can maximize and expand their existing Oracle Applications investment with support that allows time for future planning, both on-premises and in Oracle Cloud.

PRODUCTS

INNOVATION

Committed to Products:

Customers can rely on our on-premises applications and expertise to run their business.

Committed to Innovation:

Customers can depend on Oracle to continue investing in Continuous Innovation releases.

Key Benefits Of Applications Unlimited

On-premises or in Oracle Cloud, your choice

New features without major upgrades in the Continuous Innovation release

Ample time to allocate resources for the future

More value from your business customizations

Trusted

Hundreds of thousands of customers worldwide rely on Oracle Support.

“Oracle Support is our partner—they explain the application roadmap and we can design our projects around it, building a holistic strategy and a roadmap for our entire organization.”

- **Automotive customer**

Secure

Oracle owns the source code and has the tools and the ability to develop security updates.

“We rely on Oracle to keep us safe, with patches at the source to secure our systems and best practices to help us navigate risks.”

- **Professional consulting services customer**

Comprehensive

“Our relationship with Oracle Support is pivotal. They help us implement correctly, follow best practices, and avoid issues others have already found. With Oracle Support, we get even more out of our investment.”

- **Financial services customer**

You can expect integrated support and product updates with a single point of accountability.

Gain the flexibility to move your Applications Unlimited products—with your business customizations—to the Oracle Cloud, as needed by your business.
