Oracle Communications Consulting (OCC) helps your enterprise get the most out of OSDMC

Oracle Session Delivery Management Cloud (OSDMC) is built on Oracle’s next-generation cloud infrastructure and designed to help customers minimize operational costs in a more intuitive, agile, and secure way that can be only delivered by Oracle cloud-based technologies. As a feature-rich SaaS solution with complete FCAPS (Fault, Configuration, Accounting, Performance, and Security), OSDMC provides an insightful and unified view across the Oracle Communications Session Delivery products portfolio. By utilizing OSDMC, your organization need not worry about the complex and time-consuming tasks of installing, provisioning, upgrading, and applying security fixes to the management system.

**OSDMC OVERVIEW**

Oracle Session Delivery Management Cloud provides a cloud native service framework upon which various applications are supported for the management of Oracle Communications network functions. Current and future Oracle Communications Session Delivery products and versions are supported by default. OSDMC eliminates the need to install, provision, upgrade and apply security fixes for the management system.

Through a convenient, easy-to-read dashboard, OSDMC facilitates configuration, device, security and fault management with a unified view across your whole network.

**Key Business Benefits:**

- Leverages Oracle’s Next-Generation Cloud Infrastructure
- Runs on Oracle Cloud: The most secure cloud in the industry
- Provides a unified view across the Oracle Communications Session Delivery product portfolio
- Streamlines operations and eliminates the need to maintain the management system
- Helps customers minimize operational cost and resources
OSDMC is the first step towards a future-proof solution capable of addressing enterprises and service providers’ network operations management requirements across their increasingly complex networks. OSDMC helps customers in their evolution path from on-premise towards cloud transformation, in a more cost effective and agile way.

**ORACLE COMMUNICATIONS CONSULTING SOLUTION SET**

Oracle Communications Consulting offers a variety of services (OSDMC Solution Set) designed to expedite SaaS turn-up, integration, and evolution delivered by experienced Oracle Communications Consultants. The solution set leverages Oracle’s True Cloud Method (TCM), which supports rapid enablement of OSDMC functionality to quickly and cost effectively deploy this SaaS offering and integrate it with applicable Oracle products including: Oracle Communications: Session Border Controller (SBC), Enterprise Session Border Controller (E-SBC), Core Session Manager (CSM), Session Router (SR), Session Load Balancer (SLB), and Enterprise Communications Broker (ECB).

Following industry leading practices, the OSDMC Solution Set is designed to expedite service and customer enablement, integration, validation and provides comprehensive documentation which allows customers to achieve desired outcomes while avoiding problems and unforeseen complications.

The following Solution Set enables consumers of OSDMC to on-board the SaaS platform efficiently, integrate relevant network elements, and monitor, tune, and adjust the Cloud offering as new features and functionalities become available. The Solution Set includes:

- Project Management and Communication Plan
- Topology Mapping
- FCAPS Target Operating Model, Deployment Strategy and Implementation for the OSDMC:
  - Device Manager
  - Configuration Manager
  - Security Manager
  - Fault Manager
- Production Cutover Strategy and Plan
- New Feature Implementation Strategy and Plan

The Session Delivery Manager Cloud Solution Set is delivered in this way to ensure each user of OSDMC is using the platform to the fullest and most efficient extent possible based on their individualized Operational and Business needs.

Oracle Communications Consulting bridges the human/technology gap by empowering organizations to unlock the full potential of their investments.
