

BRING A DATA-DRIVEN STRATEGY TO TV

The evolving TV landscape gives consumers more viewing options than ever before, challenging advertisers media-buying habits. Oracle Data Cloud can help reach the right consumer on every screen in the home with audiences built from the best offline purchase-based data, online intent, and behavioral signals that extend your digital reach to TV.

AUDIENCES BUILT FROM:

7.5T

data points collected monthly

\$5T

annual consumer spending

Create a data-driven audience strategy uniquely aligned with your TV planning and campaign KPIs

Linear TV

Addressable TV

Connected TV

PUT ORACLE DATA CLOUD AUDIENCES TO WORK

Increase sales with in-market audiences across digital and TV

Complement digital campaigns across national TV using validated demographics

Drive awareness with interest-based audiences across high indexing dayparts

Reach current and future buyers with purchased-based targeting as they consume TV content
