

Movable Digital Workplace at Battlefield

Enable secure, real-time collaboration and data sharing at the tactical edge.

Deploy digital workspaces on private, resilient cloud infrastructure—supporting mission teams with access, coordination, and communication even in disconnected or contested environments, while ensuring data residency and robust security.

Enabling Oracle Technologies:

Oracle Roving Edge Infrastructure

Offers portable, disconnected operations for tactical edge deployments, enabling data gathering, storage, and processing at the edge.

Oracle C3i (Compute Cloud@Customer, Isolated)

Provides disconnected and air-gapped private cloud infrastructure, ideal for sovereign, isolated workloads and customer-managed virtual machines and databases.
