Oracle E-Business Suite Delivers Smartphone Apps Updates with Mobile Release 9

Oracle is pleased to announce functional and technical updates to the Oracle E-Business Suite smartphone apps. The updates are delivered with Oracle E-Business Suite Mobile Release 9, a coordinated release of smartphone apps built with the Oracle Mobile Application Framework (MAF).

Oracle E-Business Suite smartphone apps provide actionable, on-the-go access to Oracle E-Business Suite functionality. They include horizontal apps – such as Approvals, Timecards, and Self-Service Human Resources – that apply to most employees. They also include role-based line of business apps for specific functional areas within Oracle E-Business Suite.

Oracle E-Business Suite smartphone apps are available at no additional cost to licensed users of the associated base products. They are compatible with Apple iOS and Android smartphones, and with Oracle E-Business Suite 12.1.3 and 12.2.3 and higher on the server.

Mobile Release 9 Functional Updates

Mobile Release 9 delivers bug fixes as well as enhanced functionality, including:

- **Mobile Self-Service Human Resources:**
 - US Federal and State Tax Withholding Form statutory changes for 2020
- **Mobile Maintenance:**
 - Added Supervisor Overview landing page and actions, including:
 - View alerts and work order information
 - Assign resource and employee or equipment
 - Mass update of work order status

- Extended view of work orders with statuses of Draft, Unreleased, On-hold, Cancelled, Released and Complete
 - New Technician Overview landing page with actionable view of operations metrics
 - Material issue for rebuild items is enhanced to issue more than one quantity
 - Subinventory list of values in material add and issue is enhanced to sort based on the on-hand quantity
- **Mobile Timecards:**
 - Enter Change and Late Audit reasons in time entries
 - View overtime details based on rules evaluation engine
- **Mobile Approvals:**
 - New approvals for:
 - Oracle Inventory Management (cycle count)
 - Oracle Lease and Finance Management (contract booking, funding, and termination quotes)

Mobile Release 9 Technical Updates

Mobile Release 9 delivers technical updates, including:

- **Adoption of Oracle Mobile Application Framework (MAF) 2.6.2:**
 - The Oracle E-Business Suite Mobile Foundation that underlies the Oracle E-Business Suite smartphone apps adopts Oracle Mobile Application Framework (MAF) 2.6.2.

For more details on the functional and technical updates delivered with Oracle E-Business Suite Mobile Release 9, see the Oracle E-Business Suite App-Specific Release Notes linked from “Oracle E-Business Suite Mobile Apps, Release 12.1 and 12.2 Documentation Index”, Doc [1641772.1](#).

How to Download and Configure the Smartphone Apps

- To view and download Oracle E-Business Suite smartphone apps from a public app store, search "Oracle EBS America" in Apple's App Store or the Google Play Store. When using an iPad, filter for "iPhone Only" apps.
- To deploy an Oracle E-Business Suite smartphone app, you must install server-side patches and complete some configuration steps before the app can be used with that server instance. For detailed installation and configuration instructions, see the [Oracle E-Business Suite Mobile Apps Administrator's Guide, Release 12.1 and 12.2](#).
- The latest apps in Mobile Release 9 can work with an Oracle E-Business Suite server that is configured with patches from one prior mobile release, i.e., Mobile Release 8. However, to enable certain new features and fixes, the latest Release 9 server-side

patches must be applied; such features and fixes are listed in the “What's New” for each app on the app stores, and in the App-Specific Release Notes linked from “Oracle E-Business Suite Mobile Apps, Release 12.1 and 12.2 Documentation Index”, Doc [1641772.1](#).

- To obtain the updated mobile application archive files, download patches using the instructions in the [Oracle E-Business Suite Mobile Apps Developer's Guide, Release 12.1 and 12.2](#). Note: Any changes to mobile application archive files must be reapplied to the latest archive to obtain the latest updates and support.

Where to Find More Information

- **Public App Stores**
 - Search "Oracle EBS America" in Apple's App Store or the Google Play Store. When using an iPad, filter for "iPhone Only" apps.
- **Oracle E-Business Suite Mobile Apps, Release 12.1 and 12.2 Documentation Index**
 - See MOS Doc [1641772.1](#), which links to:
