MEET THE CHALLENGE OF ONLINE SHOPPING

Connected consumers want connected solutions. With Oracle Warehouse Management Cloud Service, you can align ecommerce fulfillment technology to ecommerce sales. Transform any site—warehouse, distribution center, storefront, kiosk, or even a garage—into a robust and seamless fulfillment center. Omnichannel functionality enables complete warehouse and logistics fulfillment from any browser-based device. Leverage end-to-end inventory management, from manufacturer to distribution center to store to customer.

RECEIVING AND PUTAWAY

Establish accurate views of your inventory with inbound receiving and putaway.

- Control your inventory
- Schedule and manage inbound shipments, cross-docking, and flow-through allocations
- Manage dock appointments and improve dock efficiency
- Book appointments by facility and door
- Configure, create, and perform custom value-added services (VAS), such as labeling, tagging, and kitting—at any time

ECOMMERCE GATEWAY

Save time and money by connecting to a multitude of selling options and channels. This flexible fulfillment tool enables you to fulfill customer orders from major ecommerce channels

- Connect to all major ecommerce channels, such as Amazon, eBay, or other third-party, front-end solutions
- Offer customers a seamless shopping experience
OUTBOUND ALLOCATION AND STORE RECEIVING
Support direct-to-consumer fulfillment and store delivery confirmation by allocating inventory into outbound loads with multistop routes.

- Improve pick efficiency and gain control of planning via configurable wave allocation
- Improve facility throughput and overall warehouse operations
- Manage distribution center tasks via mobile, including receiving, putaway, order picking, replenishment, and truck loading
- Optimize store fulfillment with put-to-store management, cross docking, store-based waving, and task grouping

MATERIAL HANDLING
Support a higher degree of automation and complex fulfillment strategies with built-in integration for material handling equipment and services.

- Integrate easily with warehouse control systems (WCS), including pick-to-light, carton sorter, tilt tray sorter, carousel, sortation, scale, and conveyor
- Eliminate latency
- Gain visibility through real-time integration with 99.5 percent uptime

RETAIL COMPLIANCE
Oracle Warehouse Management Cloud includes required retail-related standards, including electronic data interchange (EDI) and retailer-compliant barcode labeling. Oracle continually improves its standards for integration and standardization to ensure that you’re always in compliance.
