Oracle Solaris Kernel Zones Compatibility List

http://docs.oracle.com/cd/E53394_01/html/E54751/qnwoi.html

The minimum disk space needed for an Automated Installer installation varies depending on the number and size of the packages that are included in the installation. The above guidelines provide minimums according to package groups included in different installation types. These are minimum requirements to install Oracle Solaris 11.3. You may need additional memory and disk space on your installed system.

`solaris-desktop` is not a superset of `solaris-large-server`. Adding `solaris-large-server` to `solaris-desktop` will result in additional storage.

Support for Oracle Solaris Kernel Zones live migration requires updated SPARC firmware, and can be downloaded from My Oracle Support. For more details on firmware versions see the following page:

<http://www.oracle.com/technetwork/systems/patches/firmware/firmware-140779.html>
