

Oracle Fusion Applications AI Agent Marketplace

Discover a new era of business automation with Oracle Fusion Applications AI Agent Marketplace. Instantly access a curated collection of partner-built AI agents to transform complex workflows in Oracle Fusion Cloud Applications. Deploy agents in minutes—not months—and gain a competitive edge without the need for extensive in-house expertise.

Why use AI Agent Marketplace?

Enterprise-grade trust and security

Every agent undergoes Oracle's rigorous 21-point inspection to help ensure enterprise readiness, designed to meet the highest standards for security, performance, and compliance.

Natively built

Agents operate natively within Oracle Fusion Applications and connect with third-party systems, driving efficiency across HR, finance, supply chain, sales, marketing, and more.

Certified partner solutions

Access a global ecosystem of certified Oracle partners that deliver high-quality agent templates built with deep industry and domain expertise.

Immediate value

Agent templates allow for rapid automation with minimal implementation risk and overhead. Deploy agents instead of building them from scratch to achieve immediate business impact and accelerate ROI.

Key benefits for your business

Accelerate outcomes: Eliminate long development cycles and boost productivity with prebuilt automation.

Mitigate risk: Every agent meets Oracle's strict standards for data privacy and reliability, so you can adopt AI with confidence.

Access expertise: Discover and engage with trusted Oracle partners that are ready to solve your unique business challenges.

Lower costs: Leverage industry-leading AI directly in your Fusion environment without the need for additional tools or extra costs for large language model access and Oracle Cloud Infrastructure services.

Ready to get started?

Discover AI agents for your workflows in Oracle Fusion Applications and join the next wave of enterprise automation.
