MANUFACTURING WITH 100 PERCENT VISIBILITY

Wholesalers need to understand their entire logistics network, from DC to outlet. Oracle Warehouse Management Cloud Service provides complete inventory visibility, so you can ensure fewer instances of order errors or out-of-stock scenarios.

RECEIVING AND PUTAWAY

Establish accurate views of your inventory with inbound receiving and putaway.

- Control your inventory
- Schedule and manage inbound shipments, cross-docking, and flow-through allocations
- Manage dock appointments and improve dock efficiency
- Book appointments by facility and door
- Configure, create, and perform custom value-added services (VAS), such as labeling, tagging, and kitting—at any time

COMPLETE INVENTORY OPERATIONS

Oracle Warehouse Management Cloud increases inventory accuracy with automated inventory-counting task generation. Tasks are performed concurrently with other warehouse operations for end-to-end visibility.

- Manage stock levels more effectively
- Generate tasks based on minimums, maximums, or requirements for planned waves

OUTBOUND ALLOCATION AND STORE RECEIVING

Support direct-to-consumer fulfillment and store delivery confirmation by allocating inventory into outbound loads with multistop routes.

- Improve pick efficiency and gain control of planning via configurable wave allocation
- Improve facility throughput and overall warehouse operations
- Manage distribution center tasks via mobile, including receiving, putaway, order picking, replenishment, and truck loading
- Optimize store fulfillment with put-to-store management, cross docking, store-based waving, and task grouping

MATERIAL HANDLING

Support a higher degree of automation and complex fulfillment strategies with built-in integration for material handling equipment and services.

- Integrate easily with warehouse control systems (WCS), including pick-to-light, carton sorter, tilt tray sorter, carousel, sortation, scale, and conveyor
- Eliminate latency
- Gain visibility through real-time integration with 99.5 percent uptime

REAL-TIME REPORTING AND ANALYSIS

Make the right business decisions at the right time. Reporting and analytics tools provide you with actionable insight. User-configurable analytics dashboards empower everyone to make better decisions.

- Create, edit, and execute ad hoc or standard reports for internal and external needs
- Establish an unmatched and seamless shopping experience.
- Gain an actionable analysis of personnel, localization utilization, and inventory fragmentation

WORKFORCE MANAGEMENT

Reduce labor inefficiencies, raise overall manufacturing performance, and improve accuracy with better visibility into workforce operations. Key performance indicators enable you to manage and track workforce productivity.
