

ORACLE WEBCENTER CONTENT, ENTERPRISE CAPTURE & IMAGING 12C WHAT'S NEW

A SIMPLE, SMART & SCALABLE
CONTENT MANAGEMENT SYSTEM

NEW FEATURE HIGHLIGHTS

- Enhance modern, fast user interface with annotations support
- Reusable UI framework for better business portal application integration
- Enhanced desktop integrations
- Native mobile apps for smart phones and tablets
- Unified content repository for all content management activities
- Additional rendition capabilities and support for video digital assets
- Enhanced attachment support for Enterprise Capture
- Hybrid ECM integrations with Oracle Documents Cloud Service

KEY BENEFITS

- **Reduce Costs** – convert paper-based documents to digital and manage all unstructured content in one system
- **Gain Efficiencies** – with a single source of truth, streamlined business processes, and easier access to content

The release of Oracle WebCenter Content, Enterprise Capture & Imaging 12.2.1 continues to realize the vision that content management is a core component of today's enterprise infrastructure - a flexible platform to empower employees and 'content-enable' business processes throughout the enterprise. Oracle WebCenter Content, Enterprise Capture & Imaging 12.2.1 streamlines management of all types of unstructured content and then drives user productivity by exposing it where needed - within desktop tools, on mobile devices, and within business applications and processes. This document highlights the new features in Oracle WebCenter Content 12c, demonstrating how the release delivers on its promise of a comprehensive and integrated enterprise content management (ECM) platform.

What's New in Oracle WebCenter Content, Enterprise Capture & Imaging 12c / 12.2.1

The WebCenter 12.2.1 release provides a number of new features and enhancements to Oracle WebCenter Content, Enterprise Capture & Imaging including:

User Experience

- **Document Annotations:** the WebCenter Content document viewer now has added support for doing annotations directly on the document being viewed. This enhanced capability provides business users the ability to easily collaborate and comment directly on a documents. Key features include:
 - Tool palette of mark up tools (Highlighter, Text Box, Sticky Notes etc)
 - User security model for controlling who has access to original document vs mark ups.
 - Redactions support for hiding sensitive portions of restricted documents with the ability to prevent download of viewing of original document.
- **Enhanced Desktop Integration:** The 12.2.1 versions of the Desktop integration suite support the latest desktop versions of Office 365 (Microsoft Office 2013). These integrations provides menus to access managed content, insert managed links, and compare managed documents using desktop applications such as Microsoft Word and Excel. In addition, productivity folders shows you your workflow inbox, saved searches and checked out content directly from Windows Explorer.
- **Mobile Device Support:** The 12.2.1 version of the WebCenter Content Mobile apps provide for access to enterprise content on the road. This latest release of Oracle WebCenter Content 12c includes native mobile applications for use with the latest iOS (5 & 6) and Android devices to allow you to easily find, view, and share content from your smart phone or tablet.
- **Modern Portal Content User Interface:** WebCenter Portal now has support for Oracle WebCenter Content's redesigned user interface. Now WebCenter Portal users can take

across your organization

- **Reduce Risks** – improve consistency and auditability, comply with business policies & regulations, and ensure content security
- **Create Value** – improve business agility by leveraging content across applications, business processes and departments

advantage of the new WebCenter Content UI that is clean, fast, and intuitive. Easily find content, view content info, and collaborate on content with your colleagues. You get single-click access to the most common actions including check-in, check-out, download, favorite, get link, view properties, and upload similar document.

- **Trash Support:** 12.2.1 now has the benefit of User Trash Support in the Native UI for the newer folders technology. This allows end user to easily recover deleted files by restoring them from the trash.

Digital Asset Management

- **Videos Conversions :** WebCenter Content 12.2.1 now has support for Telestreams latest video transcoding product technology: Vantage. Telestream's Vantage product offers one of the industry's best and most up to date video conversion packages available. Vantage offers a family of best-in-class video transcoding products for multiplatform distribution: broadcast, cable, VOD, IPTV, multi-screen OTT. Vantage transcoding products utilize the latest technologies to deliver pristine quality, exceptional processing speeds, plus the industry's most extensive workflow automation and system support

Additionally, WebCenter Content 12.2.1 now has support for adding in other 3rd party video transcoders. Using a pluggable framework that is based on command line interfaces, WebCenter Content now has a pluggable framework for adding other 3rd party video transcoders such as FFMpeg. This pluggable framework gives a customer a choice and alternatives to how videos are transcoded.

Enterprise Capture, Forms Recognition & Imaging

• New Enterprise Capture Client Features:

- Ability to view the non-image documents in their native application
- Document search and selection within a batch
- Desktop Application support (running the application outside web browser)
- Duplicate Document or page: copy a document or page within a batch.
- Ability to view detailed information about image or non-image document (file path, file name, file size, DPI, etc)

• New Enterprise Capture Server Features :

- Support for WLST commands to create new Capture Workspaces and modify the properties of existing workspace objects such as Client Profiles, Server Jobs, Commit Profiles, etc.
- Document Conversion support for External Conversion Programs

• New Document Attachments Support:

- Support for new classification for attachments: attachment types
- Support creation, modification, listing and viewing attachments within the Client
- Document Conversion Processor: Added ability to ignore or convert attachments
- Recognition Processor: create attachments using hierarchal separator pages
- Commit attachments to WebCenter Content and a text file
- Update WLST commands to support exporting of Attachments with a batch

Hybrid ECM – Integrations with Oracle Document Cloud Services (ODCS)

• WebCenter Content Integration with Oracle Documents Cloud Service:

The WebCenter Content user interface can embed a collaboration folder from ODCS, thereby

surfacing the ODCS collaboration experience. WebCenter content users get access to ODCS without authenticating to ODCS. From the WebCenter Content interface, users may:

- share content in the collaboration folder with internal or external users
- have the content synchronized to their desktop
- copy content back and forth between WebCenter Content and ODCS

This also allows WebCenter Content policies, workflows and records management to be applied to content that originates in ODCS.

- **Oracle Documents Cloud Service Commit Driver for WebCenter Enterprise Capture:**
WebCenter Enterprise Capture (WEC) can now be configured so that images are committed to ODCS, eliminating the need to license, install, setup and maintain an on-premise repository. This allows customers to quickly deploy capture solutions with reduced initial cost and effort. It also allows Oracle Documents Cloud Service (ODCS) customers to use WEC to load documents onto ODCS. For example, they could scan images or have emails sent to a specific address uploaded into ODCS.

Latest Enterprise Platform Support

- **WebCenter Content 12.2.1 has support for all the latest enterprise technologies:**
 - Red Hat Enterprise Linux 7 – 64 bit
 - Oracle Enterprise Linux 7 – 64 bit
 - Suse Enterprise Linux 11
 - Microsoft Windows Server 2012 R2
 - IBM AIX 7.1
 - Oracle Database 12.1.0.1+
 - IBM DB2 10.5
 - Microsoft SQL Server 2012
 - Oracle Java/JDK 1.8.0_51+
 - Microsoft Internet Explorer 11
 - Mozilla Firefox 31+
 - Google Chrome 43+
 - Apple Safari 8.*
