ORACLE

Time is Now: Recapture Growth with Expanding the Possibilities of the Cloud

Andrew Sutherland

SVP, Business Development Systems & Technology, EMEA
Oracle

Innovation

Innovation

In 1954 [George Devol](#) invented the first digitally operated and a programmable robot called the **Unimate**

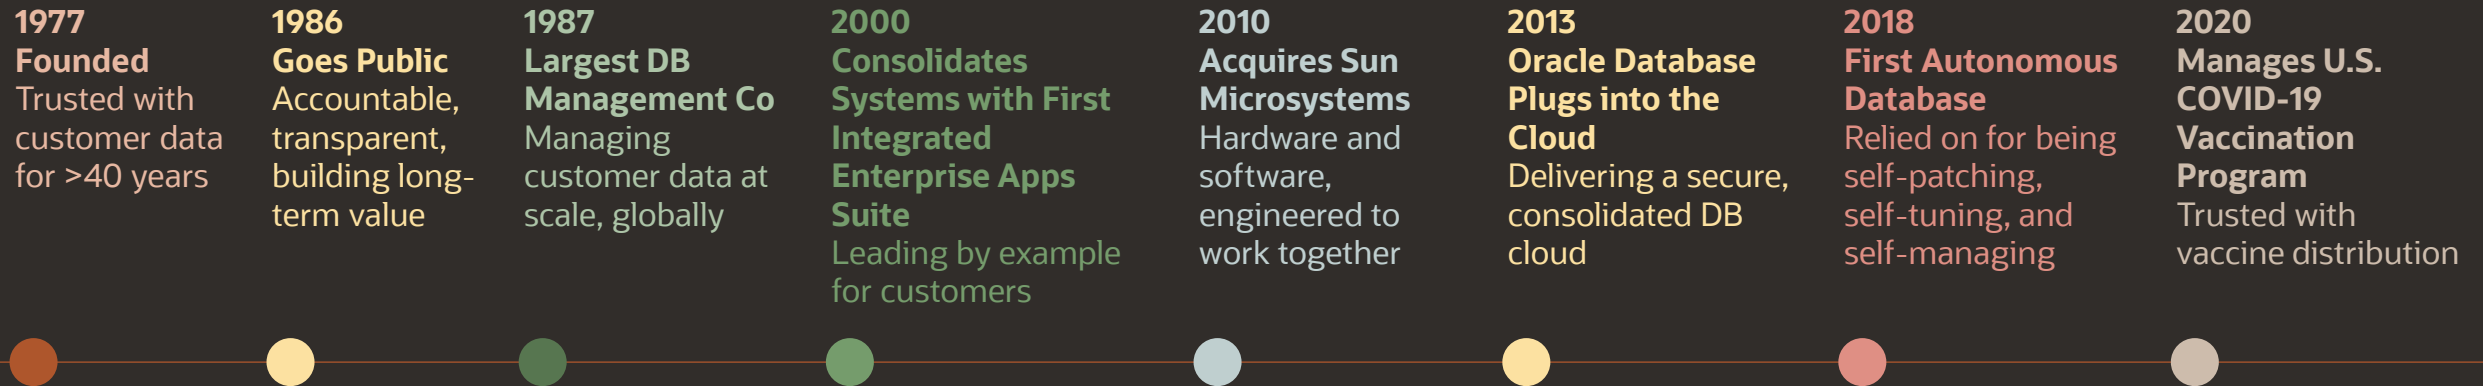

Innovation

The first toothbrush was made by fraying the edges of a twig by the ancient Babylonians. Similar devices have also been found in ancient Egyptian tombs

*Innovation is not about why,
Innovation is about **why not***

Oracle has been innovating in technology for 40+ years

Current Challenges

Business Continuity

Remote Workforce

Security

DATA

All Clouds are not Equal

performance

Best
Economics

Best performance,
automation, cost

Easy migration, path
for the future

Security built-in

Run toughest workloads
Performance/Management/Availability SLAs

Best cloud for
Database

Best cloud for Apps

More secure with
less work

29 Oracle Cloud regions and growing

January 2021: 29 Regions Live, 9+ Planned; 6 Azure Interconnect Regions

Not every organization or workload can use the public cloud

DATA SOVEREIGNTY

- Regulatory (PCI, HIPAA, GDGR, etc), legal, and privacy requirements
- Sensitive data can't leave premises
- Custom security standards

SECURITY & CONTROL

- Physical security of infrastructure and data
- Single tenant, self-contained environment
- Extreme SLAs and scheduling requirements

LATENCY

- Stringent latency requirements
- High volume applications, or legacy applications tied to on-premises systems

You need a public cloud service in your data center

Public cloud advantages

- Self-service database cloud
- Autonomous operations
- Proactive security
- Elastic scalability
- Pay-per-use consumption

Data center advantages

- Data sovereignty
- Data center security
- Data and application control
- Low-latency connectivity
- Investment protection

Oracle provides full **choice of deployment models**

Different consumption models simplify your cloud journey
