Safe harbor statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, timing, and pricing of any features or functionality described for Oracle's products may change and remains at the sole discretion of Oracle Corporation.

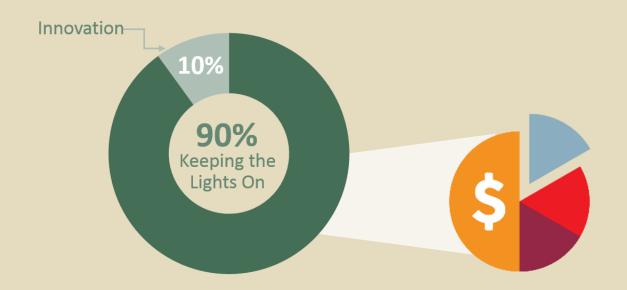

Today's agenda

- 1 Why move to Oracle Cloud now?
- ² American Airlines' use case success
- 3 Enabling the Oracle Cloud with Oracle Advanced Customer Services

Did you know that....

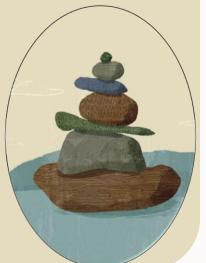

Basic support and maintenance of IT systems and infrastructure still comprise up to 90% of many enterprise budgets

The biggest barriers blocking innovation include:

- Keeping the lights on
- Complex legacy infrastructure
- Inability to extract value from existing IT
- Lack of in-house skills

Isn't it time to move to cloud and balance the budget?

Poll:

If you have not yet moved your Siebel application to cloud, what challenge concerns you most?

- I want to maintain control
- 2. I need to ensure secure access
- 3. My environment is complex with many integration points
- 4. The risk of rising transition and management costs

Yes, you can move your Siebel workload to Oracle Cloud

Safely and efficiently without disruption to your business

Control

Reap the benefits of operating in the cloud without an impact to people processes, and tools

Integrated

Introduce new functions and capabilities by integrating core software with other applications and services

Security

Ensure secure, confidential and trusted data remains that, in the cloud

Cost

Avoid CapEx and leverage our managed services to reduce cost and move your business forward

Siebel Lift and Shift Migration Timeline

Leveraging ACS tooling and automation expedites deployment

ORACLE CLOUD INFRASTRUCTURE

DEVELOPMENT

QA

Testing

Issue Fixes

STAGE

PRODUCTION

With ACS Automation 4-6 months

Without ACS Automation 8-10 months

Time-consuming activities applicable to *all* environment types

- Provisioning
- Instance Setup
- Application Installation, Setup, and Configuration

 Application Upgrade

 UAT / Regression **Testing**

- Mock Cutover
- Performance **Testing**

Go-Live

4 environment transition timeline

Existing on premise continues in parallel

Benefits of DevOps and Automation

ACS Automation Prerequisites

- Fillable ACS Run Book which auto-generates JSON input files
- Import certificates into .JKS file
- Prepare custom file packages
- Setup Ansible inventory hosts and variables
 - Software Paths, Network ports, Software versions, OS, DB Info
 - Usernames / Password, Languages
 - Host names, # of Gateway Nodes, Siebel Servers, Als, Apache Load balancing

Automation Steps

1 Installation

- 2 Provisioning
- 3 SiebSrvr Config

Software Installation

Automation Steps

1 Installation

O/S Prep

- Create User / Group
- Install OS Packages
- Set OS Limits
- Create shared directories with proper permission
- Install JDK

Binary Installation

- Create Siebel Response File
- Install Base & Update
- Install Siebel Components according to defined inventory

Post

Installation

- Install and configure Reverse Proxy Web Server with load balancing and SSO
- Copy config files (keyfile.bin, ifb, XSLT, Binding, JAR, custom security adapter, custom Siebel .cfg files, etc.)

Siebel Provisioning

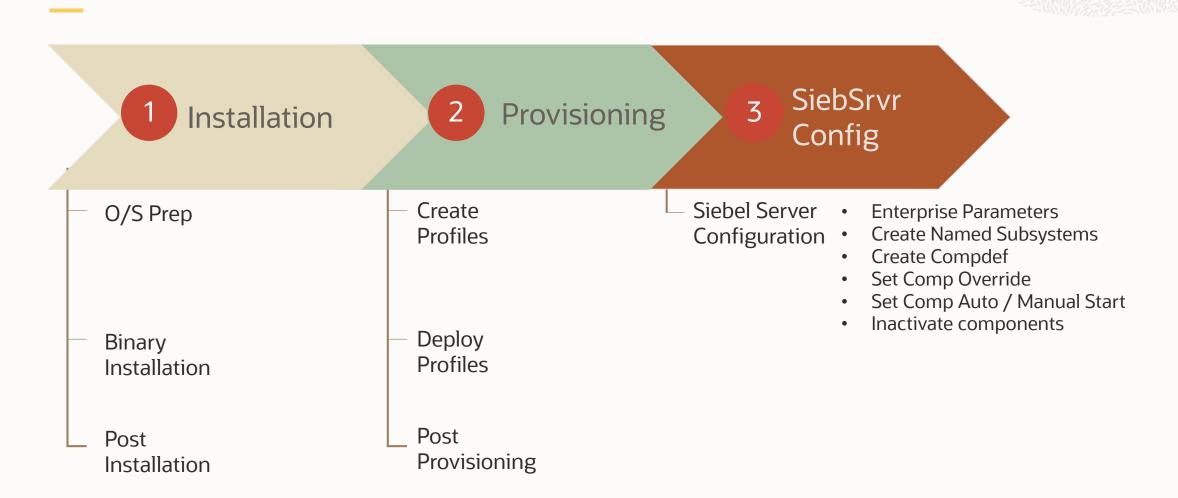

Automation Steps

Provisioning Installation Gateway Security / Cluster Create O/S Prep Enterprise **Profiles** Multi Siebel Server Profiles Multi Application Interface Profiles Migration Deploy **Deploy All Profiles** Binary **Setup Migration Connections and Plans Profiles** Installation Move custom folders outside Siebel Web App directory Post **Post** Custom web settings / logging Provisioning Installation Copy Web Files Generate Browser Scripts (Removed in 20.8)

Siebel Server Configuration

Automation Steps

Automating Run and Maintain

After Weekly Lower Environment Restarts

Tomcat Status

Zookeeper Status Number of Siebel processes per server

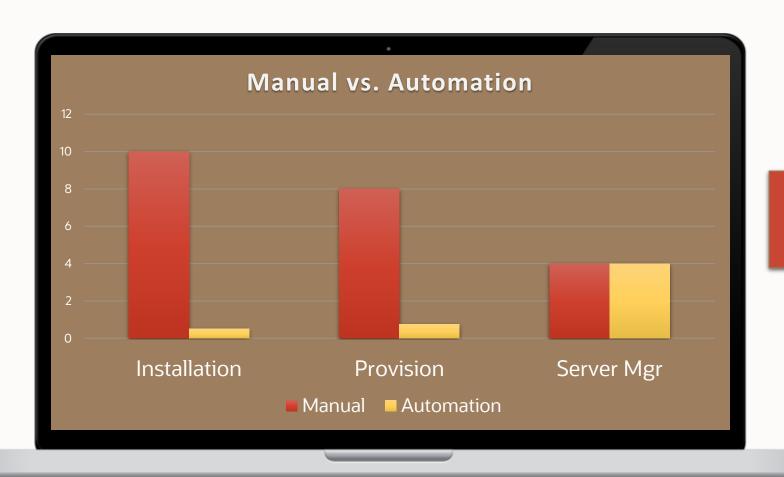

List Errored Auto Start Comps

Seasonal Changes:

- Redeploy Certificates
- Update SADMIN password
- Sync Siebel Server Config with GitHub
- Incorporate ACS Performance Recommendations

Automation saves time and eliminates errors

Automation build saves 76% of manual time

Key Takeaways

1 Customers can maintain their tenancy for total control

- ACS can help customers implement the most secure access to their OCI Tenancy with proper integration to on-premise systems
- ACS is your trusted advisor for guidance and expertise in mitigating migration risks and reducing operational costs

Advanced Customer Services

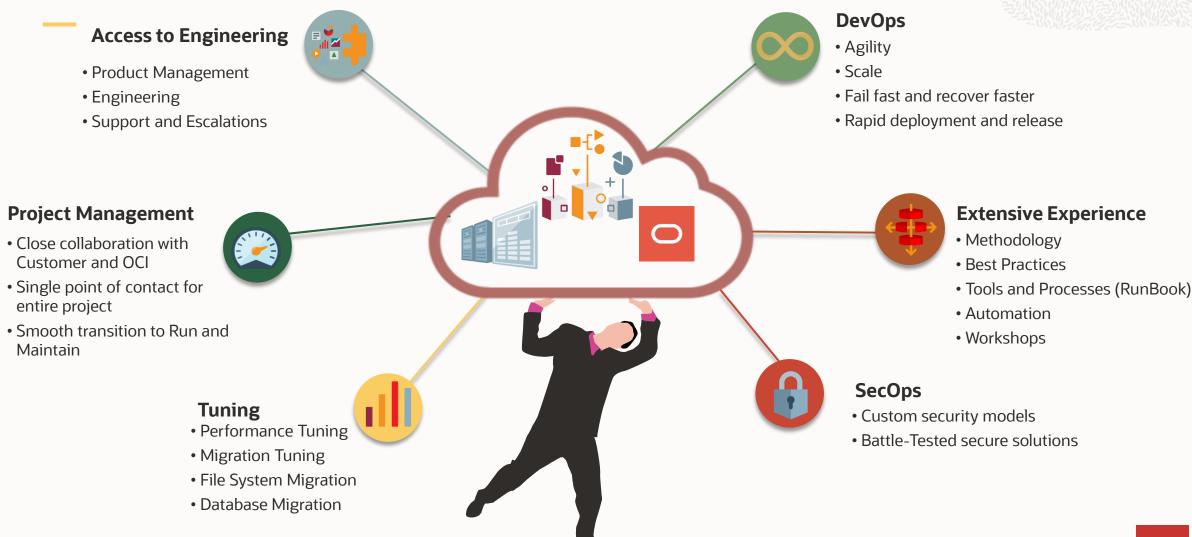

Sachin Shah

Technical Program Manager
Oracle Advanced Customer Services

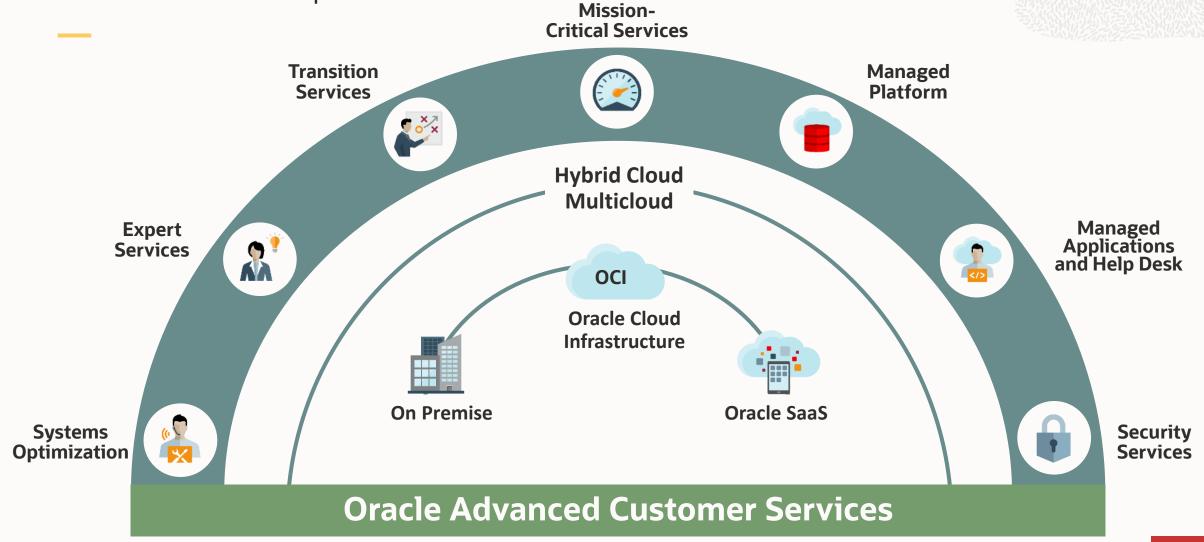

Oracle ACS is your transformation partner – How we Differentiate

Expert Services can help you realize your goals so you can focus on your business

Advanced Customer Services portfolio

Consistent across on premise and cloud

Q & A
