Forms Modernization

Modernization Paths

About Oracle Forms

Web based – Java front-end

Is Oracle Forms going away?

No, Forms is here to stay.

Oracle Forms & Reports 12.2.1.4 now has Premier Support till Dec 2023

Oracle Forms continues to be a core component in many Oracle products such as the following:

- Oracle E-Business Suite
- Oracle Utilities
- Oracle Retail
- Oracle LifeSciences
- Oracle Hospitality
- Oracle Insurance

Is Oracle Reports going away?

Oracle Reports has been Deprecated but still available

In the release note of Fusion Middleware 12c Release 12.2.1.3.0, a <u>Deprecation Notice for Oracle Reports</u> was given.

Around this time the license entitlement for Oracle "Forms and Reports" and "Internet Developer Suite" were revised to include Oracle Analytics Publisher (formerly Bl-Publisher) as a replacement for Oracle Reports.

Oracle Reports is still available in the Fusion Middleware Release 12.2.1.4.0 and are planned to be released in the next release.

Oracle Forms & Reports Support Time Lines

Oracle Fusion Middleware Releases – 12c

Release	GA Date	Premier Support Ends	Extended Support Ends	Sustaining Support Ends
Fusion Middleware 12c (12.1.x) ¹	Dec 2011 - Feb 2015	Dec 2017	Dec 2019 ²	Indefinite
Fusion Middleware 12c (12.2.x) ³	Oct 2015 – Apr 2016	Dec 2023 ^{4, 5}	Aug 2025 ⁵	Indefinite

³ Includes the following: WebLogic Server, Coherence, TopLink, HTTP Server, WebLogic Server Proxy Plug-In, Traffic Director, Business Intelligence Suite, SOA Suite, Real-Time Integration Business Insight, Business Process Management, MapViewer, B2B and Healthcare, Service Bus, Stream Analytics (Formerly Stream Explorer/Event Processing), Managed File Transfer, Data Integrator, Enterprise Data Quality, JDeveloper and Application Development Framework Forms and Reports
WebCenter Portal, WebCenter Content, and WebCenter Site and Enterprise Metadata Management.

Is 12c (12.2.1.4) the last release of Oracle Forms?

No, the next release is planned.

View the <u>Oracle Forms Statement of Direction</u> for current release details.

The Roadmap includes:

- UI enhancements to create forms with a look
 & feel similar to Web apps
- Enhancements for accessing REST data
- Better provisioning options in the Oracle Cloud
- Improved Integration with Visual Builder Studio (Developer Service)

Our Oracle Forms and Reports are old, what should we do?

Stay current by Upgrading.

New versions of Oracle Forms have been released providing many enhancements and features, including a simplification to the Upgrade processes.

The Oracle Forms Migration Assistant supports the upgrade process.

Upgrade from:

• 6.0.8 (6i) through 12

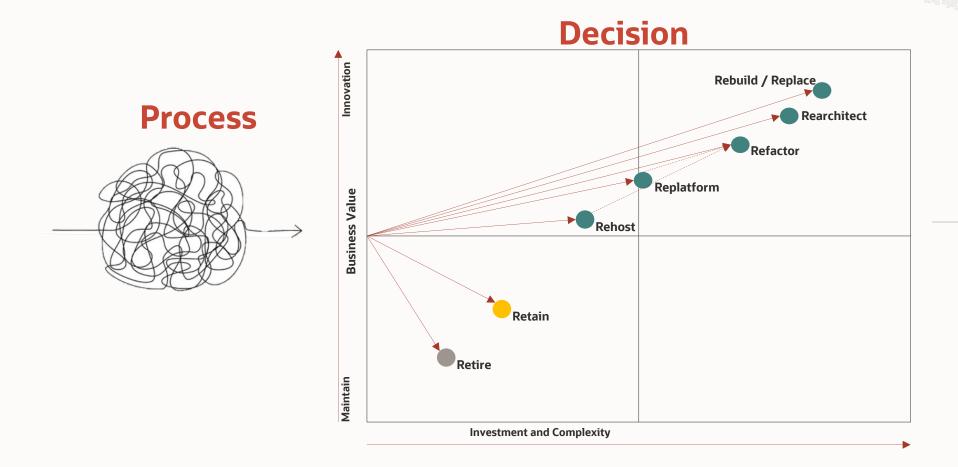

Is migrating from Oracle Forms the cheaper option to modernization vs. Upgrading?

No, Upgrading is the easiest and cheapest option to modernizing Oracle Forms.

Implementing the latest features while maintaining previous investments

Forms Modernization

Forms Modernization - Practical

Upgrade Forms

Modernize your existing Forms applications adding latest features

Replatform to Cloud

Run your Forms and Database environment on Oracle Cloud

- Oracle Forms Marketplace [BYOL]
- Oracle WebLogic Suite Marketplace [UC or BYOL]

Advanced CI/CD

Automate your Forms deployments with Visual Builder Studio

Modernize with APEX

Redevelop (part of) your application with APEX

Replace with Visual builder

Redevelop your application with Visual builder

Forms on Oracle Cloud – Technical options

WebLogic Marketplace [UC or BYOL]

Automated WLS provisioning

- Configurable deployment with standard Terraform scripts
- Configurable Domain architecture
- 3-tier application deployment on OCI
- Vault management of Credentials

Limitations

- No Forms server binaries included
- Manual installation of Forms is required on all WebLogic Marketplace images

Oracle Form Services Marketplace [BYOL]

Automated Form Server provisioning

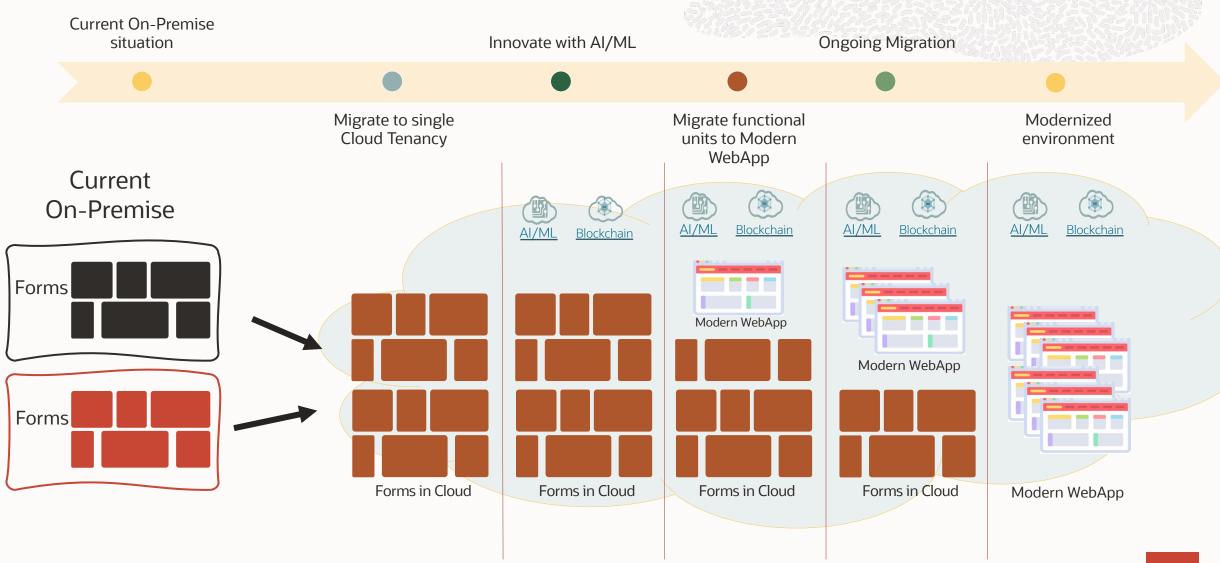

- Available as BYOL only
- Includes local Oracle database but can be configured to use a remote database or DBCS
- Scripted configuration of Forms services
- Includes Form & Report binaries

Limitations

- Single Node, no clustered configuration OOTB
- No added operational efficiency

Visual development experience

Cloud based – zero infrastructure

Integrated database

Web, PWA, an Appstore mobile apps

Easy publishing lifecycle

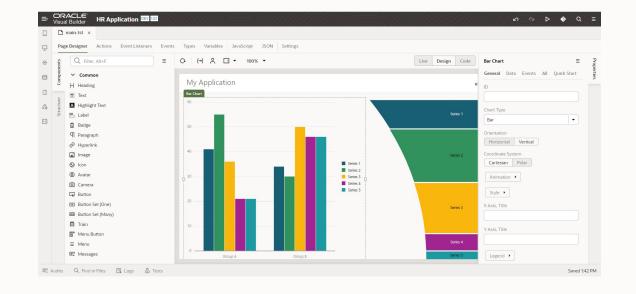

Multiple developers + DevCS/GIT

Built-in Security

Extensible and Flexible

Oracle APEX

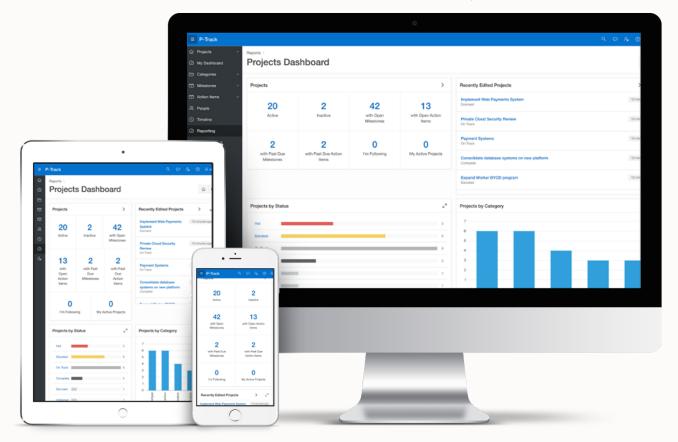

About Oracle APEX

Oracle APEX – Low Code Development

Build enterprise apps 20x faster with 100x less code.

Deploy scalable & secure apps with world-class features anywhere.

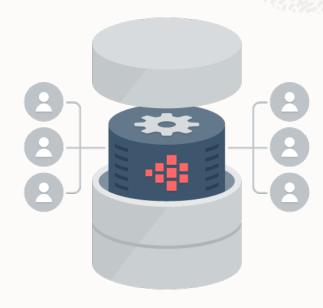

Low-Code Benefits

Distinguishing Characteristics

App Development IDE is **browser based**.

App definitions are stored in the database as **meta data**.

https://

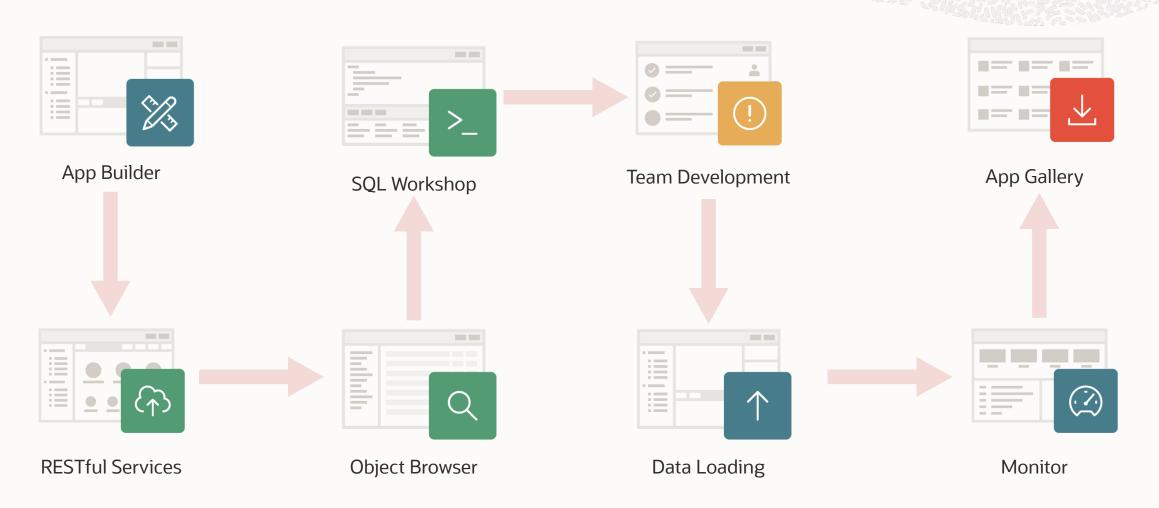

Zero latency access to your data

No client software needed

Declarative – No code generation

Data processing done in the Database

Oracle APEX Application Development – Comprehensive Low Code Platform

Oracle Forms to Oracle APEX Benefits

- **Database –centric** development
- Primarily coded in **SQL** and **PL/SQL**
- **Low-Code**, declarative platform
- Leverage all database benefits and features
- Simple Architecture that scales with the database

Oracle Forms to Oracle APEX Differences

Oracle Forms	Oracle APEX
On Premise Only	On Premise, Autonomous DB, APEX Developer Service
Requires full WebLogic Server	Requires Oracle REST Data Services, can run on WLS
Requires browser plug-ins or Java Web Start	Any modern web browser
Generates files	Metadata based
Suitable for desktops only	Runs on any device (zero development effort)
Difficult to style	Out of the box theming and theme styles

Oracle APEX Advantages

- ✓ Easy to train Forms Developers, key similarities
- √ Re-use all existing Database Objects
- ✓ Can co-exist with Oracle Forms
- √ Flexibility in platform for development / deployment
- ✓ Rapid, low-code, modern responsive UI
- ✓ 100% Browser based development
- ✓ Interpreted model, no need to compile code, just **Save & Run**
- √ Large Community of highly skilled Developers and Partners

Journey to Oracle APEX

- ✓ Push as much business logic into the Database as possible
- √ Identify a suitable functional area as Proof-of-Concept
- √ Review how APEX Consulting Companies may add value
- ✓ Train developers in APEX
- ✓ Secure SMEs for functional input and reviews

Application Express (APEX) Rapid Development and User friendly environment - Oracle Developer in the Manufacturing Industry End users experience rate excellent for the responsiveness of application, from the developer perspective requires graphical representational region to be more advance. Company Size 3B - 10B USD READ FULL REVIEW Oracle Apex A best Solution for future development strategy.
