

## ORACLE VALIDATED INTEGRATION DATASHEET

# SSOGEN Corporation

## SSOGEN SSO Integration with Oracle E-Business Suite 12.2

SSOGEN SSO is a next-generation solution that helps bridge the gap between enterprise applications such as Oracle E-Business Suite, Oracle Business Intelligence Enterprise Edition, Oracle Fusion Middleware, and modern single-sign-on (SSO) solutions such as Microsoft Azure Authentication, Okta solutions, and Oracle Identity Cloud Service.

### COMPANY OVERVIEW

SSOGEN is a software development company helping organizations implement web security, protect mission-critical applications, and prevent cybercriminals from stealing confidential data while bringing the best user experience to its employees and associates.

### INTEGRATION OVERVIEW

SSOGEN SSO is a complete SSO solution, with multifactor authentication and a gateway, integrating with Oracle E-Business Suite to enable protection for enterprise and cloud applications. It also delegates authentication and SSO to enterprise SSO systems such as Oracle Identity Cloud Service and Oracle Cloud PaaS services. The Oracle E-Business Suite AccessGate application is used for standard SSO functionality.

### INTEGRATION DETAILS

The SSOGEN SSO solution integrates with the web server for Oracle E-Business Suite with an Apache plugin, mod\_ssogen.so, and it delegates authentication to Oracle Identity Cloud Service and SAML identity providers. This extends the service's reach to Oracle Business Intelligence Enterprise Edition, Oracle Application Express, and various Oracle Fusion Middleware products. The solution also enables Microsoft Active Directory for LDAP and Kerberos authentication, CA SiteMinder, IBM Tivoli Access Manager, Active Directory Federation Services, RADIUS authentication, Okta, Ping, Shibboleth, and OpenID Connect SSO solutions for customers using Oracle E-Business Suite.

SSOGEN SSO talks to the LDAP 2 and LDAP 3 protocols supporting most of the enterprise LDAP servers. It also supports other integrations such as OAuth 2.0, SAML 2.0, and OpenID Connect. It supports multifactor authentication with both hard tokens and soft tokens.

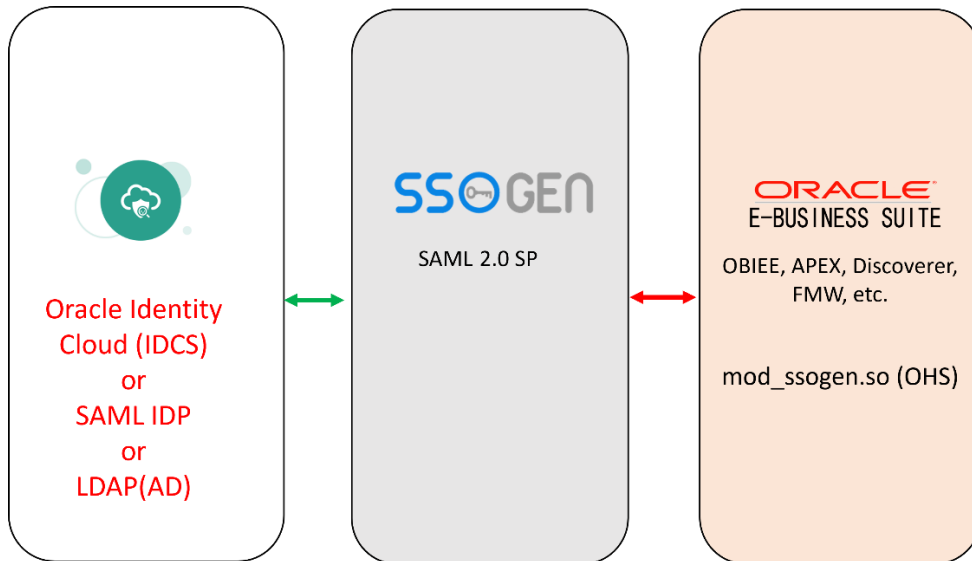

SSOGEN SSO authentication can be extended to other Oracle E-Business Suite integrations to achieve a smooth SSO experience.

### ORACLE Validated Integration Oracle E-Business Suite

Oracle Validated Integration provides customers with confidence that a partner's integration with an on-premises Oracle application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.
