ORACLE AND SUN SYSTEM SOFTWARE

Maximize your support investment and unlock the full value of your Oracle products with the industry's leading support. Predictable, flexible and the most comprehensive coverage available, Oracle support helps drive your business success across your entire technology environment, from database to middleware and to applications. Also covered are Oracle and Sun system software that are typically sold standalone but used with specific Oracle or Sun hardware products. Complete coverage with single point accountability—an industry first—only from Oracle.

ORACLE SUPPORT PROGRAMS AND SERVICE LEVELS

You've made an investment in Oracle solutions to make your business more cost effective, risk-resistant and competitive. Now, with Oracle support, you can know upfront and with certainty how long your software products are supported.

To assist with planning and budgeting, Oracle offers Oracle Premier Support for Software (Oracle Software Updates and License Support), which is comprised of three levels of support: Premier, Extended and Sustaining Support. Premier Support provides a standard five-year technical support period and for many products, Oracle offers an additional three years of Extended Support and indefinite Sustaining Support.

Premier Support

As an Oracle customer, you can expect industry leading support with five years of Premier Support that includes the following benefits:

- Program updates, fixes, security patches and security alerts
- Critical patch updates
- Major product and technology releases, which may include general maintenance releases, selected functionality releases and documentation updates
- Upgrade tools/scripts
- Certification with most new third-party products/versions and most new Oracle products
- Assistance with service requests 24 hours per day, 7 days a week
- Access to My Oracle Support (24 x 7 web-based customer support systems) including the ability to log service requests online

Extended Support

For selected products, Oracle may extend the technical support period by offering Extended Support for a three-year period. With Extended Support, you receive continued access to technical experts, backed by industry leading online tools and the following benefits:

- Program updates, fixes, security patches and security alerts
- Critical patch updates
- Major product and technology releases, which may include general maintenance releases, selected functionality releases and documentation updates
- Upgrade tools/scripts
- Assistance with service requests 24 hours per day, 7 days a week
- Access to My Oracle Support (24 x 7 web-based customer support systems) including the ability to log service requests online

Extended Support Does Not Include:

- Certification with most new third-party products/versions and most new Oracle products

Sustaining Support

For selected products, Oracle may offer Sustaining Support for an indefinite period. Sustaining Support applies after Extended Support expires, or should you not purchase Extended Support, immediately after Premier expires. With Sustaining Support, you receive continued access to technical experts, backed by industry leading online tools and the following benefits:

- Program updates, fixes, security patches and security alerts created during the Premier Support period
- Major product and technology releases, which may include general maintenance releases, selected functionality releases and documentation updates created during the Premier Support period
- Upgrade tools/scripts created during the Premier Support period
- Assistance with service request 24 hours per day, 7 days a week
- Access to My Oracle Support

Sustaining Support Does Not Include:

- New program updates, fixes, security alerts, general maintenance releases, selected functionality releases and documentation updates or upgrade tools
- Certification with most new third-party products/versions and most new Oracle products
- 24-hour commitment and response guidelines for Severity 1 service requests
- Previously released fixes or updates that Oracle no longer supports

For more details on program deliverables, please refer to the appropriate datasheets and support policy documents located at www.oracle.com.
