

Oracle MICROS InMotion Mobile

Oracle MICROS InMotion Mobile is an included, downloadable companion app to our Oracle MICROS Reporting and Analytics Cloud Service. Oracle MICROS InMotion Mobile provides actionable data, enabling hospitality operators to evaluate restaurant performance, measure success against forecast, and make business-critical decisions quickly, all from their smartphones.

TIMELY HOSPITALITY MANAGEMENT

Designed specifically for hospitality food and beverage management, Oracle MICROS InMotion Mobile delivers data in an easy-to-understand mobile user interface, so you can view both high-level trends and the results of front-line operations on your smartphone in your own language. You can then quickly and intuitively explore and act on key performance indicators (KPIs) from any location.

ACTIONABLE DATA ON YOUR MOBILE DEVICE

Not only does InMotion mobile provide near real-time data, it also utilizes historical performance to create a forecast. This forecasted data can provide a simple and easy way to determine changes to menu, staffing, and other key operations. And with push notifications enabled, managers can receive alerts straight to their smartphone when voids, discounts, and other costly behaviors reach a certain threshold. No more waiting until the end of the day to take action—with InMotion, managers can be proactive, ensuring success in their restaurants shift after shift.

EMPOWER HOTEL AND CASINO RESTAURANT OPERATIONS

Oracle MICROS InMotion Mobile unifies data within the hotel and casino restaurant operations. Whether your property has one food outlet or over one hundred, food and beverage managers can keep track of performance and sales for all restaurant operations, no matter where they are located.

Access valuable data from anywhere.

InMotion Mobile allows managers to take operational matters quite literally into their own hands. Spending less time in the back office means more time on the floor, interacting with guests and staff and ensuring a flawless operation.
