

Brewing Beer with Intelligent Track and Trace

Invite a network of supply chain members to participate in one application to enable trust and detect issues in the beer brewing process.

TRACK AND MONITOR

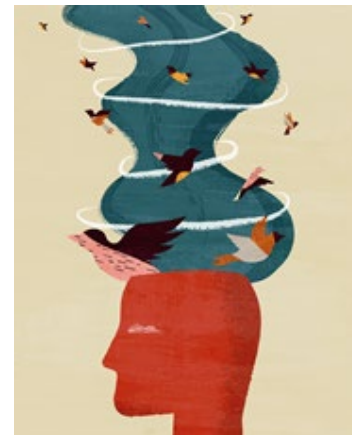

Track and trace recorded transactions and associated documents between partners.

DETECT ISSUES

With alerts and warnings, detect anomalies and resolve issues quickly and efficiently.

BUILD TRUST

By leveraging distributed ledger technology, recorded transactions are immutable and thereby, trust is enabled between partners.

"The full-stack nature of Oracle's SaaS offerings makes them ideal candidates to bundle blockchain functionality. In other words, though there will always be disruption when leveraging blockchain, Oracle's approach makes it one of the simplest and least disruptive approaches to adoption."

Excerpts from Deep Analysis 2019
