Safaricom

Our journey to Cloud and then to Oracle Analytics Cloud

Mark Mumo Business Engagement

About Safaricom

- Largest Telco in Kenya (part of Vodafone)
 - 35m Customers (65% market share)
 - Both mobile and fixed services
- M-PESA –largest mobile money implementation
 - 25m customers (30 day active customers)
 - 99% market share
- Entry into Farming and Health platforms
- 250M USD Service Revenue
 - 30% revenue from mobile money

Customer Problem

Journey to Cloud

- Self inflicted 'Denial of Service'
- Moved some modules to Cloud
 - Taleo (recruitment)
 - iSourcing
- Hybrid implementation
 - Sourcing module on Cloud
 - Purchasing Module on-prem

Sourcing Team

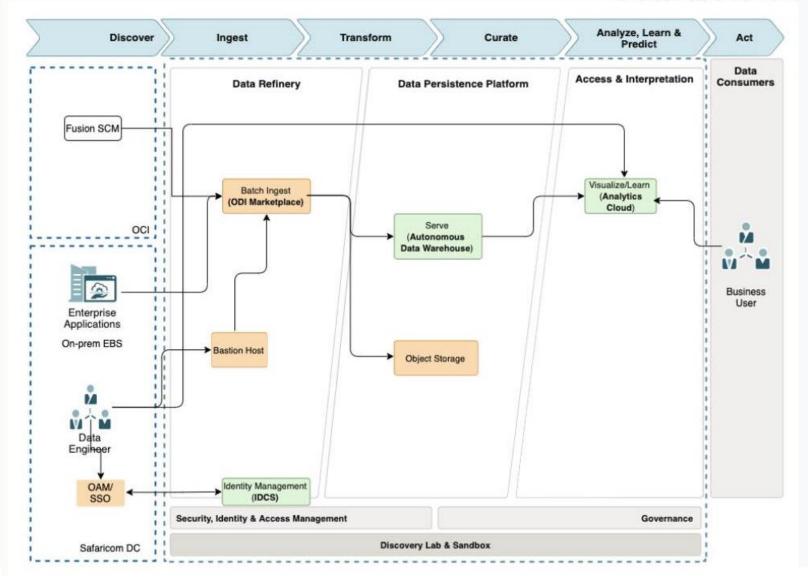

- Inconsistency between Cloud and on-premise master data
- Lack of visibility of sourcing process
- Siloed approach to tenders

System Architecture

Benefits

Benefits of OAC

- Shorter sourcing timelines...faster responses to market needs
- Better supplier experience
- Self-Service Analytics by functional users
- Collaboration between sourcing teams and visibility of all tenders happening
- Better negotiations with vendors
- Visualizations building visibility on sourcing patterns and supplier market analysis....on demand
- Built-in ML to build patterns that can estimate length of the sourcing process (and then build alerts on when to trigger contract renewals)

Next Steps

- Roll out system to production
- Connect to other data sources
- Implement on HCM and other modules

OAC has allowed us to use previously 'dead and unused data' into useful information that is allowing us to run a more efficient sourcing process

MTN Group overview

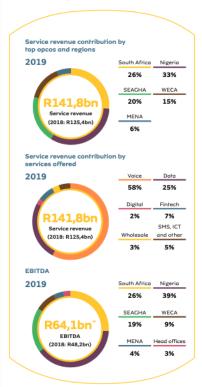

7th Largest

Mobile Operator in the World

Our geographic footprint is wide, stretching over 21 markets on two continents. As a result, robust operational oversight is critical. We secure this through a management structure (see page 70) that reflects almost equal contributions of around a third to group earnings of each of our operations in South Africa and Nigeria and that of our regions - SEAGHA, WECA and MENA - combined.

In 2019, the group reported EBITDA of R64bn (2018: R48bn) and an EBITDA margin of 42,3%^ (2018: 34,3%). Capex totalled R26,3bn (2018: R28,1bn) on an IAS 17 basis.

Standardization of process and technology to leverage economies of scale and enforce compliance

Why Oracle Cloud?

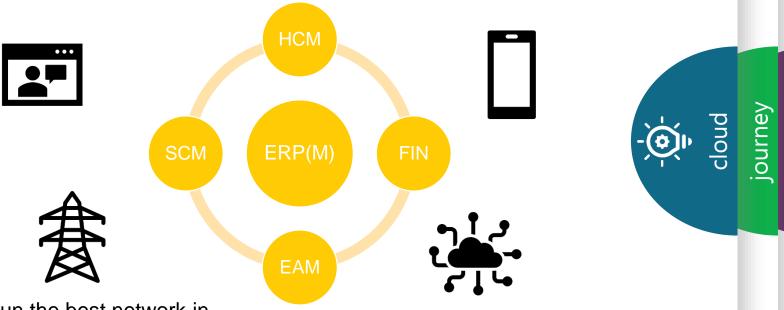

- $_{\circ}$ 2012 selection of Oracle as a key strategic partner
- o Oracle's stated future direction
- o Utilized Oracle's Customer-2-Cloud incentive to get out of the App ULA 'lock-in'
- o Economics: Reduced TCO by 35%
- o Ability to revert to a pure Pay-As-You-Use model in 2023 (end of commitment period)
- o EBS version (12.1.3) out-of-support Dec-2021, would require 9-month SW upgrade project & HW Refresh
- o EBS Global Template Over Engineered for small Tier-2/Tier-3 OpCos

roadmap

Help employees to maintain a healthy work life balance and deliver best in class service to customers

Deploy and develop technologies and solutions that enhance, upskill and entertain our customers

Build and run the best network in Africa. Offering reliable and innovative solutions connecting customers to the world

Manage and create value for all stakeholders leveraging standardized processes delivering transparent reporting

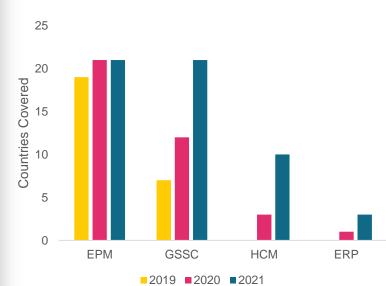

Scaling at the Speed of Business

Enterprise Performance Management rolled out Narrative Reporting and Tax Reporting as cloud pilot initiatives. Although EPM deployed groupwide, only one or two users per OpCo hardly moves the needle on user numbers.

Global Sourcing and Supply Chain rolled out Contract Management, Global Trade Management, Supplier and Supply Management, Demand Forecasting and Planning. The groupwide savings and benefits led to accelerated roll out schedules.

roadmap

cloud

ourney

about

MTN Nigeria and MTN Uganda adopted Oracle Fusion as Enterprise Resource Planning solution. Integrated end to end processes aligns operations, finance and our strategies.

Autonomous warehousing, analytics and integration delivers single source of truth reporting.

2020

2021

2019

If you can't find the sunshine be the

sunshine

Start small and deliver in phases, making sure to solve every problem once. Integration and use of autonomous services allow for rapid scaling.

Celebrate the wins and promote innovative solutions. Cloud is different – don't rebuild onpremise problems with new technologies

Crawl, walk, run - repeat.

Design, build and deliver.

"The best way to predict your future is to create it."
