this project testifies to the
strong collaboration between
Saxony's education and
statistical authorities and Oracle
Consulting while highlighting
the benefits gained by obtaining
software and support from a
single vendor."**
– Hans-Ulrich Höhne, department
manager, Regional Statistics
Office for Saxony

**IT Division of the Statistisches Landesamt des Freistaates Sachsen (now part of Sächsischer Informationsdienstleister / SID) Improves Efficiency and Performance of Schools**

The Regional Statistics Office of the free state of Saxony (Statistisches Landesamt des Freistaates Sachsen - StaLa) is tasked with gathering, evaluating, and reporting on more than 200 key statistics each year. StaLa supplies accurate data on a wide range of topics relating to the economic and social development of Saxony.

The former IT Division of the StaLa is moved to the Sächsischer Infornationsdienstleister.

### Challenges

- Minimize the time spent by schools on administration, planning, reporting, and providing information
- Maximize the quality, timeliness, availability, and measurability of data and optimize information flow
- Conduct weak-point analysis in the administration process in order to improve efficiency
- Provide schools with increased autonomy

### Solution

- Improved efficiency of school administration by providing a single, centralized database for 20,000 users
- Improved teacher scheduling which reduce the number of cancelled lessons and deliver the potential for annual cost savings of more thanUS$3 million
- Provided secure access to data (centralized authentication and authorization) with Oracle Internet Directory and Oracle Label Security
- Used Oracle Application Express to create reports and provide Web-based access for school management boards and Saxony's education authorities
- Benefited from Oracle's open, standards-based infrastructure to integrate seamlessly with the school's local client-server solutions using a Java client
- Deployed the solution to 1,600 schools
