Oracle® Beehive

Non-Supported Zimbra™ Features in Oracle Beehive Webmail

Release 2 (2.0)

November 30, 2009

Oracle Beehive Webmail is a Web-based e-mail application providing Oracle Beehive users with a Web-based alternative to access, view, and manage e-mail, calendaring, and address books. Some features of the Zimbra Web Client are not supported by Beehive, nor are considered part of the Oracle Beehive Webmail product.

Beehive Webmail is built using the Zimbra™ Open source Web client. "Beehive Webmail Client" is used throughout this document to refer to the Zimbra Web application itself.

Note: Use the following URL to return to the Oracle Beehive Webmail Release Notes:

`http://www-content.oracle.com/technetwork/middleware/beehive/documentation/zimbra20-169236.pdf`

Beehive Webmail Help

You can access Beehive Webmail Help by clicking the "Help" link in the Beehive Web Client. The Help integrates both Beehive-specific, and Zimbra-standard features, functional descriptions, and how-to topics:

- Beehive-Specific Features
- Zimbra Features and Concepts Not Supported by Oracle Beehive

Beehive-Specific Features

For a list of the Beehive features included (by functional topic) in the Beehive Webmail Help, refer back to Oracle Beehive-Supported Features in Webmail.

For a list of topics which do not apply to (and therefore are not supported by) Beehive, see the following section.

Zimbra Features and Concepts *Not Supported* by Oracle Beehive

The following features or concepts do **not** apply to Oracle Beehive Webmail:

- Instant Messaging (Beta)
- Working in Documents
- Using Briefcases
- Creating Filters (for routing incoming e-mail messages to designated folders)
- Conversation View (threaded) for messages
- Import/export

- contact lists
- other calendar programs

- Setting up different account identities and addresses (for managing roles)
- Configuring accounts (to receive e-mail from other POP3 or IMAP accounts)
- Additional features not supported by Beehive:
  - Setting a forwarding address
  - Subsribing to RSS/Atom Feeds
  - Receiving new mail notifications
  - Adding external accounts
  - Using spell check
  - Creating personas/e-mail identities
  - Changing your default time zone

The following areas may differ from Beehive functionality:

- Sharing Mail Folders
- Setting up desktop alerts
  - Beehive displays calendar alerts only
- Responding to a meeting invite
  - Beehive displays the invitation differently in your Inbox than described in Beehive Webmail Client Help.
- Search
  - Advanced Search is less comprehensive in Oracle Beehive Webmail than described in Beehive Webmail Client Help.
- Terms and usage
  - Some terminology for the Sharing feature in Oracle Beehive Webmail differs from Beehive Webmail Client

---

Note: Other high-level topics of the Beehive Webmail Help may contain content describing various feature-level differences (such as setting a priority on e-mail) which are not supported in Oracle Beehive Webmail.

Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible to all users, including users that are disabled. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at http://www.oracle.com/accessibility/.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

Deaf/Hard of Hearing Access to Oracle Support Services

To reach Oracle Support Services, use a telecommunications relay service (TRS) to call Oracle Support at 1.800.223.1711. An Oracle Support Services engineer will handle technical issues and provide customer support according to the Oracle service request process. Information about TRS is available at http://www.fcc.gov/cgb/consumerfacts/trs.html, and a list of phone numbers is available at http://www.fcc.gov/cgb/dro/trsphonebk.html.
