

Power Pack Table of Contents Extension

Installation

Launch (double click) the “.svext” installation on a Windows machine with Smart View 11.1.2.5.210 or above installed along with Office 2007 and Office 2010. The extension will be installed in the user’s application data folder with no additional user interaction required unless the installation fails.

Note: Smart View 11.1.2.5.210 or above is required for this extension to work.

Usage

The Power Pack Table of Contents extension allows users to see what workbooks are open and if they are connected or not. From the Smart View Panel Home dropdown select ‘Table of Contents’ and a panel will be displayed that allows you to see all of your connected worksheets and workbooks. In the panel the sheets can be sorted by connection, sheet name or book name.

The screenshot shows the Microsoft Excel interface with the Smart View Table of Contents panel open on the left. The main spreadsheet displays financial data for various months and quarters. The Table of Contents panel lists the following worksheets:

- Sheet2 Book1 No Connection
- Sheet3 Book1 No Connection
- essbase
- Sheet1 Book1 essbase

The spreadsheet data is as follows:

	Actual Sales	Actual Margin	Actual Total Expenses	Actual Profit	Budget Sales	Budget Margin	Budget Total Expenses	Budget Profit	Variance Sales	Variance Margin	Variance Total Expenses	Variance Profit
